WORKiO™

Before operating this machine, please read this manual completely
and keep this manual for future reference.
(Illustration shows optional accessories that may not be installed on your machine.)
English

Operating Instructions

The following Operating Instruction manuals are included with this machine. Please refer to the appropriate manual and keep all manuals for future reference. If you lose the manual, contact the authorized Panasonic dealer.
Accessories

Operating Instructions (For Setting Up)
This manual contains essential information for setting up the machine.
Operating Instructions (For Basic Operations)
This manual contains essential information for proper operation of the machine.
It describes basic Copy, Print, Facsimile/Internet Fax, Scan/Email, and other functions.
For a more detailed explanation of each function, please refer to the Operating Instruction manuals included on two CD-ROM as illustrated below.

Operating Instructions CD
Contains manuals with detailed information for Copy, Facsimile/Internet Fax, Scan/Email Functions, Function Parameters and User Authentication.

Document Management System CD
Contains the PDMS Application Software, and manuals with detailed information for the Print function, and PDMS Application software.

Operating Instructions CD

Copy Function
Describes how to make a Color Copy with creative features.

Facsimile and Internet Fax Function
(When the optional G3 Fax Board/ Internet Fax Module is installed.)
Describes how to send/receive a Facsimile/ Internet Fax, or describes the course of action to take when a trouble message appears, etc.

Scan and Email Function
(When the optional Network Scanner/ Email Module, Hard Disk Drive, Main Memory and Image Memory are installed.)
Describes how to scan, send an Email.

Function Parameters
Describes how to change the default settings of each function using the Control Panel of the machine.

User Authentication
Describes how to enable and use the user authentication function.

Document Management System CD

Print Function
Describes how to print with color, change default printer settings, or describes the course of action to take when a problem message appears, etc.

Application Software
Describes how to use the application software.
Ex: Web Device Monitor, Panafax Desktop, Document Manager/ Viewer, Client Device Monitor, Network Config/Add Editor, Network Setup Tool, Embedded Web Launcher

Conventions

Icons

The following icons are used in this manual.

Icon	Description
ATTENTION	Indicated important information that must be read in detail.
NOTE	Indicates reference Information.

Notation

The following notations are used in this manual.

Notation	Description
For Keys and Buttons	Hard buttons on the Control Panel are depicted as ******** key, soft buttons on the Touch Panel are depicted as "**xxx**". **Ex**: Press the **Start** key and select "**More Menus**".

Chapter 2 Scan/Email Operations

Chapter 3 Scanner Settings

Chapter 4 Adding to the Address Book
Chapter 5 Appendix

Basic Operation Procedure

This section describes the workflow of Scan/Email operations. For a detailed description of each setup item involved, refer to the relevant suggested section.

> NOTE
> ● Optional Hard Disk Drive, Main Memory and Image Memory are required in this Scanner Function.

1 Place the original(s).

Face Up. Up to 70 sheets (20 lb).
Face Down Align with top left corner.

● When using the Scan/Email function, the created images are rotated by 90 degrees. Place the originals with their top edges aligned with the left side of the scanner to create upright scan data.

Original   Scan Data
● Refer to **Placing Originals (Copy)** in the Operating Instructions (For Basic Operations) of provided booklet.

2 Press the **Scan/Email** key.
3 Select "**Basic Menu**", and then set the desired scanning mode if necessary.

● For more detailed instructions, refer to the **Scanner Settings** (see pages 28-39).

4 Select the location or destination.

❑ To Save

SD memory Card or PCMCIA/PC Card	Select "**SD Card/Hard Drive**", and then select "**SD Card**" or "**PC Card**".
Internal Hard Disk Drive	Select "**SD Card/Hard Drive**", and then select "**Image Box**".

❑ To Transmit

To the Computer	Select desired destination from the address book
Email	

Refer to **Scan to Email** (see page 18).

5 Press the Start key.
● When scanning from the Platen Glass, place the next original, and then follow the instructions described on the touch panel display.

Transferring the scanned image(s) to the SD Memory Card or PCMCIA/PC Card, PC or Email.
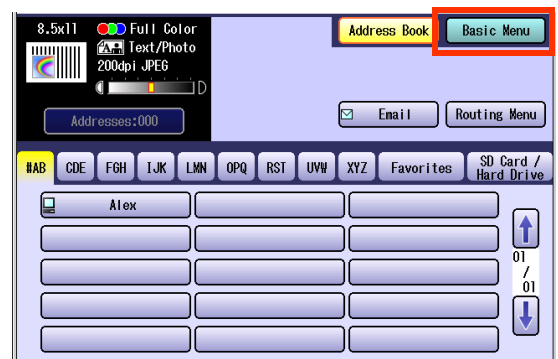

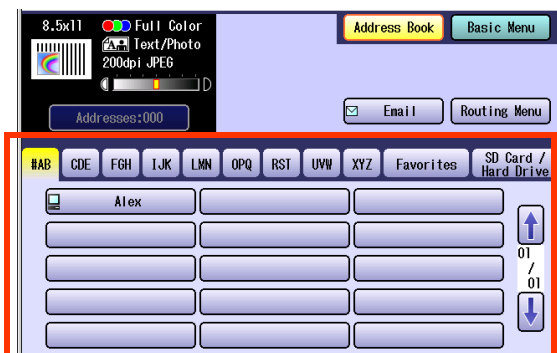

❑ To the SD Memory Card or PCMCIA/PC Card

● Refer to **Scan to the SD Memory Card** (see page 10).

