

Night Colors™

Color theorists believe that different hues have the power to soothe. With Night Colors™, you can experience a soothing multi-colored light show in any room of your house. This ingenious night-light is equipped with LED lights that gently change color — from red to pink, violet to blue, teal to green. Have a favorite color? Simply choose the freeze mode and Night Colors™ will remain in the chosen hue. Fast mode accelerates the color show and slow mode creates a slow melding of the rainbow like shades. Night Colors™ simply plugs into any wall socket. It's the perfect light to illuminate a stairway, child's room, hallway or bathroom.

- Plugs into any outlet
- LED's last up to 100,000 hours
- Cool light never gets hot to the touch
- Provides soothing waves of colored light
