Instructions

Cover-Bottom
(BN68-01674A)

Stand
(23", 26" BN96-01727A)
(32" BN96-01733A)

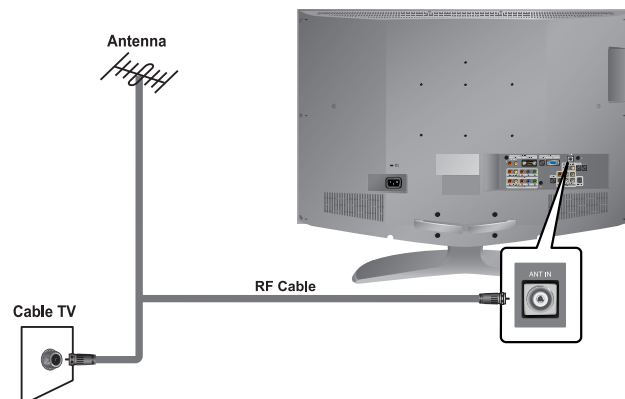

M4 X L16
Stand Screw
(6002-001294) x 4

Installing the stand

- 1** Lower the TV set in the direction of the arrow and fix the stand.
- 2** Use the four screws to tightly fix the stand.

Connecting Antenna/Cable TV

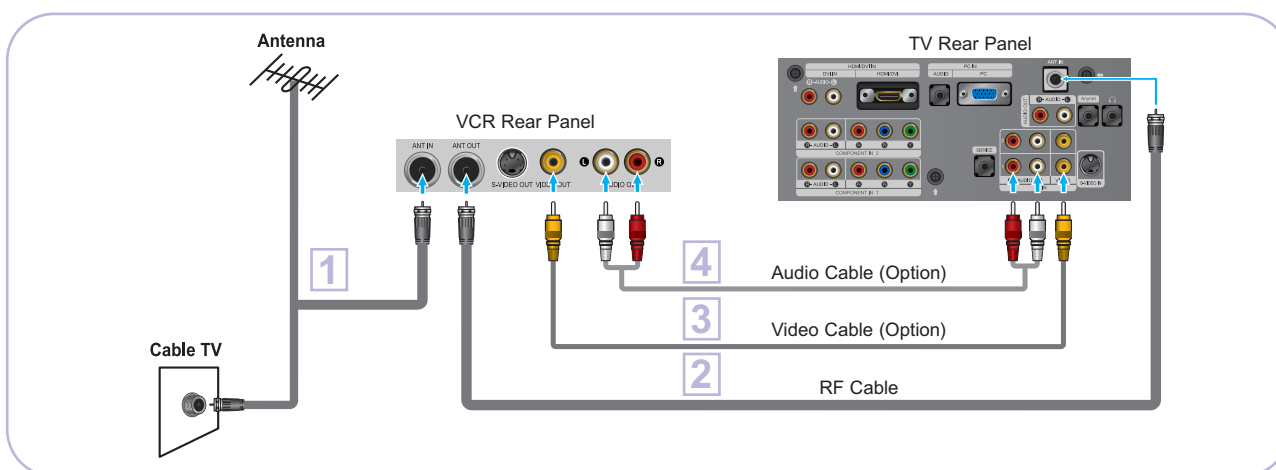

- 1** Plug the antenna/cable TV lead into the ANT IN terminal on the back of the TV.

! When connecting the RF cable to the antenna input terminal, keep the copper wire portion of the RF cable straight to avoid bending it.

✎ For more detailed antenna/cable TV connections, refer to the owner's Instructions.

