

CEILING SYSTEMS

[Between us, ideas become reality.][®]

TECHZONE™
Ceiling Systems

The Armstrong logo, featuring the word "Armstrong" in a bold, sans-serif font with a registered trademark symbol, enclosed within a circular border.

Channel your thinking

The TechZone™ Ceiling Systems provide a monolithic, uncluttered ceiling visual using standard components and organize the look of the space. A six-inch wide technical “zone” organizes services, including lighting, diffusers and sprinklers in a system that’s pre-qualified for fit and finish. It’s affordable, hassle-free, reliable and easy to specify and install compared to other alternatives. Take control with TechZone:

- Large-size Optima® and Ultima® ceiling panels create the field
- 6” wide technical panels in Optima, Ultima or Metal house services and form the “tech zone”
- Linear recessed light fixtures, recessed downlights and pendants, air diffusers and sprinklers align precisely in the “tech zone” for a clean linear visual

Applications

OPTIMA

Open areas such as libraries/media centers, open plan offices, upscale retail settings and airports.

ULTIMA

Private offices and conference rooms.

TECHZONE System Benefits:

- Monolithic, uncluttered ceiling visual
- Standard ceiling and grid components; offers a custom look
- Your choice of layout configurations
- Lighting, diffusers and sprinkler heads are all housed in the 6” technical “zone”
- Since services are in the “zone,” maintenance hassles and potential panel damage is lessened
- Earn up to three LEED® credits with Hi-LR Optima and Ultima field panels and pendant fixtures
- Used in combination with indirect lighting, 90% light reflectant ceilings like Ultima provide substantial benefits, even over 75% light reflectant ceilings, as follows:
 - Decreased lighting power density by over 23%
 - Initial cost savings (fewer fixtures) or increased light levels by over 22%

48" x 48" Optima Tegular field panels and Optima Tegular technical panels on Interlude suspension system. Zumtobel pendant light fixtures. Carnes air diffusers.

Front cover: Optima 48" x 48" Tegular field panel and Optima Lay-in technical panels on Suprafine suspension system. Lithonia recessed light fixtures. Carnes air diffusers.

TechZone Partners

Armstrong has teamed with industry leaders in lighting, air diffusers and fire protection to create TechZone fixtures that are pre-qualified for fit and finish. Look for the Armstrong TechZone Compatible sign of assurance on partner specification sheets.

Easy to specify

TechZone™ Ceiling Systems are easy to specify and install. Simply follow these steps when designing and specifying your TechZone application.

1. Select your ceiling module (4' or 5').
2. Determine the on-center spacing for the linear technical zones.
3. Choose the desired size and edge detail for the field ceiling panels.
4. Select a TechZone compatible suspension system.
5. Select technical panel material and edge detail.

Field Panel Options

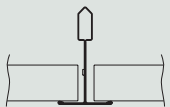

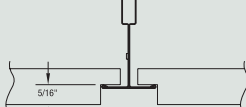

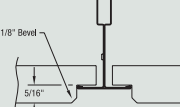

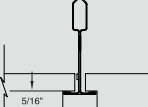

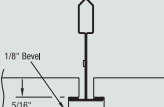

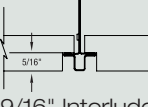

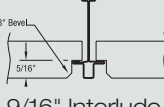

TechZone field panels can be either Optima® or Ultima®. They are available in a wide variety of sizes to accommodate 4' and 5' building modules and TechZone on-center spacing from 4' to 10'-6".

Select your ceiling module	Select your TechZone on-center spacing	Select your field panel material and size	
		Optima	Ultima
4'	4'-0"	 21"x24"  24"x42"  42"x48"	
4'	4'-6"	 24"x24"  24"x48"  48"x48"	 24"x24"  24"x48"
4'	6'-6"	 24"x24"  24"x72"	 24"x24"
4'	7'-6"	 42"x48"	
4'	8'-6"	 24"x24"  48"x48"  24"x96"	 24"x24"
5'	5'-0"	 27"x30"  30"x54"  20"x54"	
5'	5'-6"	 30"x30"  20"x60"  30"x60"	 30"x30"
5'	8'-0"	 30"x30"	 30"x30"
5'	10'-6"	 20"x60"	

*Panels install on 9/16" grid only for all 4'-0" and 5'-0" on-center spacing of technical zone and all 30" x 30" field panels.

Select your field panel edge detail and suspension system

(All field panels not available in all edge detail options.
See layouts, pg. 6-14 or selection chart pg. 15.)

