- **Product weight:** 40 kg
- **Weight incl. Packaging:** 43.8 kg
- **Box dimensions (W x H x D):** 850 x 667 x 490 mm
- **Color cabinet:** Black

### Accessories

- **Included Accessories:** 2 x AAA Batteries, Remote Control, User Manual

## Product highlights

### Ultra SlimLine TV

Philips SlimLine TV uses a slimmer CRT tube to give an overall slimmer TV that is up to 40% thinner than a traditional CRT TV while delivering the same superior picture quality.

### Crystal Clear

Combining picture enhancements like Contrast plus and color improvement, Crystal Clear improves picture depth.

### Noise Reduction

During weak signal transmission, random noise will appear on the image. When viewed, the image contains dark and white dots. Noise reduction significantly reduces the appearance of these dots, hence creating a pleasant viewing experience.

### Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

### SAP

Secondary Audio Program (SAP) allows you to choose another language in program where two languages are available.

### Smart Picture and Smart Sound

Philips preset modes for Smart Picture and Smart Sound provide you with direct access via a single key on the remote control. You can select optimized picture and sound settings for the various picture and sound modes.

### 4x3 Expand

4x3 Expand enables widescreen movies to be viewed on a 4:3 aspect ratio TV screen by removing the black bars at the top and bottom of the image. You are able to watch full-screen movies without compromising on picture quality and resolution.

### Component Video Input (YPbPr)

Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video.

### S-Video Input

An S-video format signal preserves the video quality better than standard video input.
