Portégé M400-3G
The high-speed 3G Tablet PC that does it all.

The powerful all-in-one **Portégé M400-3G Tablet PC** is now available with embedded 3G UMTS HSDPA technology. Offering the ultimate in mobile computing on the move the 3G M400 provides continuous connectivity to the internet and email at broadband speeds of up to 1.8mbps. We have teamed up with T-Mobile® to offer the M400 ready to use with 3G straight from the box with a 30 day free trial of their web'n'walk service

Windows Vista™

Toshiba notebooks combined with Windows Vista, the next-generation operating, gives you the best in innovative mobile computing.

Impressive performance and versatility

- Featuring the Intel® Core™ 2 Duo Processor with enhanced multitasking and 32/64-bit future-proof technology

- Convert this ultra-portable 12.1" SXGA+ TFT notebook to a Tablet PC with a simple twist of the rotating display

- Take notes, annotate documents and sketch ideas in an intuitive way that mimics working with a paper notebook

- Slim SelectBay modularity supports a DVD Super-Multi drive and/or second HDD with RAID-1 support for better data security on the go

- Easy docking with the new optional Toshiba Express Port Replicator

Seamless connectivity embedded

- Enter the world of high-speed 3G WWAN (Wireless Wide Area Network) for seamless access to all the online data you need from anywhere, i.e. e-mail, Internet, real-time corporate data and video/audio streaming

- Embeds a broadband 3G UMTS/HSDPA module for download rates of up to 1.8 Mbps

- Equipped with a T-Mobile UMTS/HSDPA SIM card

- The Portege M400 is ready to use with 3G straight out of the box. Try the T-Mobile HSDPA 1.8Mbps for free (30 day free trial period)

Carefree mobile computing with Toshiba EasyGuard

- Advanced Shock Protection Design to protect critical components and safeguard data, including HDD Protection with 3-axis motion monitoring

- Fingerprint Reader for fast, single-touch fingerprint password authentication for all system passwords

- Anti-theft Protection Timer enables the user to set a timed BIOS password for enhanced data security in the event of notebook theft

CPU performance may vary from specifications under certain conditions such as the use of battery instead of AC power, certain external peripherals, certain multimedia applications or network connections, complex modelling software and in areas with low air pressure at high altitude (1,000 metres above sea level) and/or certain temperatures. CPU performance may also vary from specifications due to design configuration. Under some conditions, your computer may automatically shut down as a normal protective measure. To avoid risk of lost data, please make periodic back-up copies. For optimum performance, use your computer only under recommended conditions. Please read detailed restrictions in the product resource guide, visit the Toshiba website: computers.toshiba-europe.com and/or contact Toshiba Technical Support. For PC's configured with 4 GB of system memory, the full system memory space for computing activities will be considerably less and will vary by model and system configuration. One GB means one billion bytes. Battery life may vary depending on applications, power management settings and features utilised. Recharge time varies depending on usage. Battery may not charge while computer is consuming full power. After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see your accessories information that shipped with your computer or visit the Toshiba websites at computers.toshiba.nl or computers.toshiba.be. Small bright dots may appear on your TFT display when you turn on your PC. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology. Any small bright dots that may appear on your display are an intrinsic characteristic of the TFT manufacturing technology. Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries. Windows, Windows Vista and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.