Square lay-in Optima or Ultima	Square tegular Optima	Beveled tegular Ultima
 15/16" Prelude®	 15/16" Prelude	 15/16" Prelude
	 9/16" Suprafine®	 9/16" Suprafine
	 9/16" Interlude®	 9/16" Interlude

Suspension system colors have been coordinated with field panels, technical panels and partner fixtures.

Select your technical panel and its edge detail

Technical panels are available in Optima, Ultima and Metal with Lay-In or Tegular edge detail. All technical panels are 6" wide and they are available in 48" and 60" lengths. Technical panel edge detail options are as follows:

- Optima - Square Tegular or Lay-In edge detail
- Ultima - Beveled Tegular or Lay-In edge detail
- Metal - Square Tegular or Lay-In edge detail

Examples of edge detail options are shown below.

Remember, lighting and diffuser partner products are available with Lay-In and Tegular edge details as well.

You can specify different field panel edge detail and technical panel edge detail:

- Lay-In field panels with Lay-In technical panels
- Tegular field panels with Tegular technical panels
- Tegular field panels with Lay-In technical panels

Optima 48" x 48" Tegular field panels and Optima Lay-In technical panels on Suprafine suspension system. Lithonia recessed light fixtures. Carnes air diffusers.

Layout configurations

TechZone™ Ceiling Systems offer many configuration options to meet just about any design and functional need. TechZone is engineered for 4' and 5' building modules. Technical zone on-center spacing can be as narrow as 4' and as wide as 10'-6".

***MATERIAL:** Galvanized Powder Coated Steel - nominal thickness .025"

SURFACE FINISH: Factory-applied powder-coated finish (post-coated)

COLOR: Armstrong has coordinated the finishes of light fixtures, diffusers and metal technical panels and suspension systems

FIRE PERFORMANCE: Class A flame spread 25 or under per ASTM E 1264

WEIGHT; SQUARE FEET/CARTON: Visit the web for details

RECYCLED CONTENT: 25%

TechZone Suspension Systems

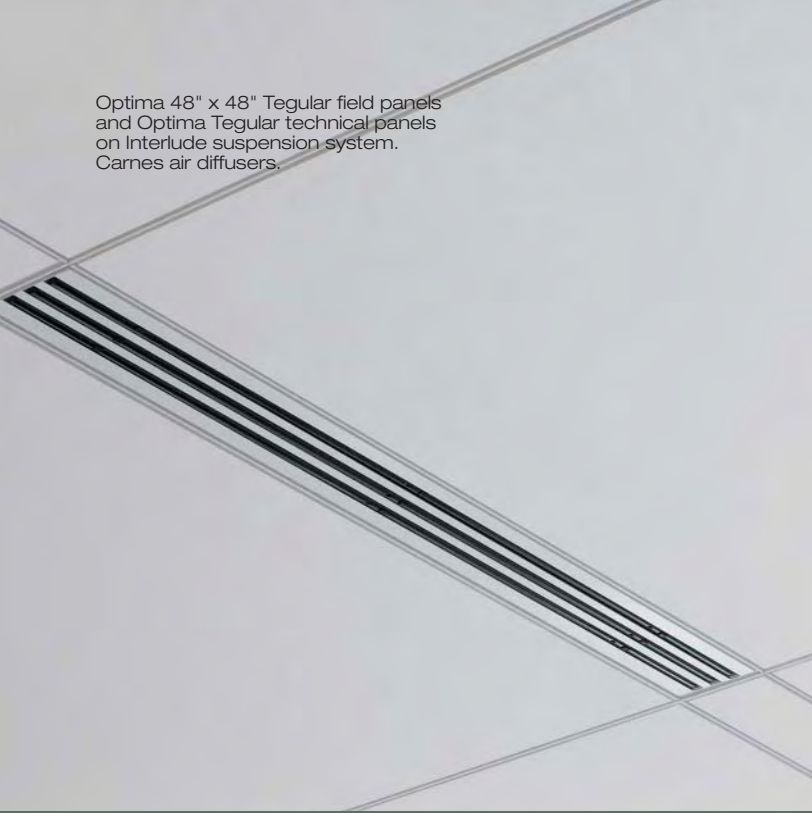

- Hot-dipped galvanized coating inhibits red rusting better than electrogalvanized or painted systems
- Rotary-stitched during manufacture by a patented method for additional torsional strength and extra stability during installation
- 10-year limited warranty; 15-year with HumiGuard® Plus products
- Recycled Content: 25%

Stabilizer Clip for Optima, Item 435

Recommended for panels 5' and greater in length. Ordered separately.
Note: Panels 5' to 8' - One clip installed near the mid-point of each long edge.

