

max-mms 400 multimedia server

GRATIFYING PERFORMANCE

Introducing MAX by AMX, the industry's only MultiMedia Server (MAX - MMS 400). MAX plays a major role: keeping your library of DVDs simple to use, well organized, and always fun to watch – wherever you are, whenever you want. From single rooms to multi-room systems, MAX manages your ever-growing DVD collection with amazing efficiency.

HIGHEST VIDEO STANDARD

MAX only knows one way to achieve the best possible video – through native DVD quality, the highest standard of video possible preserving the visual depth, dynamics and sharp quality of the original movie. Built with a robust internal hard drive, MAX has the ability to categorize and manage hundreds of DVDs, as well as CDs - the best of both worlds (CDs can be stored instead of DVDs at a ratio of 25 to 1).

CUSTOM VIDEO DISTRIBUTION

Experience the convenience and luxury of custom video distribution. Simply add a Audio / Video Module (AVM) to each area of the house where you want your movies to be displayed. The AVM communicates directly with the MMS to create a distinct video zone that can be controlled and personalized using an AMX Touch Panel.
