

N60i

The NavPix™ Range

The first thing you notice about the brand new N60i is its impressive widescreen. However, thanks to its intelligent design, the N60i is slimmer and lighter than most other navigators in its class. Sleek and robust, the N60i houses a vast array of impressive features.

The built-in NavPix camera captures your favourite places in full colour, making it simple to navigate back to them simply by tapping the touch screen. And because the NavPix website features downloadable NavPix photos, the N60i can take you to the best of Europe's most exciting cities.

The N60i sets the new standard in its class. This is truly ultimate navigation.

Photo navigation goes widescreen
