Solutions for Networks

3M<sup>TM</sup> Hot Melt Connectors are among the most popular with contractors because of their reliability and ease of use. They come pre-loaded with an adhesive that is not limited in shelf life, and the termination procedure provides the ability to reheat and reposition the fibre in the termination process. This easy-to-install field mount connector provides reliable performance in indoor and outdoor applications and has no internal splice.

All 3M<sup>TM</sup> Hot Melt connectors can be terminated using the same 3M<sup>TM</sup> Hot Melt Termination Kit 6365/6361. 3M<sup>TM</sup> LC Connectors require the 3M<sup>TM</sup> LC Expansion Kit 6650-LC which includes a weighted polishing jig to provide a PC centred apex end face.

### **APPLICATIONS:**

The applications for the hot melt connector are based on industry standards for performance over environmental extremes.
