Revised 11/2010

General Assembly Guidelines

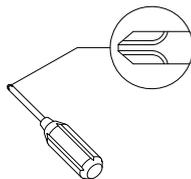

- I. Ensure that all parts and hardware are available before beginning assembly.
- II. Follow each step carefully to ensure the proper assembly of this product.
- III. Two people are recommended for ease in the assembly of this product.
- IV. The four main types of hardware used to assemble this product are: wood dowels, cam bolts and locks, bolts and screws.
- V. The provided glue is to secure wood dowels in place. When first inserting dowels, locate the appropriate hole for the dowel, place a small amount of glue in the hole and insert the dowel. Wipe away excess glue immediately.

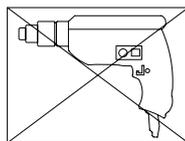

In future assembly steps when dowels are necessary to attach assembly parts together, place a small amount of glue on the end of the dowel before attaching parts together. Wipe away excess glue immediately.

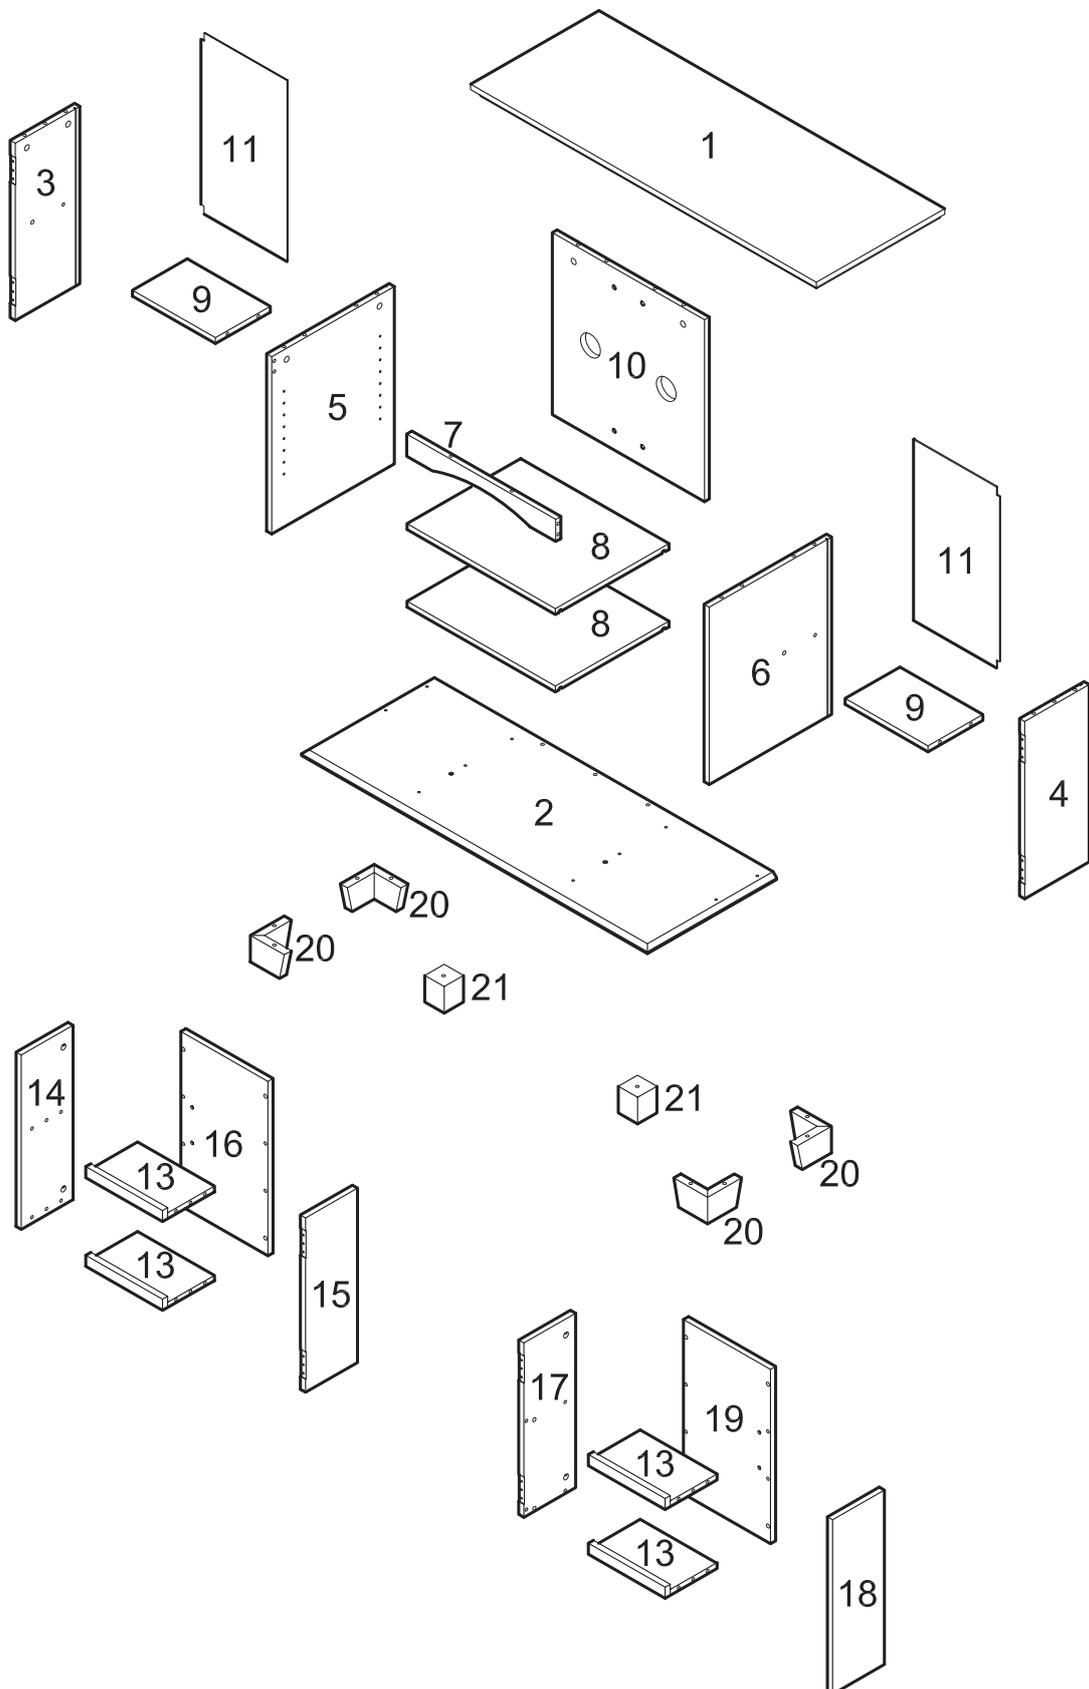

- VI. A Phillips head screwdriver is required for the assembly of this product.

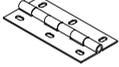

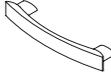

- VII. Power tools should not be used to assemble this product.