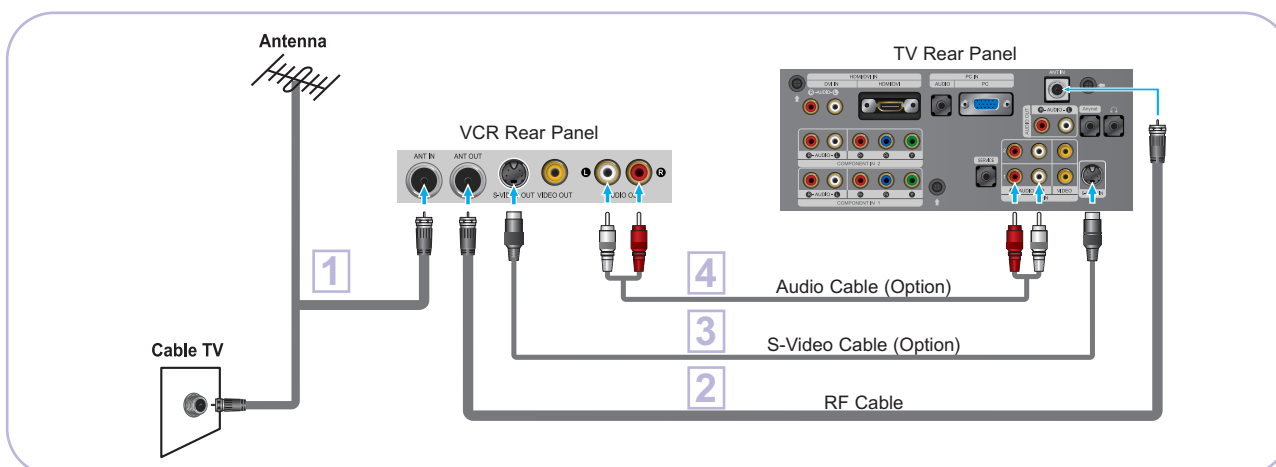

Connecting a VCR

- 1** Connect the cable TV or antenna to the ANT IN terminal on the back of the VCR.
- 2** Connect an RF cable between the ANT OUT terminal on the VCR and the ANT IN terminal on the TV.
- 3** Connect a video cable between the VIDEO OUT jack on the VCR and the AV IN [VIDEO] jack on the TV.
- 4** Connect an audio cable between the AUDIO OUT jacks on the VCR and the AV IN [R-AUDIO-L] jacks on the TV.

 If you have a “mono” (non-stereo) VCR, use a Y-connector (not supplied) to hook up to the R-AUDIO-L jacks on the TV

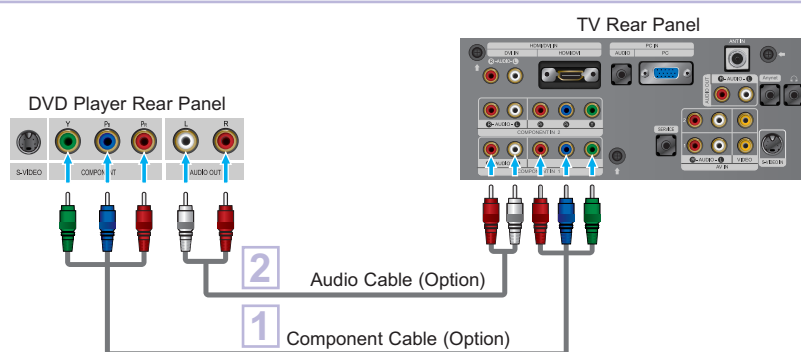

Connecting an S-VHS VCR

- 1** Connect the cable TV or antenna to the ANT IN terminal on the back of the VCR.
- 2** Connect an RF cable between the ANT OUT terminal on the VCR and the ANT IN terminal on the TV.
- 3** Connect an S-Video cable between the S-VIDEO OUT jack on the VCR and the S-VIDEO IN jack on the TV.
- 4** Connect an audio cable between the AUDIO OUT jacks on the VCR and the AV IN [R-AUDIO-L] jacks on the TV.

 An S-Video cable is usually included with an S-VHS VCR.

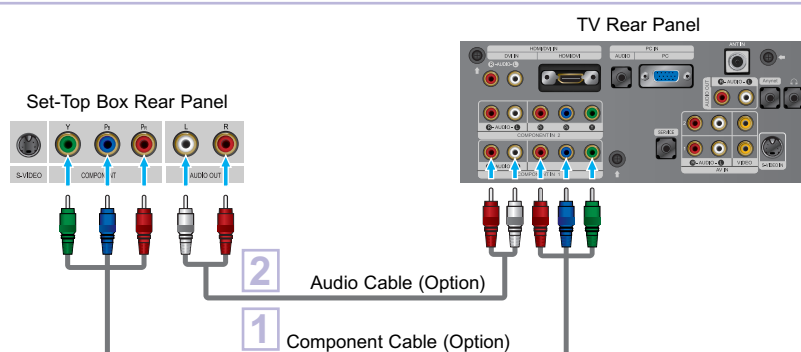

Connecting a DVD Player

- 1 Connect a component cable between the COMPONENT IN 1 or COMPONENT IN 2 [Pr, Pb, Y] jacks on the TV and the COMPONENT [Y, Pb, Pr] jacks on the DVD player.
- 2 Connect an audio cable between the COMPONENT IN 1 or COMPONENT IN 2 [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the DVD player.

