## European Union Directives Conformance Statement

Hereby, Motorola Inc., declares that this H270 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at [www.motorola.com/rtte](http://www.motorola.com/rtte).

## Caring for the Environment by Recycling

When you see this symbol on a Motorola product, do not dispose the product with household waste.

## Recycling Mobile Phones and Accessories

Do not dispose of mobile phones or electrical accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems are set up to handle electrical and electronic waste items. Contact your regional authorities for more details. If collection systems aren't available, return unwanted mobile phones or electrical accessories to any Motorola Approved Service Centre in your region.

## FCC Notice to Users

Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. See-47-CFR-Sec.-15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See-47-CFR-Sec.-15.19(3).

## Before you begin

---

### See figure 1 on page 1.

Take a moment before you get started to familiarize yourself with your new H270 Headset.

1. Volume button
2. Speaker
3. Call button
4. Power switch
5. Indicator light
6. Microphone

## Charging your headset

---

### See figure 2 on page 1

Verify slide switch is in the off position (toward the charging port).

The indicator light turns on when the battery is charging. It may take up to 60 seconds for the indicator light to turn on. When the headset's battery is fully charged (about 2 hours), the indicator light is steadily lit in blue.

*Note: Headset is not functional while charging.*

*This product uses a lithium ion, rechargeable, non-replaceable battery. Under normal use, the expected life of the rechargeable battery is approximately 400 charges.*

Your battery is designed to last the life of the product. It should only be removed by a recycling facility. **ANY ATTEMPT TO REMOVE OR REPLACE YOUR BATTERY WILL DAMAGE THE PRODUCT.**

## Wearing your headset

---

You can wear your H270 headset on your left or right ear. The headset comes ready for the right ear.

Placing the headset on your right ear : **See figure 3 on page 2**

Placing the headset on the left ear : **See figure 4 on page 2**

## Turning headset on and off

---

**To turn ON your headset**, slide the switch toward the microphone. The indicator light flashes blue 3 times, then :

- flashes in blue and purple (if paired and connected with another device).
- becomes steadily blue (if ready to be paired).

**To turn OFF your headset**, slide the switch toward the charging plug. The indicator light flashes 3 times then turns off.

## Pairing your headset

---

**Your phone's Bluetooth feature is off by default. To use your headset, turn on the Bluetooth feature in your phone.** Please check your phone's user's guide.

*Note : The Bluetooth feature remains on until you turn the feature off.*

Before you can use your headset, you must pair it with your phone.

### 1 Ensure headset is in pairing mode

Power on headset by sliding the Power switch towards the microphone to initiate easy pairing. After a few moments, the indicator light will be steadily lit in blue to indicate headset is in pairing mode.

If the headset does not enter pairing mode, see "Troubleshooting" for help.

### 2 Set your phone to look for your headset

- Perform a device discovery from the phone. For details about device discovery, consult your phone's user's guide. The phone lists Bluetooth devices it finds.
- Select **Motorola H270** in the list of discovered devices and confirm by following the on-screen prompts.
- When prompted by the phone, enter the passkey **0000** and confirm.

Pairing is successful when the headset indicator light changes from steadily lit to flashing blue and purple.

## Test and use

Your phone and headset are now paired and ready to make and receive calls. To confirm they are successfully paired and operating properly, place the headset over your ear and make a call from your phone. You will hear ringing from the headset.

After you have successfully paired your phone and headset, you do not need to repeat these steps each time you use the headset.

*Note: If desired, your headset can be restored to original factory settings. This action will erase all pairing information stored in your headset. Thus, you will need to pair your phone and headset again. To restore your headset to original factory settings, press and hold both Volume and Call buttons at the same time and slide Power switch to ON.*

## Using your headset: making & receiving calls

Your headset supports both Hands-free and Headset Profiles. Accessing call functions depends upon which profile your phone supports. See your phone's user's guide for more information.

*Note: Some features are phone/network dependent.*

Function	Action
Receive a call	Tap the call button
End a call	Tap the call button
Reject a call	Press and hold a volume button until the ringer stops
Make a voice dial call	Tap the call button and wait for voice prompt
Answer second incoming call	Use phone to answer (follow your phone's instructions)

## Indicator lights

---

### Charging status (with charger plugged in)

Headset Indicator	Headset Status
Red	Charging (below 70% charge)
Purple	Charging (above 70% charge)
Blue	Charging complete

### Operating status (with no charger plugged in)

Headset Indicator	Headset Status
Off	Power off
3 blue flashes	Powering on/off
Steady blue	Pairing mode
Rapid blue/purple flashes	Connection successful
Quick blue flash	Incoming/outgoing call
Slow blue pulse	Connected (on a call)
Slow blue flash	Standby (not on a call)
Slow red flash	Idle (not connected to phone)
Slow purple pulse	Connected call muted
Steady red	Attempting to connect
Quick red flash	Low battery

*Note: After 30 minutes on a call or of inactivity, the light stops flashing to conserve power, but the headset remains on.*

## Audio tones

---

<b>Audio Tone</b>	<b>Headset Status</b>
Ascending tone	Powering on
2 descending tones	Powering off
Ring tone	Incoming call
1 Short tone when pressing Volume button	Volume level (high, medium, or low)
High/low tones repeated every 60 sec.	Low battery
No audio indications; deteriorating quality	Out of range
2 ascending tones	Connected to phone

## Troubleshooting

---

### **My headset will not enter pairing mode**

Make sure that any devices previously paired with the headset are turned off. If the indicator light is not steadily lit in blue, turn off both the other device and headset, wait 10 seconds, then turn headset back on. Wait for the indicator light to become steadily lit in blue, indicating the headset is now in pairing mode.

### **My phone doesn't find my headset**

Make sure the indicator light on your headset is on (lit in blue) and steady when your phone is searching for devices.

### **My headset worked before but now it's not working**

Make sure your phone is on, and the Bluetooth feature is turned on in your phone. If Bluetooth was turned off or was turned on only temporarily, you may need to restart it and pair your phone and headset again.

If you have any additional questions, please call your hotline number (0870-9010-555) or visit us at [www.hellomoto.com](http://www.hellomoto.com).
