* Bluetooth is an optional feature

Quick Tips

It takes approximately 3.0 hours to charge a single notebook battery, whether the notebook is turned off, in suspended mode, or in use.

Optimizing Battery Life
• Set power management setting to Maximize Battery Life.
• Adjust display brightness levels to lowest comfortable setting.
• Remove the PC Card when not needed.
• Utilize Suspend mode when not using your notebook.
• Read the Power Management section in your User's Guide for additional features.

Adjusting display brightness
• Fn + F6 to decrease brightness
• Fn + F7 to increase brightness

Adjusting volume
• Fn + F8 to decrease volume
• Fn + F9 to increase volume

Drivers
Look for the latest drivers on the Drivers and Applications Restore CD, right click the FDU icon and select update, or download them at us.fujitsu.com/computers

1. What's in the Box
Check to see that all of the following are in the box:

☐ LifeBook notebook
☐ Lithium ion battery (installed)
☐ AC adapter with power cord
☐ Stylus
☐ Phone/modem (RJ-11) telephone cable
☐ Drivers and Applications Restore CD
☐ User's Guide
☐ Microsoft associated product materials
☐ International Terms and Conditions Booklet and Product Registration Card
☐ Restore DVD
☐ Trusted Platform Module (TPM) driver and application CD

Depending upon your configuration, the following items may also be shipped with your notebook:

☐ Additional lithium ion main battery
☐ Port Replicator
☐ External USB floppy disk drive
☐ Bluetooth driver CD
☐ Softex OmniPass CD

2. Turn on Your Notebook

• Plug the AC adapter into your notebook.
• Plug the power cord into the AC adapter.
• Connect the power cord to an electrical outlet.
• Connect phone cord or ethernet cable to your notebook and to a wall jack.
• Press the power button to turn on the notebook.
• The notebook is now on and the battery is charging.
• The notebook will begin a power-on self test. Once successfully completed, the operating system will begin the initialization process.

3. Register

• Enter the information as prompted to personalize your notebook, and configure your modem to dial.
• Register your notebook with Fujitsu Service and Support via our Web site at us.fujitsu.com/computers

4. Calibrate the Touch Screen
• Select the Fujitsu Touch Screen Calibration utility in the control panel
• Using the stylus, firmly touch and briefly hold at the center of the red target [+]. Lift the stylus from the screen and the target will move to a different location on the screen.
• Repeat for each of the nine target [+] points
• Finish the calibration produced by clicking the [update] button

> ⚠ **Screen should only be touched with stylus**

5. Activate Additional Utilities
If you have the wireless LAN model, please ensure the wireless LAN ON/OFF switch is "on" before clicking the "click me" icon.

• Click the [🔒] icon on the desktop or in the start menu to activate additional utilities.
• Right click the Fujitsu Driver Update (FDU) [icon] icon and follow the on-screen instructions to update your drivers. For more information, see your User's Guide.

Status Display Panel
