Product highlights

Perfect Pixel HD Engine

Perfect Pixel HD Engine offers the unique combination of ultimate sharpness, natural detail, vivid colours and smooth natural motion on all qualities of HD, standard TV signals and multimedia content, for high-definition displays. Each pixel of the incoming picture is enhanced to better match the surrounding pixels, resulting in a more natural picture. Artefacts and noise in all sources from multimedia to standard TV and also in highly compressed HD content are detected and reduced, ensuring that the picture is clean and razor sharp.

LED Lux Display

The LED Lux Display renders the highest available contrast with stunning brilliance and colours. The revolutionary new LED lights are used in a grid as backlight for the LCD display.

Over a thousand LED's are operated selectively. They generate brilliant light in bright image areas, and are dimmed to lowest levels in dark areas and scenes. It creates an image with deepest black alongside maximum light output and colour in bright areas. The result is a stunning picture with extreme contrast, sharpness and vibrant colour.

Full HD LCD display 1920 x 1080p

Enjoy the exceptional picture quality of Full High Definition TV signals of HD sources like HDTV broadcast, or Blu-ray DVD. HD ready 1080p is a protected label that offers picture quality far beyond that of ordinary HD Ready. It conforms to strict standards laid out by EICTA to offer a Full HD screen that displays the benefits of resolution and picture quality of a Full HD 1920x1080p High Definition TV signal. It has a universal connection for both analogue YPbPr and uncompressed Digital connection of DVI or HDMI, supporting HDCP. It can display 1080p progressive signals at 24, 50 and 60Hz.

Perfect Natural Motion

Philips invented Perfect Natural Motion to eliminate juddering effects that are visible with

movie-based picture content. Perfect Natural Motion estimates motion in the picture and corrects juddering movements in both broadcast and recorded movie material (such as DVD and Blu-ray Disc). Perfect Natural Motion results in even smoother and quieter pictures with excellent sharpness. Perfect Natural Motion removes judder from SD and HD pictures, including 1080p movies and 24p True Cinema, for a motion performance that surpasses the cinema!

100Hz Clear LCD (2ms)

100Hz Clear LCD creates extreme motion sharpness for clear and vibrant images even with fast on-screen motion. The Double Frame Rate Insertion works with a high 100Hz refresh rate. It increases the sharpness of motion reproduction to more than twice that of conventional LCD, resulting in performance with a response time of 2 milliseconds (measured in Perceived Blur-Edge-Width; BEW). This unique Philips technology brings motion sharpness of LCD displays to an unprecedented level.