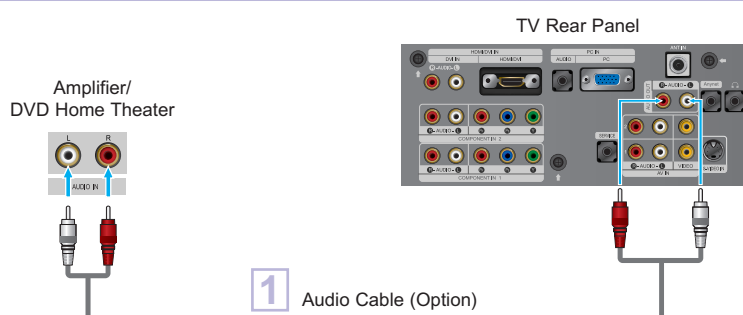

For an explanation of Component video, see your DVD player owner's manual.

Connecting a Digital TV Set-top box

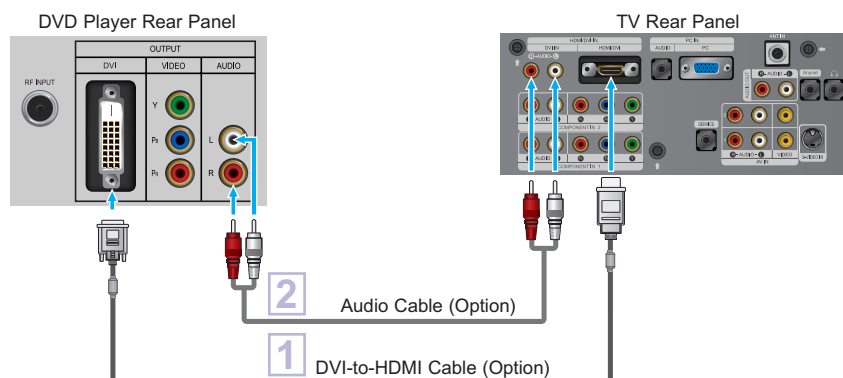

- 1 Connect a component cable between the COMPONENT IN 1 or COMPONENT IN 2 [Pr, Pb, Y] jacks on the TV and the COMPONENT [Y, Pb, Pr] jacks on the Set-top box.
- 2 Connect an audio cable between the COMPONENT IN 1 or COMPONENT IN 2 [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the Set-top box.

Connecting an Amplifier/DVD Home Theater

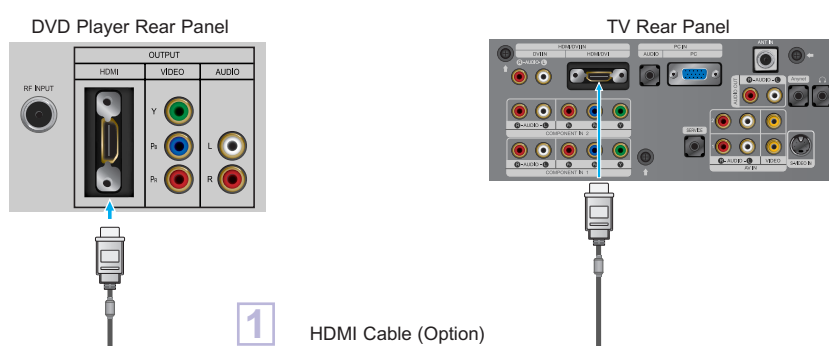

- 1 Connect an audio cable between the AUDIO OUT [R-AUDIO-L] jacks on the TV and the AUDIO IN jacks on the Amplifier/DVD Home Theater.

