

i.VoicePRO™

Bluetooth Headset

Kill Noise

P e r f e c t A r c h i t e c t u r e

i.VoicePRO™ Bluetooth Headset

Specifications

Bluetooth Specification:	v2.1+EDR Class 2
Bluetooth Profiles Supported:	Headset and Handsfree
Talk Time:	Up to 5 hours*
Standby Time:	Up to 100 hours*
Dimensions:	63 (L) x 16.7 (W) x 9.8 (H) mm
Weight:	12 grams

Features

Product Features :

- Latest Bluetooth v2.1+EDR
- Dual Microphone Technology
- Noise Filtering and Voice Separation Technology
- Wind Resistant
- Automatic Volume Control
- Multipoint technology for connecting 2 phones at the same time
- Simple easy pairing# & power consumption saving#
- Ergonomic earhook and comfortable earbud design

* may vary due to users' operation and Bluetooth device settings
need to work with devices with Bluetooth v2.1

Bluetooth Headset

Dual Mic Design

Noise Filter Technology

Bluetooth v2.1

Multipoint for connecting two phones

5 hours Talk time

Dual microphone design to kill all noises

Using two microphones, i.VoicePRO™ is specifically designed and tuned for voice pickup applications. The microphones array technology in i.VoicePRO™ enables the pickup of near-field signal but excludes the pickup of undesired far-field noises. Signals from far-field are ignored while the desired signal remains clean and clear.

Therefore, i.VoicePRO's users do not need to speak louder and can keep talking elegantly all day long.

Unique voice separation technology to deliver the best voice quality

i.VoicePRO™ has implemented a unique patented algorithm which is based on the physics of sound waves and also the differential time of arrival. The astounding noise filter software intelligently recognizes the users' voice and is thus able to provide near perfect voice recognition without any distortion, even in very noisy environments.

In addition, i.VoicePRO™ is also designed for wind resistance, speech totally insensitive to wind. As a result, the receiving end can hear every word from the user.

In addition, the surface of i.VoicePRO's main microphone is notched in the form of U-shape to further direct users' voice into the microphone.

main microphone

Latest Bluetooth v2.1+EDR

i.VoicePRO™ is built with the leading Bluetooth v2.1. Combined with the latest Bluetooth IC, and the enhanced data rate (EDR), i.VoicePRO™ delivers the best in class audio performance whilst its low power consumption design enables 5 hours talk time and 100 hours standby time.

Automatic volume control function to facilitate true handsfree communication

i.VoicePRO™ speaker's sound delivery feature improves the speech intelligibility while dynamically adjusting the speaker to accommodate the ambient noise level. The powerful combination of the microphone and speaker algorithms enables a high performance hands-free operation for users.

Designed with prism beauty and practical in use

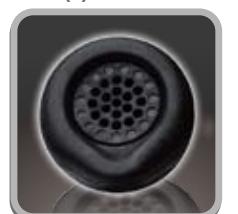

i.VoicePRO™ designs with fashionable prism beauty. The stylish outlook can easily mix and match with your daily outfit and in all occasions. The accessories are also practical in use.

(I) Earhook

The ergonomic earhook adds practical usage for users.

(II) Earbud

The comfortable earbud allows users to wear comfortably all day long.
