

QSC is THX approved!

QSC Audio Products has become internationally known as the number one power amplifier manufacturer for theatre and cinema. In QSC's continuing commitment to achieve the highest possible standards, we proudly announce the following QSC products have received THX approval by the THX Division of Lucasfilm Ltd. This list represents the broadest range of THX certified amplifiers by any one manufacturer.

DCA SERIES

DCA amplifiers take your soundtracks to a whole new level. With PowerWave™ technology, they provide a vast dynamic range that can handle the most demanding digital soundtracks without running out of headroom. They also are extremely compact, delivering up to 1,700 watts per channel in a two-rack space, 21-pound chassis that is only 14" deep. Other QSC exclusive features include separate monitor panel speaker outputs, active AC inrush limiting, and a DataPort interface for QSC's Digital Cinema Monitor.

ISA SERIES

QSC's new ISA Series amplifiers are a cost-effective power solution for any cinema sound system. Three low-impedance models offer up to 1200 watts/channel and are rated for 2-ohm operation. Three 70-volt models are ideal for use with lobby music and paging systems. Accessory crossovers are available for easy bi-amp operation.

THX Approved: ISA 450 ISA 750

MX SERIES

Low profile professional power amplifiers, the cost-effective MX Series combines high performance, sophisticated operation, and reliability.

THX Approved: MX 1500a MX 3000a
