

Instructions for De-Scaling your Keurig **B100** Home Brewer with Vinegar

a. PREPARE

Step 1: Make sure you have at least 64 ounces of white vinegar on hand. You will also need an empty sink and a ceramic mug (do not use a paper cup.)

Step 2: Turn power "OFF", unplug Brewer and drain the Brewer following the instructions below.

DRAINING YOUR KEURIG BREWER

CAUTION: Water is hot, please turn off brewer, unplug it and allow water to cool before draining.

Step 1: Make sure Brewer is unplugged! Carry Brewer to sink making sure that it stays upright.

Step 2: Remove the Drain Cap on rear of Brewer and, if present, remove Charcoal Filter from the Water Fill Area.

Step 3: Rest the rear of the Brewer flat on the counter with the drain positioned over the sink and allow Brewer to drain. For best results, do not tilt beyond a 90° angle.

Step 4: Once water is drained, **replace the Drain Cap.**

b. FILL AND CLEAN

Step 1: Plug Brewer in and turn power "ON".

Step 2: Pour approximately 64 oz of the vinegar into the Brewer until 4 beeps signal the tank is full.

Step 3: Wait about 6 – 8 minutes for the vinegar to heat up and the green "READY" light to go on.

Step 4: Place a ceramic mug in the Drip Tray and run a brew cycle. **DO NOT USE A K-CUP...**just press the Brew button.

Step 5: Repeat the brew process 4 or 5 times pouring the contents of the mug **back into the Brewer** after each cycle.

Step 6: Now let the Brewer stand for 4 hours while still on.

Step 7: Place a ceramic mug on the Drip Tray and run 4 brew cycles, pouring the contents of the mug **into the sink** after each cycle.

Step 8: Turn the brewer off, let the remaining vinegar cool, and drain the brewer as instructed above.

CAUTION: Vinegar may still be hot. Remember to replace the Drain Cap.

c. RINSE

Step 1: Fill the brewer with hot tap water.

Step 2: Power up brewer.

Step 3: Wait about 6-8 minutes for the water to heat up and the Green "Ready" Light to go on.

Step 4: Place a ceramic mug on the Drip Tray and run a brew cycle.

Step 5: Repeat brew process 4 times for a total of 5 cycles.

Step 6: Drain the brewer as instructed above.

CAUTION: Water may be hot. Remember to replace the Drain Cap.

Step 7: You may need to rinse again to eliminate any residual taste.
