

Notebook Stand - FlexTop vsn2

Together with an external keyboard, the FlexTop notebook stand is an ideal way to create an ergonomic mobile working station. With the FlexTop, you can easily adjust the monitor to the proper height and viewing distance to avoid the common but unnecessary eyestrain and neck discomfort.

Integration with your notebook to one system..

With the help of three connection points you can easily attach the FlexTop notebook stand to your notebook. By doing so it is no longer a separate accessory but becomes an integrated part of the notebook. If you don't want your notebook stand attached, simply mount your notebook with the two built-in notebook supports.

Once the notebook is connected to the FlexTop notebook stand, adjustments are simple - move the lever forward or backward to adjust the display height and viewing distance.

Benefits:

- Good adjustable range in height-settings
- Can be attached to the notebook
- Light weight
- User-friendly design

Specification:

Height settings	355-515 mm (Measurement to top of a 15" monitor screen)
Settings	7
