Technology of noise canceling headphones

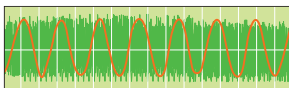

Technology

Ambient noise comes from vehicles engines/motors that can cause stress and fatigue.

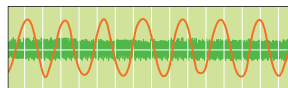

Normal headphones do not block noise...

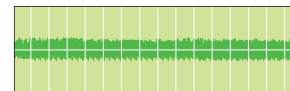

Such noises cannot be blocked with normal headphones, thus it may be annoying while traveling.

HA-NC260 HA-NC120 HA-NC80 HA-NCX78

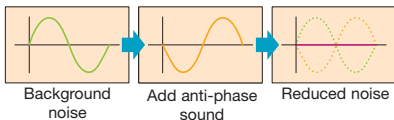

JVC Noise canceling headphones promise to reduce 75~90% of ambient noise.

Regardless of with or without music, JVC headphones make sure of relaxed travel all the time.

JVC Solutions

Active noise canceling

HA-NC260 HA-NC120 HA-NC80 HA-NCX78

Active noise canceling is the technology to reduce the ambient noise.

Dual mode noise canceling

HA-NC80

User can select from two noise canceling modes, wide or low, depending on the noise environment.

In addition to noise canceling circuit, design and material also work to block background noise.

HA-NCX78

Flat housing design works for wind noise reduction.

HA-NC260

Blocks background sound by memory foam cushion and extremely smooth surface of ear pads.

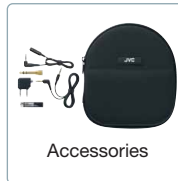

-20dB

Ambient noise reduction

Flat foldable design

Accessories

Package Design

Concept

High-grade and lightweight on-ear style noise canceling headphones with 20dB noise reduction

Main Features

- High-quality sound reproduction with 40mm Neodymium driver unit
- 20dB (90%) ambient noise reduction at 150Hz with feedback technology
- Excellent sound isolation from background noise is achieved with sound-insulating ear pads and dual housing structure
- Work as normal headphones when switched off
- Detachable 1.5m connection cord
- Flat foldable design
- Slim carrying case, dual plug adapter for in-flight use, attenuator, 6.3mm plug adapter and AAA battery included

iPad, iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Technology to block noise

Sound-insulating ear pads

Soft memory foam cushions with extremely smooth surface ear pads that fit exactly on your ears create a seal to block background noise.

Dual housing structure

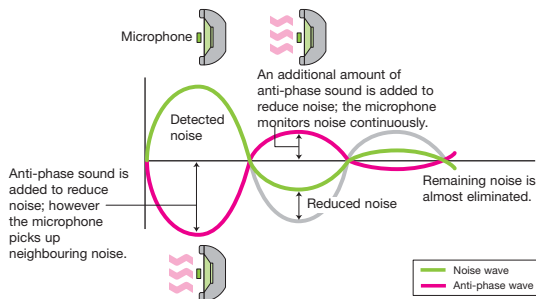

Dual acoustic wall blocks incoming background noise.

Technology to reduce noise

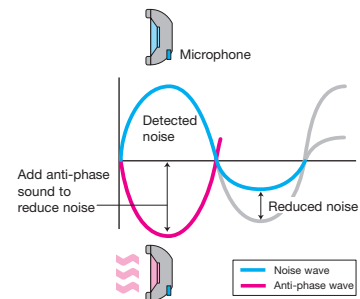

Equipped with advanced noise cancellation technology

Even after reducing background noise, some will remain. A microphone close to the driver unit picks up such remaining noise and the feedback circuit produces the appropriate amount of additional anti-phase sound. Every nuance of audio becomes clear through this feedback technology.

● Advanced noise canceling with “feedback technology”

● Standard noise canceling
