

TURBOCHARGER TURBINE INLET STUD KIT
For Exhaust Manifold To Turbine Inlet
Catalog # 15012
INSTALLATION INSTRUCTIONS

Description: Contains the necessary hardware to mount the turbine inlet to the exhaust manifold. The hardware is constructed of high-quality stainless steel and can be used with any Garrett T25 or T28 Turbocharger.

• Kit Contents:

Qty.	Description
□ 4	Stud, 8mm x 1.25 x 1.45" long
□ 4	Nut, 8mm x 1.25
□ 4	Washer, 8mm

• INSTALLATION:

1. Hand tighten the 1.45" long studs into the exhaust manifold, with the shorter threads towards the manifold (See Fig. 1).
2. When attaching the turbocharger to the exhaust manifold, and the turbo outlet elbow to the turbocharger, use an 8mm washer under each nut, and hand tighten the 8mm x 1.25 nuts onto the studs.
3. Torque the 8mm x 1.25 nuts to 190 inch/lbs. (approximately 16 ft/lbs).
