SD-9100

— SUMMARY —

This service manual covers only the different points from the service manual, file no. 810-9807, for model SD-9000 since SD-9100 are basically the same designing as SD-9000.

Please refer to the file no. 810-9807 for other information.

LASER BEAM CAUTION LABEL

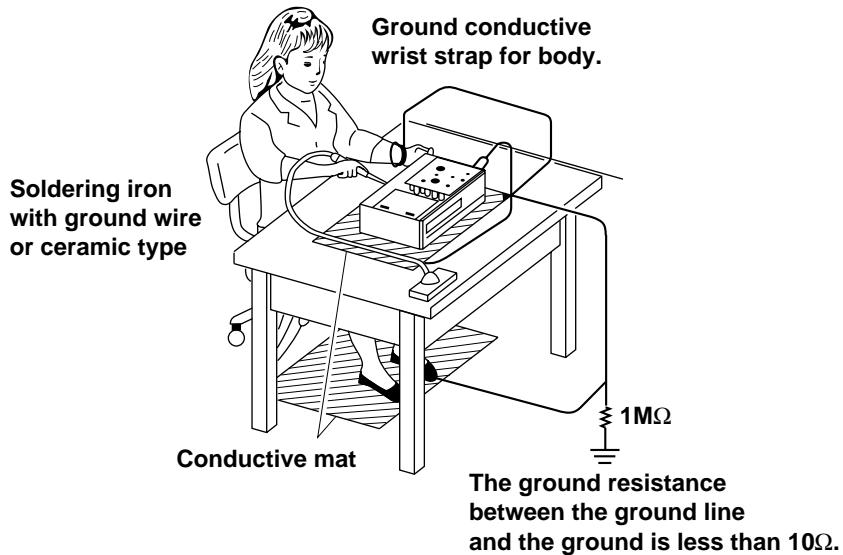

When the power supply is being turned on, you may not remove this laser cautions label. If it removes, radiation of a laser may be received.

PREPARATION OF SERVICING

Pickup Head consists of a laser diode that is very susceptible to external static electricity.

Although it operates properly after replacement, if it was subject to electrostatic discharge during replacement, its life might be shortened. When replacing, use a conductive mat, soldering iron with ground wire, etc. to protect the laser diode from damage by static electricity.

And also, the LSI and IC are same as above.

1-7. When Replaced ROM ICs or Upgraded Firmware

- When replaced the following ROM ICs, it is necessary to write the data into the new ICs.
 - IC615 (firmware)
 - IC613 (Setup default data and other information)
- When the firmware is upgraded, rewriting the new firmware into IC615 may be requested for servicing.
- Connect a computer to the main PC board of the DVD video player with using DATA UPDATE KIT (P/No. 79080074). (Fig. 3-2-6)
- Writing operation
Refer to the instruction attached to the data floppy disc.
