Unique Lightweight, Wedge-Shaped Cabinet Design Weighing Less Than 150 Lbs.

## Benefits

This tunerless HDTV Monitor is ideal for consumers who get all of their programming via a cable set-top box or satellite receiver.

Synergistically optimizes picture performance by synchronizing advanced signal processing, display technologies and HD connectivity.

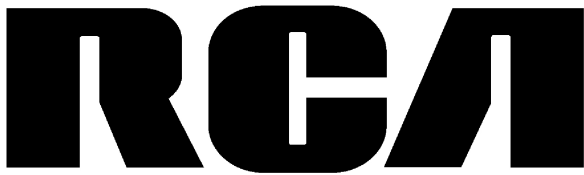

Separates black-and-white detail from color information to virtually eliminate edge crawls and rainbow effects while enhancing picture resolution.

DVI-HDTV allows transmission of (uncompressed digital) video signals from a set-top box to a digital TV. DVI delivers the purest digital transmission available today.

Simplifies connection of multiple external devices such as DVD, Satellite Receiver, game, etc. SYNCROSCAN™ inputs automatically detect 1080i, 480p, 480i scan rates.

Graphic equalizer w/expanded stereo processing provides a rich "live performance" experience. Audio outs simplify connections to home theatre systems.

TV can easily be moved on its 4 swivel casters. Unique angled backcover contours provide more living space in the room by fitting closer into room corners.
