- Full HD TV and Perfect Pixel HD Engine for unrivalled clarity
- FULL HD LED Pro for the world's most vivid 3D images

PHILIPS
sense and simplicity

Highlights

Cinema 21:9 ultra wide screen

Most TVs have an aspect ratio of 16:9 (or 1.78:1) and a resolution of 1080p Full HD. However, Hollywood blockbusters are usually filmed in 2.39:1 aspect ratio. Philips new Cinema 21:9 TVs perfectly match the original movie format used by directors with a 21:9 (2.39:1) aspect ratio. So no matter which movie, you can now watch it in its original aspect ratio and without the black bars.

Multi-view

The Ultra wide screen of the Cinema 21:9 is the ideal screen to enjoy a world of connectivity in a comfortable way. With Multi-view, while watching football on the left-hand side of the screen, you can simultaneously browse the Internet on the right side, or chat on Twitter. With Philips Net TV, top online content and services are available at the touch of a button: Video on demand, catch up TV, Twitter and many more! A Net TV window can be opened next to the TV, or the TV can be combined with another video device. The small screen can easily be swapped with your main activity to keep you in control.

Optimal viewing on 21:9 screen

On the Cinema 21:9, you can watch any type of content just the way you want. While watching your favourite TV programme, the Unique Smart formatting technology can

automatically adapt any content to the 21:9 screen or you can choose to watch it in its original format. At the push of a button, the choice is yours!

Ambilight Spectra 3

Add a new dimension to your viewing experience with Ambilight Spectra 3. This patented Philips technology enlarges the screen by projecting a glow of light from 3 sides of the back of the TV screen onto the surrounding wall. Ambilight automatically adjusts the colour and brightness of the light to match the TV picture. Thanks to the wall-adaptive function, the colour of the light is perfect, regardless of your wall colour.

3D Max

Be enthralled by 3D movies in your own living room with the 3D Max. The combination of the fast display and Active shutter glasses bring real-life depth in Full HD resolution. Now all 2D content can be experienced in 3D and you can even control the depth of the 3D to your liking. Your TV is ready for the 3D Max experience — just add the 3D Max glasses.

Energy

For many years Philips has pro-actively been working on energy efficiency. As a result, most Philips products have achieved green energy labels. The greener the label, the lower the

energy consumption, the lower your energy bill and the friendlier for the environment.

Smart TV

Smart TV for an easier and wireless TV experience in four areas. Net TV lets you enjoy a wealth of online apps on your TV: rent films, watch catch-up TV and enjoy social media. Stay in Control: change channels or enter text using your Smartphone or tablet. Use SimplyShare to enjoy photos, music and video from your computer, phone and tablet on your TV. Watch your favourite Programmes whenever you want: our programme guide helps you with Smart USB recording.

2 in 1 Stand

This TV comes with a revolutionary tabletop stand that can also be used to wall mount your television. There is no need to buy additional wall mount brackets: it comes conveniently with the TV in the box. The patented design allows for no less than 4 mounting positions: Tabletop swivel stand, Wall mount with swivel, ultra-flat wall mount and Vesa compatible wall mount fixation. Mounting is easy with 2 fixation points on the wall and smart levelling to get the TV perfectly horizontal with the touch of your hand!