Connecting a DVD/Set-top box via DVI

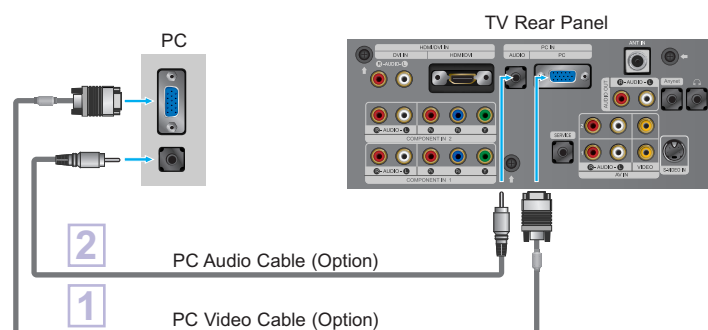

- 1 Connect a DVI-to-HDMI cable or DVI-HDMI Adapter between the HDMI/DVI connector on the TV and the DVI connector on the DVD player/Set-top box.
- 2 Connect an audio cable between the DVI IN [R-AUDIO-L] jacks on the TV and the AUDIO OUT jacks on the DVD player/Set-top box.

Connecting a DVD/Set-top box via HDMI

- 1 Connect an HDMI cable between the HDMI/DVI connector on the TV and the HDMI connector on the DVD player/Set-top box.

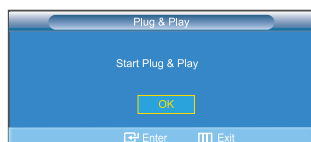

Connecting a PC

- 1 Connect a PC video cable (D-Sub) between PC IN [PC] connector on the TV and the PC output connector on your computer.
- 2 Connect a PC audio cable between PC IN [AUDIO] on the TV and the Audio Out of the sound card on your computer.

Plug & Play

When the TV is initially powered on, several basic customer settings proceed automatically and subsequently.

- 1** Press the **POWER** button on the remote control. The message "Start Plug & Play" is displayed with "OK" selected.

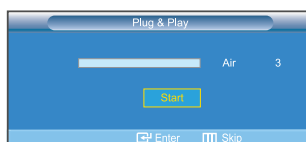

- 2** Select the appropriate language by pressing the **UP/DOWN** buttons. Press the **ENTER** button to confirm your choice.

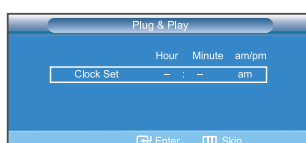

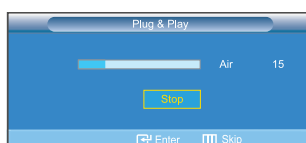

- 3** The message "Check Antenna Input" is displayed with "OK" selected. Press the **ENTER** button.

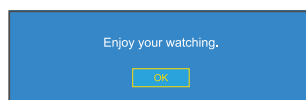

- 4** Press the **UP/DOWN** buttons to select "Air", "STD", "HRC", or "IRC", then press the **ENTER** button.

- 5** Press the **ENTER** button to select "Start". The TV will begin memorizing all of the available channels.

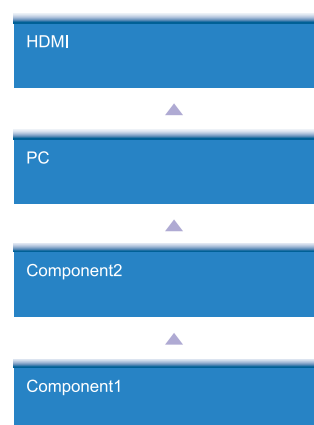

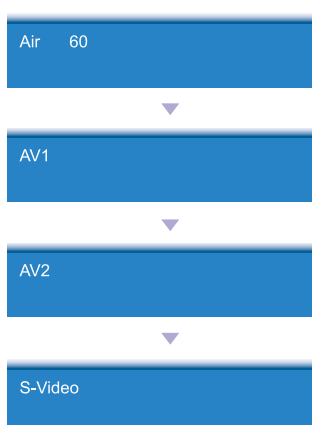

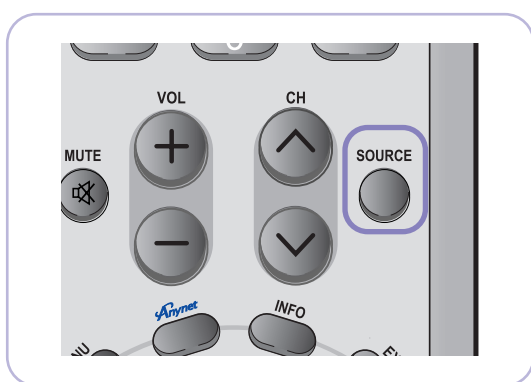

- 6** Press the **ENTER** button. Press the **LEFT/RIGHT** buttons to move to the "Hour", "Minute" or "am/pm". Set the "Hour", "Minute" or "am/pm" by pressing the **UP/DOWN** buttons. Press the **ENTER** button.

