

Auto Iris 8mm Lens

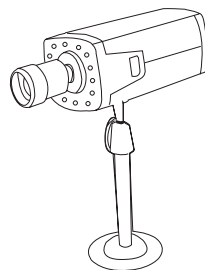

For consistent pictures in changing light conditions

- 8mm DC 'CS' mount lens with auto iris for a narrow angle view in finer focus detail
- Easy to use camera accessory
- Suitable for changing light conditions & areas exposed to natural light
- Only suitable for Auto Iris Cameras

Compatible with many Swann cameras including:

- 'CS' fixed body cameras: C480R (black & white), C500R (colour), C510R (colour with infra-red) or any 'CS' mount compatible cameras

Auto Iris 8mm Lens

For consistent pictures in changing light conditions

The Swann Auto Iris 8mm Lens is designed to fit 'CS' fixed body cameras such as the Swann C480R, C500R and C510R. The 8mm lens allows for narrower angle viewing in finer focus than the 4mm equivalent.

Use the lens for cameras exposed to natural light, near light fittings and more.

Swann Wide Angle, Fish Eye, Telephoto, Auto Iris 4mm, 3.5-8mm & Manual Vari-Focal 3.5-8mm lenses also available.
