Unauthorized changes or modifications to this device may void the user's authority to operate the equipment.

Export Controls

This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

Introduction

The Nokia Bluetooth Headset BH-303 allows you to make and receive calls while on the move. You can use the headset with compatible devices that support Bluetooth wireless technology.

Read this user guide carefully before using the headset. Also read the user guide for your mobile device, which provides important safety and maintenance information. Keep the headset and its accessories out of reach of small children.

Bluetooth wireless technology

Bluetooth wireless technology allows you to connect compatible devices without cables. The mobile device and the headset do not need to be in line of sight, but they should be within 10 meters (30 feet) of each other. Connections

may be subject to interference from obstructions, such as walls, or other electronic devices.

The headset complies with the Bluetooth Specification 2.0 + EDR that supports the Headset Profile 1.1 and Hands-Free Profile 1.5.

Check with the manufacturers of other devices to determine their compatibility with this device.

There may be restrictions on using Bluetooth technology in some locations. Check with your local authorities or service provider.

Get started

The headset contains the following parts shown on the title page: power key (1), charger connector (2), earpiece (3), microphone (4), earloop (5), volume key (6), indicator light (7), and answer/end key (8).

Before using the headset, you must charge the battery and pair the headset with a compatible device.

Parts of the headset are magnetic. Metallic materials may be attracted to the headset. Do not place credit cards or other magnetic storage media near the headset, because information stored on them may be erased.

Chargers

Check the model number of any charger before using it with this headset. The headset is intended for use with the AC-3, AC-4, and DC-4 chargers.

Warning: Use only chargers approved by Nokia for use with this particular enhancement. The use of any other types may invalidate any approval or warranty and may be dangerous.

When you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

Charge the battery

The headset has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device, as you may damage the device.

1. Connect the charger to a wall outlet.
2. Connect the charger cable to the charger connector. The red indicator light is on while charging. It may take a while before charging starts. If

charging does not start, disconnect the charger, plug it in again, and retry. Charging the battery fully may take up to 1 hour and 30 minutes.

3. When the battery is fully charged, the indicator light turns to green. Disconnect the charger from the headset and the wall outlet.

The fully charged battery has power for up to 6 hours and 30 minutes of talk time or up to 150 hours of standby time. However, the talk and standby times may vary when used with different compatible Bluetooth devices, usage settings, usage styles, and environments.

When battery power falls low, the headset beeps, and the red indicator light starts to flash.

Switch the headset on or off

To switch on, press and hold the power key until the headset beeps

and the green indicator light is displayed.

To switch off, press and hold the power key until the headset beeps and the red indicator light is displayed briefly.

Pair the headset

1. Ensure that your mobile device is switched on and the headset is switched off.
2. Press and hold the power key until the green indicator light starts to flash quickly.
3. Activate the Bluetooth feature on the mobile device, and set the device to search for Bluetooth devices.
4. Select the headset from the list of found devices.
5. Enter the passcode 0000 to pair and connect the headset to your device. In some devices you may need to make the connection separately after pairing. You

only need to pair the headset with your device once.

If the pairing is successful, the headset beeps and appears in the

device menu where you can view the currently paired Bluetooth devices. The headset is now ready for use.

Basic use

Place the headset on the ear

To use the headset with the earloop, insert the headset into the catch (9) and gently push it downwards until it locks into place.

Slide the earloop behind your ear starting from the top (10), rotate the earloop for the best fit, and push the earloop toward your mouth (11). If you wear an earring, ensure that it is not accidentally attached to the earloop. The earloop has a strap that allows you to wear the headset on your neck.

To use the headset without the earloop, detach it (12), and plug the earpiece into your ear.

Change the cover

The headset may be supplied with front covers in different colors. To change the cover, pull the current cover starting from the top (13), and push the new cover into place.

Call handling

To make a call, use your mobile device in the normal way when the headset is connected to the device.

If your device supports last number redialing with the headset, press the answer/end key twice while no call is in progress.

If your device supports voice dialing with the headset, press and hold the answer/end key when no call in

progress, and proceed as described in the user guide of your device.

To answer or end a call, press the answer/end key. To reject an incoming call, press the answer/end key twice.

To adjust the headset volume, press the volume key up or down.

To mute or unmute the microphone, press the middle of the volume key.

To switch the call between the headset and a compatible device, press and hold the answer/end key.

Battery information

Your device is powered by a rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out. Recharge your battery only with Nokia approved chargers designated for this device.

Unplug the charger from the electrical plug and the device when not in use.

Clear settings or reset

To clear all the pairing settings from the headset, switch off the headset, and press and hold the power key and the answer/end key until the red and green indicator lights start to alternate.

To reset the headset if it stops functioning, although it is charged, plug the headset into a charger, and press the power key and the answer/end key at the same time.

Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time. Never use any charger that is damaged.

Leaving the device in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). A device with a hot or cold battery may not work temporarily,

even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing.

Do not dispose of batteries in a fire as they may explode. Batteries may also explode if damaged.

Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, allow it to dry completely.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.
- Do not attempt to open the device.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.

All of the above suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.