- 7** The message "Enjoy your watching." is displayed.

To Select the Source

Press the **SOURCE** button on the remote control

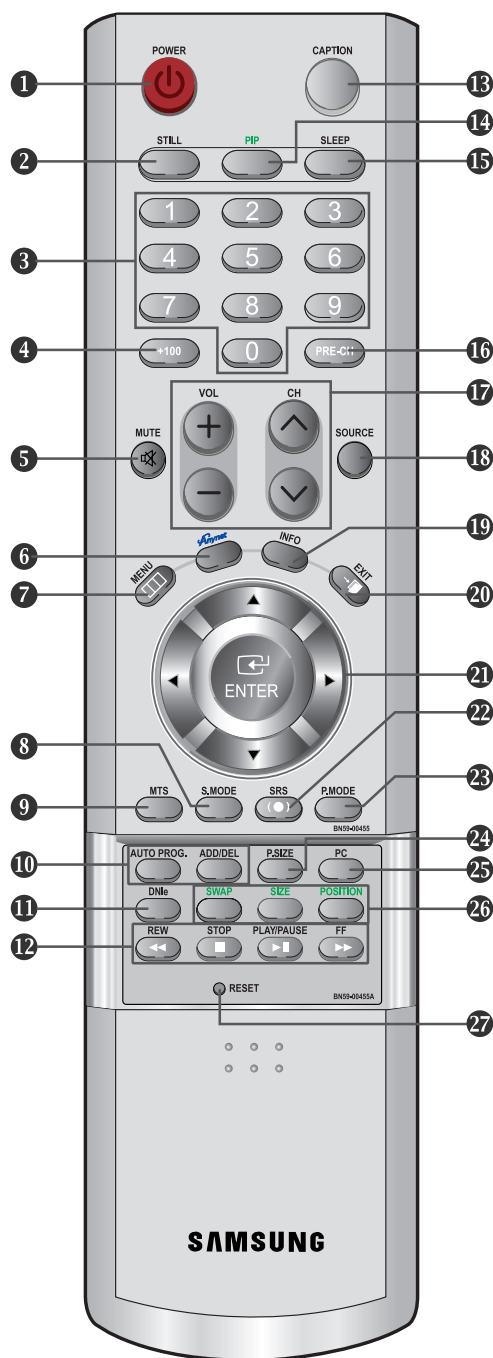

You can select the TV mode or an input source connected to the TV set. Use this button to choose an input source that you would like to watch.

You can only select a source if it is connected to your TV.

Remote control Functions Chart

- 1 POWER** 
Turns the TV on and off.
- 2 STILL**

POSITION
Press to select the position of sub (PIP) picture.
- 27 RESET**
When your remote does not work, change the batteries and press the RESET button for 2-3 seconds before use.

FAQ

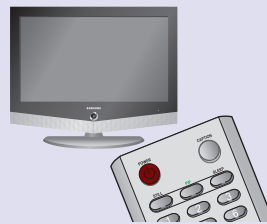

Note

Check the following items before calling a Samsung authorized service center.

If a still image is displayed for an extended period of time, residual images or blurring may appear.

When you need to leave the TV unused for an extended period of time, adjust the settings so that the TV automatically goes into energy saving mode or activates the screen saver to display moving images.

Remote control malfunctions

Replace the remote control batteries. Clean the upper edge of the remote control (transmission window). Check the battery terminals.

Image is not centered on the screen.

Adjust the horizontal and vertical position. The screen position must be adjusted on the output source (i.e. STB) with a digital signal.

No picture or sound.

Try another channel. Press the SOURCE button. Make sure the TV is plugged in. Check the antenna connections.

No sound or sound is too low at maximum volume.

First, check the volume of units connected to your TV (digital broadcasting receiver, DTV, DVD, cable broadcasting receiver, VCR, etc.). Then, adjust the TV volume accordingly.

Poor picture

Try another channel. Adjust the antenna. Check all wire connections.

"Not Supported Mode" message.

Check the maximum resolution and the frequency of the Video Adapter. Compare these values with the data in the Display Modes.

Image is not stable and may appear to vibrate.

If the setting is not correct, use your computer utility program to change the display settings.
