Teach Anywhere, Anytime

Wireless Freedom

The WT-1 takes the functionality of an interactive whiteboard and places it wirelessly in your hands. Now you can comfortably control your lessons and software applications up to 30 feet away from your computer. The interactive tablet provides easy access to teaching and presentation tools powered by StarBoard Software.

Involve Your Students

Keep your class involved by passing around the wireless tablet and see shy students blossom into confident participants. Continue to engage them with multi-media resources, interactive activities, and a variety of digital tools.
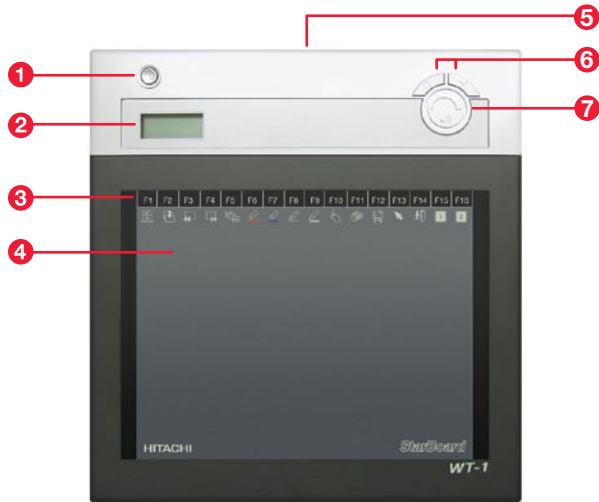

Designed for Education

Skip the frustration of setting up a wireless connection. The WT-1's RF technology takes the guess work out of pairing devices and allows more time for teaching. The shortcuts along the top of the tablet allow teachers to easily toggle between interactive tools and navigate through their lessons with a touch of a pen.

Features

1 Power button
2 LCD indicator
3 Function key area
4 Tablet active area
5 Pen holder/Wireless receiver
