Dear Account Holder

Welcome to Equanet's first edition of our exciting - new - deals mailer, including a great range of products chosen specifically for NHS organisations. If you can't find the products you are looking for this issue, why not browse our updated 'new look' website, www.equanet.com, for our full range of over 100,000 branded products.

If you take a look through the mailer, you will find a strong mix of volume "deal" based offers, as well as a selection of Public Sector promotional offers, including savings of up to 27% on Toshiba Notebooks versus standard pricing for non Public Sector clients!

We also showcase a selection of HP Prescription Printer deals, where NHS savings of up to 26% can be made over standard pricing! These deals end on 30th April 09, so why not maximise your budget and take advantage now?

With our Catalyst accreditation and Equanet Catalyst Partner Programme in place, we are able to provide the right product or solution - large or small, from simply supplying the right toner cartridge next day to sourcing the top specialists in the field who can deliver on time and on budget.

If you'd like any further advice or information about how we can help your organisation procure its IT needs better, please give your account manager a call, or visit www.equanet.com.

Yours Sincerely
John Stevens
Marketing Director

Catalist Accredited Lot 1

Equanet has established preferred supplier status on a number of key framework agreements, including: Catalyst (Lot 1), ABC, BECTA, CBC, CPC, ESPO, NEPO, & Value Wales. We have long established strong partnerships with thousands of public sector organisations, making Equanet their trusted IT Reseller.

The 'Reseller' (Lot 1) category allows Equanet to provide IT Products and associated services against each of the following lots:

- Lot 1 – Reseller
- Lot 2 – Network Infrastructures
- Lot 3 – Client Devices
- Lot 4 – Peripherals
- Lot 5 – IT Consumables and Accessories
- Lot 6 – Operating Systems
- Lot 7 – Office Productivity, Misc Apps & Database
- Lot 8 – Network Software, Security & Maintenance
- Lot 9 – Software Developments, Design & Testing Tools
- Lot 10 – Data Management Utilities & Storage
- Lot 11 – Enterprise Resource Planning Applications

Dell Build to Order

Equanet has an established distribution partnership with Dell Computers, including Laptops, Desktops, TFT's etc. This enables Equanet to take some of the frustration out of your procurement and deployment process. We are able hold stock on a number of popular configurations providing next day delivery options for those urgent next day requirements.

Equanet is also able to provide Dell Build-to-Order configurations on Laptops, Desktops, TFT's and Servers ensuring that we can meet your exact specification requirements. If you do not see the exact model or specification hardware on our website, please contact your account manager. There is usually with a 10-14 day turn around on all Build-to-Order purchases.

Buying Dell through Equanet allows you to take advantage of our fantastic in house capabilities, including system imaging, deployment and management, along with our capacity to store/bond the stock to deploy at your discretion when YOU choose to roll out your next hardware update. Equanet can help you save time and money compared to your traditional procurement alternatives.

See page 3 for more Dell Build-to-Order details.

OptiPlex 960 Desktop

A powerful, expandable desktop solution designed for advanced users. The OptiPlex 960 delivers outstanding business performance with remote management capabilities that help simplify systems management, security and minimise power consumption. Features include: Long system lifecycles, advanced manageability tools for IT, Comprehensive Enterprise Class security protects critical data, green designs and smart energy choices help reduce environmental impact.

Designed with the environment in mind: HP offers desk-based products, solutions, and services that use innovative materials, have energy efficient features, and are easy to recycle to help limit environmental impact.

HP makes it easy to recycle computer hardware, and aims to recover 2 billion pounds (900,000 tonnes) of electrical products and supplies by the end of 2010. All HP Desktop PCs are built for efficiency; in particular, the dc7900 model meets or exceeds global environmental standards, such as EPEAT and ENERGY STAR. 85% efficient power supplies are available for this model, which is produced with low-power chipset and energy efficient processors, and is easy to disassemble and recycle.

HP Professional Innovations... Part of your notebook DNA

Every notebook gives you portability, but portability doesn't make you mobile.

True mobility comes with a certain amount of security and reliability risks.

Is your information safe? What if you damage your notebook? HP addresses these issues with HP Professional Innovations. Just like the strands of DNA that make you who you are, HP Professional Innovations are the genetic codes that set us apart.

