

P8315 **Dummy Camera with LED**

Security for geniuses

Intimidate through imitation! The Dummy Camera's high-tech design replicates fully functioning cameras in every visible way. The unit is outfitted with a fully adjustable angle, authentic video cable and two "Warning" decals giving it an amazingly realistic appearance. Its weatherproof anodized aluminum housing and stainless steel screws provide solid rust proof construction guaranteed for life. A blinking LED operates for two years on a single set of batteries. Up to 5 times smaller than other simulated cameras, the unit will not detract from the look of your home, store, or business. With the Dummy Camera with LED, your property will not be considered an easy target anymore.
