

ezTalker™

Tekkeon

digital Bluetooth Headset with OLED Display

ET3000

Cut loose with ezTalker digital, the full-featured headset with a new OLED digital display. Now you can make calls—directly from this innovative new headset—without ever touching your mobile phone. Make calls on the run with advanced calling features like stored number redial, last number redial, and voice dialing.

For incoming calls, the calling number will appear on the bright OLED digital display. And you can view the headset status, connection status, headset battery level and volume level, all from this optimized new display. Since you don't need direct access to your mobile phone, you can safely store it in your pocket, backpack, or briefcase—just about anywhere in close proximity that is convenient for you.

A rechargeable lithium polymer battery provides up to 5 hours of talk time and 120 hours of standby time while maximizing the quality of communication through the headset. Conveniently housed in the headset earhook, the battery can be replaced with a spare to provide even more hours of talk time.

ezTalker digital is designed to efficiently minimize background noise. The speaker sits comfortably in your ear to precisely direct sound and the uni-directional microphone is positioned to direct your speech.

Built with Bluetooth v1.2 technology, ezTalker digital is backward compatible with Bluetooth v1.1 devices, and works with any device that supports Bluetooth headset and/or handsfree profiles.

Features

- Stored number redial
- Calling number & status display
- Bright OLED display

For Bluetooth® Mobile
Phones and Devices

ezTalker™

digital Bluetooth Headset with OLED Display

ET3000

Compatible with
Bluetooth® v1.2 and v1.1
mobile phones!

Stored number redial

Quickly dial stored received numbers—without using your mobile phone. Last 15 received numbers are automatically stored for your convenience.

Direct charging

Power adapter plugs directly into headset eliminating the need to carry extra charging cradle.

Multi-use function button

One-touch access to pairing, call answer, call reject, call end, voice dialing, and power on/off.

Bright OLED digital display

See indications of audio and headset connection, headset battery level, and volume level.

Organic LED technology eliminates need for backlight while optimizing power usage.

Uni-directional microphone

Precisely directs speech and eliminates background noise for clear communication.

Calling name and some advanced features require support by mobile phone.

Rechargeable lithium polymer battery

Replaceable battery housed in earhook provides up to 5 hours talk time/120 hours standby time.

Earhook

Houses battery and is easily customized to wear on either ear.

Bluetooth v1.2 technology

Take advantage of adaptive frequency hopping technology for reduced interference between Bluetooth headset and wireless LAN.

Incoming caller ID

Identify the calling party before you answer the call.
