

## New mounting solution can hold up to six monitors

PRODUCT SPECS

Multi-Monitor can bolt to a table top or clamp to any surface with optional clamp (included).

Mount slides freely  
right to left

**Premier Mounts**, the undisputed leader in mounting solutions for LCD flat panels now offers a solution for customers looking to mount up to six monitors on a tabletop stand, wall or ceiling.

The Multi-Monitor Series is the latest addition to its line of LCD mounts. It comes in three models: MMT (tabletop stand), MMW (wall mount) or MMC (ceiling mount). All three styles come with the standard three-screen mounting arm. Customers may order additional mounting arms to suit their particular needs.

The mounting arms feature smooth articulation in any direction and the ability to slide monitors from side to side. The mounting interface brackets offer additional tilt and pivot for precise placement, plus the ability to rotate your screen 360°. The Multi-Monitor Series fits most VESA standard monitors ranging in size from 10" up to 20". Available in black or silver.

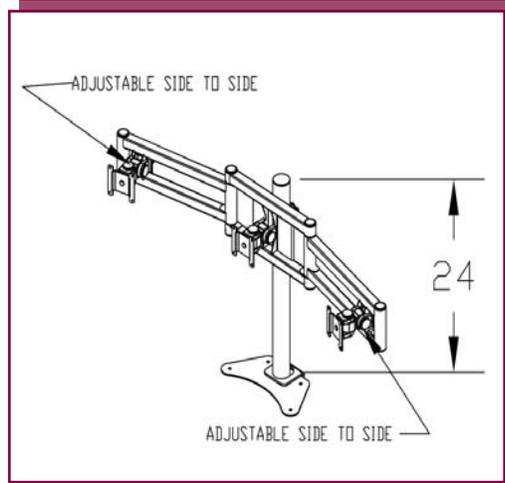

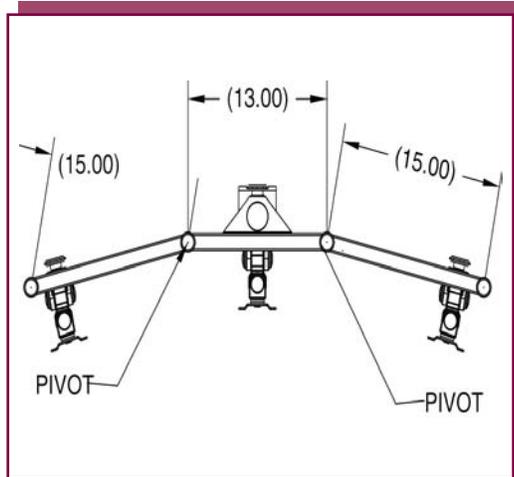

You can mount up to six monitors on our MMT (tabletop stand) or MMC (ceiling mount not shown), by ordering an additional Multi-Monitor Arm (Model # MMA).

MMW (wall mount) can be mounted directly to single studs or any solid surface. This stylish design is not only functional, it frees up valuable desk or floor space.
