  32" - 968x717x702 mm
- TV Colour: Silver Chrome tbc (11004)

Product highlights

Real Flat Black Line S
Philips TV picture tube provides non–distorted picture quality, while offering a wider viewing angle without light reflections. Thanks to the highly pigmented phosphors, the brightness and contrast performance are considerably improved compared to conventional picture tubes.

100 Hz Digital Scan
Conventional Televisions show a picture by scanning 50 times per second (50 Hertz). This frequency can be detected by the human eye in the form of a field flickering picture. 100 Hertz sets show a picture by scanning 100 times per second eliminating the field flickering. Philips' Digital Scan doubles the number of field changes thus also eliminating visible line flicker. The result is an absolute stable picture relaxing for your eyes.

Crystal Clear III
A unique package of picture innovations including Scavem and Dynamic Contrast. Crystal Clear III, using 10 bit processing, offers 30% more contrast, natural colors and a high level of detail.

Active Control
Active Control automatically analyses, 50 times per second, the incoming signal and adjusts the key picture settings on Sharpness, Digital Noise Reduction and Picture Format. Active Control thus offers the best possible picture settings any time, any source.

Dolby Virtual
Dolby processing circuitry for an enhanced cinema surround sound effect without the need for rear speakers.

1200 Page Easytext
Almost instant access to frequently used teletext pages (Habitwatch) and the ability to scroll through subpages without waiting.

Teletext Dual Screen
The ability to shows a picture and text side by side from the same channel.

Top Controls
Volume and channel change controls on top of the tv to enable easy adjustment without the remote control

Side Connections
Connections for headphone and other inputs such as camcorder, side entry for ease of use