Optima 48" x 48" Tegular field panels and Optima Tegular technical panels on Interlude suspension system. Carnes air diffusers.

Ultima 24" x 24" Tegular field panels and Ultima Tegular technical panels on Suprafine suspension system. Corelite pendant light fixture.

TechZone partners

Industry-leading suppliers have engineered and designed lighting, diffusers and fire protection products for use in TechZone™ Ceiling Systems. All Armstrong TechZone compatible products are qualified for fit and finish with TechZone Ceiling Systems. They are readily available products using standard components and they can be specified, bid, purchased and installed using traditional methods.

Optima 48" x 48" Tegular field panels and Optima Tegular technical panels on Suprafine suspension system. RSA recessed light fixture.

Optima 48" x 48" Tegular field panels and Optima Tegular technical panels on Interlude suspension system. Zumtobel pendant light fixture. Carnes air diffusers.

The Leader in Air Management

FIRE PROTECTION

FLEXIBLE SPRINKLER CONNECTIONS

- Install in a quarter of the time of conventional hard pipe sprinklers.
- Allow exact centering of sprinkler head in ceiling panels.
- Allow for independent movement between sub-main piping and ceiling system.
- Meet all IBC requirements without need for unsightly oversized sleeve where ceiling meets the sprinkler head.

FLEXHEAD
INDUSTRIES 

[Between us, ideas become reality.]®

TECHZONE™ Ceiling Systems

Physical Data – Field Panels

Material

Ultima® is mineral fiber. Optima® is fiberglass. Both feature DuraBrite™ acoustically transparent membrane.

Surface Finish

DuraBrite with factory-applied acrylic latex paint providing superior light reflectance.

Acoustics

Optima panels provide outstanding acoustical performance and Ultima panels provide excellent sound absorption.

Sag Resistance

Panels feature HumiGuard® Plus, offering superior resistance to sagging in high humidity conditions.

Mold/Mildew and Antimicrobial Resistance

Ultima ceilings are treated with BioBlock™ Plus, which provides a guaranteed resistance against growth of mold/mildew and gram-positive and gram-negative odor/stain-causing bacteria. Optima is formulated to inherently resist the growth of micro-organisms.

Low/No-Added Formaldehyde

Optima items 3161 and 3162 are rated "No-Added Formaldehyde." All other Optima field panels are rated "Low Formaldehyde." Ultima item 1905 is rated "Low Formaldehyde." All other Ultima field panels are rated "No-Added Formaldehyde."

Weight; Square Feet/Carion

Please see armstrong.com or call 1 877 ARMSTRONG.

Warranty

TechZone Ceiling Systems carry a 30-year limited warranty.

Design Considerations

There are many design configurations possible. TechZone is engineered for 4' and 5' building modules. TechZone on-center spacing can be as narrow as 4' and as wide as 10' 6". Ceiling panels are available in a broad range of sizes. TechZone is especially appropriate for large expanses and open areas requiring superior acoustics and a clean, monolithic look.

Optima panels are not recommended for closed offices and conference rooms where CAC performance is crucial; however, CAC backing is available upon request. To prevent sound transmission in closed spaces, choose Ultima field panels with CAC 35 performance and the same compatible DuraBrite finish.

Metal technical panels may or may not have a negative impact on speech privacy, depending on the installation layout. For optimal acoustical performance, choose Optima technical panels.

Installation Considerations

TechZone Ceiling Systems are installed using standard 15/16" or 9/16" grid components. Optima and Ultima lay-in field panels are not recommended with 9/16" grid. Interlude is not recommended when using lay-in technical panels. Compatible lighting, diffusers and fire protection products are available from TechZone partners. Consult local code professionals about seismic requirements in your region.

Main beams should be installed perpendicular to technical zones. Cross framing, or Yoke suspension as detailed in CS-3479 (Armstrong Commercial Ceilings and Walls Solution Guide), may be required where this is not possible. Plenum depth required for the installation of panels is 3" for 2' x 4' panels and 6" for 4' x 4' panels. In most cases, installation of HVAC and can lighting will require more plenum depth. Perimeter treatments and transitions drawings are available in CS-3725 (TechZone Technical Booklet) or at armstrong.com/techzone.
