Addendum to LifeBook T4215 User's Guide

Microsoft Windows Vista™-Related Information

Please save this addendum with your LifeBook T4215 User's Guide for future reference.

The user's guide for your Fujitsu® LifeBook® T4215 is based upon the Microsoft Windows XP operating system. This addendum provides the differences between the Windows XP operating system and your Microsoft Windows Vista operating system.

1. Starting Windows Vista the first time

Please use the information below in place of "Booting the System" on page 40 of the User's Guide.

⚠️ **The first time you initialize your Windows Vista system, the screen will be blank for approximately two minutes.** This is normal. After initialization, a "Set Up Windows" dialog box will appear.

Important: During the setup procedure, do not disconnect the power supply, press any buttons, or use any peripheral devices such as a mouse, keyboard, or remote control.

1. First of all, you will need to read and accept the End User License Agreements (EULAs).

ℹ️
- If you reject the terms of the license agreement you will be asked to review the license agreement for information on returning Windows or to shut down your LifeBook notebook.
- You cannot use your notebook until you have accepted the License Agreement. If you stop the process your notebook will return to the beginning of the Windows Welcome Process, even if you shut your notebook down and start it up again.

2. You will be prompted to enter your User Name and Password and you will be given a chance to select an icon for your account.

3. The next screen asks for a Computer Name and allows you to choose a desktop background.

4. You will next see a "Help protect Windows automatically" screen in which the default choice is "Use recommended settings". The other two choices are "Install important updates only" and "Ask me later". Select from the three choices.

5. On the next screen set your time and date settings.

6. You will next see the "Select your computer's current location" screen. Make your selection from Home, Work (Default), and Public location.

7. The "Thank you" screen follows and an offer for Norton is extended. Following are several screens while Windows checks the system performance.

8. Windows will then boot up for the first time.

## 2. Registering Windows Vista with Microsoft

In order to ensure that you receive the most benefits from the Windows Vista operating system, it should be registered the first time you use it.

1. After Windows has booted up for the first time, the Welcome Center will appear. If the Register Windows Online icon is not seen in the window, click on "Show all 14 items".

2. Click on Register Windows Online and follow the instructions that appear to register your copy of Windows.

3. Installing Click Me!

Please use the information below in place of "Installing ClickMe!" on page 40 of the User's Guide.

> **i** Before installing the ClickMe! utility, be sure the wireless LAN switch is turned on.

The first time you boot up your system, you will see a "Primary Settings for the PC" window. This window explains the installations which will be performed by the Click Me! utility. If you click [Execute], Click Me! will begin installing. If after clicking the button you receive a "User Account Control" window, you will be asked for your permission to continue. Click [Yes] to continue. If you cancel the operation, the Click Me! icon will appear on your desktop for later installation.

4. Hibernation (Save-to-Disk) Feature

Please use the information below in place of "Hibernate Mode" on page 37 of the User's Guide.

The Hibernation feature saves the contents of your notebook's system memory to the hard drive as a part of the Suspend/Resume mode. You can enable or disable this feature.

Enable or Disable the Hibernation Feature
The default settings are not enabled. To enable or disable the Hibernation feature follow these steps:

1. From the **Start** menu, select **Control Panel**.
2. Select "Choose what the power button does" or "Choose what closing the lid does", then make your selections (Do Nothing, Sleep, Hibernate, or Shut Down).

5. Restarting the System

Please use the information below in place of "Restarting the System" on page 37 of the User's Guide.

If your system is on and you need to restart it, be sure that you use the following procedure.

1. Click the **Start** button, and then move the mouse over the right arrow.
2. Select the desired action from the list.

> **i** Turning off your LifeBook notebook without exiting Windows or turning on your notebook within 10 seconds of the notebook being shut off may cause an error when you start the next time.

6. Switching from Google Sidebar to Vista Sidebar

1. Disable Google Sidebar by right-clicking the Google Deskbar icon in the Windows taskbar at the bottom right of the screen. Instead of Sidebar, choose one of the other options: Deskbar, Floating Deskbar, or None. (Note that selecting None will also disable Google Deskbar.)
2. Enable the Vista Sidebar by going to Start -> All Programs -> Accessories, then select Windows Sidebar.

7. Wireless LAN Changes

Please use the Vista-specific information below in place of the related section on page 97 of the User's Guide.

Configuring the WLAN with Windows Vista
The WLAN device can be configured to establish wireless network connectivity using the software that is built into Windows Vista. Support for most industry standard security solutions is contained in this software.

Pre-defined parameters will be required for this procedure. Please consult with your network administrator for these parameters:

1. Click the Start button, then select Control Panel.
2. If the Control Panel is not in Classic View, select Classic View from the left panel. Double-click the Network and Sharing Center icon.
3. Select "Manage wireless networks" from the left panel.
4. Click on the [Add] button.
5. Depending upon what type of connection you would like to make, make a selection. For an infrastructure network, select "Manually create a network profile. For ad hoc network, select "Create an ad hoc network".
6. Enter the required information. It may be necessary to consult with your network administrator for some of the information.
7. In the event you require assistance, go to the Network and Sharing Center window (Start -> Control Panel -> Network and Sharing Center), and type in relevant keywords in the Search box.

Connecting to a Network with Windows Vista
After you have configured your computer, you can connect to an active network by performing the following steps:

1. Click on the WLAN icon in the system tray.
2. Select "connect to a network".

Select a network from the list that appears, and click the [Connect] button.
