

**Multifunction IP Phone
For Your Business**

Features and Benefits

- Make VoIP Phone Calls over the Internet¹** When used with a VoIP service provider, this Business IP Phone works just like a regular phone. VoIP service maximizes your broadband investment by using your Internet connection for both voice and data. The DPH-140S delivers the latest in digital phone service, while retaining the traditional phone experience.
- Save on Long Distance and International Calls¹** With a compatible service provider, you can experience the benefits of a Voice over IP phone service. Many service providers offer unlimited local, long distance, and international calling for a single flat rate. VoIP is often considerably less expensive than the standard phone service.
- Fully Featured with Speakerphone and 2.5" LCD Screen²** The DPH-140S includes an integrated speakerphone for hands-free conversations or conference calling. The 2.5" LCD Screen² displays dial-out numbers, entries in the address book, and Caller ID numbers. Navigational menu keys make navigating the address book a straightforward process, while 10 memory function keys give you instant access to your most frequently dialed numbers.
- Supports Advanced Calling Features³** When used with compatible VoIP service, the DPH-140S supports several advanced calling features including last number redialing, mute, hold, and hands-free dialing. You can also adjust the volume of the speaker and the ringer.
- Dual Ethernet Ports for Hassle-free Installation** By connecting the DHP-140S directly to your DSL or cable modem with one of the Ethernet ports, and connecting your computer to the other Ethernet port, you don't have to make any changes in your network to use the DPH-140S. Network pass-through allows you to talk on the IP Telephone while you browse web sites, send e-mail, transfer files, or perform other network tasks at the same time.

¹ You must choose an Internet (VoIP) Phone Service Plan and sign up for service. VoIP phone plans, rates, and features may vary depending on VoIP Phone Service Provider. D-Link Systems, Inc. is not a Telephone Service Provider or VoIP Phone Service Provider. Note that an electrical power outage or a broadband provider outage will prevent operation of the VoIP phone, including for emergency purposes (e.g. calling 911).

² 2.25" diagonal actual viewing area.

³ Feature must be supported by your Internet (VoIP) Service Provider.