These intuitive technologies are the foundation of our notebook family, adapting perfectly to your needs, and include the following:

HP Professional Innovations help mitigate risk with Drive Encryption for HP ProtectTools, increase productivity with HP Night Light, enhance reliability with HP DuraKeys, and improve connectivity with HP Broadband Wireless

Reliability

- Designed to ensure high product quality and durability
- Get mobility you can truly count on
- HP Total Test Process
- Hard Drive Protection
- HP Durable Materials
- HP Recovery Manager

Ease of use

- Increase productivity and lower IT support costs with solutions which are easy to use, deploy and manage
- Easy on power
- Easy wireless connections
- Easy access
- Easy to share work
- Easy accessories
- Easy to deploy and manage

Security

- Flexible security solutions for a trusted environment
- Protecting assets and data
- Preventing unauthorised access
- Preventing illegal and unwanted software
- Deploying patches
- Addressing legislative concerns

- Dell's lightest Latitude yet, starting at just 2.2lbs
- The stability, security and manageability you've come to expect from Latitude

New generation prescription print - HP P2055 Series

Remember those good old 1320 and 2015 printers? They have printed millions of prescriptions for the past years. Now HP has brought out the new generation prescription printers - 2055 series.

While keeping all the tested and approved specifications, 2055 Series have improved features to suit medical environment better. The media input tray no longer requires an adapter to print prescriptions and DIMM card is ready embedded.

2055 series boast a print speed of up to 33 pages per minute for A4 and 50000 pages monthly duty cycle. Furthermore, auto-duplex now comes as standard to reduce cost and save our planet.

2055 series have Cerner, EMIS, INPS, iSOFT accreditations. HP and Equanet have teamed up to offer our NHS customers 15% off standard catalyst price. This offer will last till 30th April.

Cartridge Recycle

HP also runs an industry-leading programme, begun in 1992, for high volume users such as NHS and Government to recycle empty cartridges.

Conserve resources

- External packaging for HP LaserJet cartridges now uses 30% recycled material.
- HP Transparencies now use 45% recycled material.
- Monochrome HP LaserJet cartridges now average 32% fewer parts and 55%

LaserJet cartridges are easier to recycle

- 203 million pounds (92 million kilograms) of HP print cartridge material were recycled by January 2005.
- Many types of HP paper and card stock can now be recycled like normal office paper.
- Fully recyclable product packaging is used in many regions.
- Plastic parts of 25 grams or more are now marked to aid sorting.

Fewer plastic resins.

- Monochrome HP LaserJet cartridges now have an 80% higher yield.
- Use more environmentally sound materials and processes
- NO ozone-depleting substances are used in any products or packaging.
- NO elemental chlorine is used in manufacture of external packaging for HP

Easy to Participate

- Order your collection box online: <http://www.hp.com/hpinfo/globalcitizenship/environment/recycle/>
- When it is full, arrange collection online
- Everything is free of charge!

The Healthcare Printing Experts

With well over 80,000 printers supplied to the primary care sector, Brother is truly the preferred printing partner for GPs and surgeries. In fact, did you know that every day over 1 million prescriptions are printed on Brother printers?

We've developed close working relationships with leading clinical software providers including EMIS, iSOFT and Cerner. Our latest range of mono laser printers offers prescription printing 'straight from the box', without the need for an adaptor.

Our printers are ideally suited to busy hospital wards, doctor's surgeries and receptions. These versatile machines can print wrist tags, specimen sacks plus handling general correspondence, patients' notes and prescriptions.

Free 3 year on-site warranty valid until 31st March 2009 - see www.brother.co.uk for terms and conditions

Samsung

Digital signage can display important patient and visitor information such as consultant locations, updates on A&E waiting times, accurate way finding, hospital cleanliness updates or healthy living advice in a visually stimulating digital format. Live, subtitled TV content such as sports or news coverage can also be displayed, providing entertainment in waiting areas without detracting from the peaceful environment required by patients.

As an innovation and market leader in the field of digital signage, NEC offers a unique solution package with LCD and plasma displays, as well as installation, maintenance and content supply through its system partners. Success through fast, target-oriented communications.

The system can be easily managed by the hospitals' internal administrative staff so that up to the minute information can be targeted to an individual screen or broadcast across all screens simultaneously at the click of a mouse.
