Baby **Night**Light

IMAGEO

Fill baby's dreams with shapes and colours. The IMAGEO Baby NightLight is a smart LED light for baby rooms that gives a soft glowing light in different colours and shapes. The soft glow automatically turns on at twilight, and is reassuring while the child is still awake. And when sleeping, Baby NightLight makes it easy for parents to see if baby is doing well without disturbing the child. Parents can also create different effects and match the light colour to the décor by selecting a coloured cover and cutting a light pattern shape. The Baby NightLight is powered via a mains adaptor.