● Refer to the **Scan to the PCMCIA/PC Card** (see page 12).

❑ To the Internal Hard Disk Drive

● Refer to **Scan to the Internal Hard Disk Drive** (see page 14).

❑ To the Computer

A reception notice appears on the destination PC's display.

● Refer to the **Scan to the Computer** (see page 16).

❑ To Email

● Refer to the **Scan to Email** (see page 18).

NOTE

● When canceling the operation, press the **Stop** key on the Control Panel, and then select "**Yes**" on the Touch Panel Display.
Sending an Email

• There are two ways of sending an Email.

  • Sending an Email using the Scan/Email Function : Available when Scan/Email Option is installed on your device

  • Sending an Email using the Internet Fax Function :Available when Internet Fax Option is installed on your device

Scan/Email Function

Color Original
Sending an Email using the Scan/Email Function

Original
Sending an Email using the Internet Fax Function

Select "**Email**".

Press the **Fax** key.

E-mail

Set the type of File to attach (Refer to the **Chapter 3: Setting a File Type and a Filename** in the Operating Instructions for Fax Functions)

• TIFF
• PDF
Internet Fax Device

Monochrome
NOTE
● Each Email function can be set in the **Fax/Email Settings**. Refer to the **Chapter 4 Fax/Email Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

PDF file can be printed when the optional Printer Controller Module (for Adobe® PostScript® 3™) is installed on your device.

Memo

Scan to the SD Memory Card

The scanned image will be directly transferred to the SD Memory Card.
SD Memory Card

ATTENTION

● Be sure to use only Genuine SD Memory Card. (Up to 1 GB)

NOTE

● The SD logo is a trademark.

---

1 Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**" to configure the required settings, and then select "**OK**".
Refer to **Scanner Settings** (see pages 28-39).

4 Select "**Address Book**".

5 Select "**SD Card/Hard Drive**".
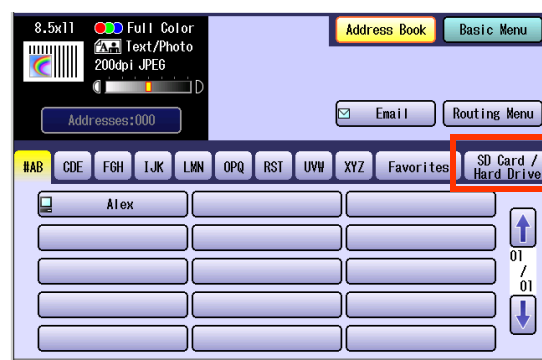

6 Insert the SD Memory Card.

① Push the Slot Cover to open it.
② Insert the SD Memory Card as illustrated.
(Label side up).

7 Select "**SD Card**".

- Only one storage device can be selected at a time. When the "**SD Card**" is selected as a storage device, the scanned image cannot be saved to the PCMCIA/PC Card or Hard Disk Drive at the same time.

8 Press the **Start** key.

Scanned image is saved in the following directory of the SD Memory Card.

- Directory:
  \PRIVATE\MEIGROUP\PCC\DI\IMAGE

- The data saved on the SD Memory Card can be printed by this machine or another DP-C262 or DP-C322. For more details, refer to **Printing from SD Memory Card/PC** in the Operating Instructions (for Basic Operations). When printing PDF data or high-compression PDF data, install and set up the Memory Card Print Utility. For details, refer to the Help of the Memory Cart Print Utility on the Document Management System CD-ROM.

9 Push the SD Memory Card, and then remove it.
- Do not remove the SD Memory Card while the Access Indicator is flashing.
10 Close the Slot Cover.

NOTE
- When canceling the operation, press the **Stop** key on the Control Panel, and then select "**Yes**" on the Touch Panel Display.
Scan to the PCMCIA/PC Card

The scanned image will be directly transferred to the memory card into the PCMCIA/PC Card Adapter.
PC Card Adapter

ATTENTION

● Be sure to use only PCMCIA/PC Card Adapter (Type II) for Memory Card.

● For types of memory cards that can be used with the PC card adapter, refer to the document that came with the PC Card Adapter.

1 Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**" to configure the required settings, and then select "**OK**".
Refer to **Scanner Settings** (see pages 28-39).

4 Select "**Address Book**".
5 Select "**SD Card/Hard Drive**".

6 Insert a PCMCIA/PC Card Adapter with a memory card.

① Push on the slot cover to open it.
② Insert a PCMCIA/PC card into the PCMCIA/PC Card slot as illustrated. (Label side up)
7 Select "**PC Card**".

● Only one storage device can be selected at a time. When the "**PC Card**" is selected as a storage device, the scanned image cannot be saved to the SD Memory Card or Hard Disk Drive at the same time.

8 Press the **Start** key.

The scanned image is saved into the PCMCIA/PC Card.

The scanned data is saved on the following directory of the memory card.

● Directory:
\PRIVATE\MEIGROUP\PCC\DI\IMAGE

● The data saved on the memory card in the PC Card Adapter can be printed by this machine or another DP-C262 or DP-C322. For more details, refer to **Printing from SD Memory Card/PC** in the Operating Instructions (for Basic Operations). When printing PDF data or high-compression PDF data, install and set up the Memory Card Print Utility. For details, refer to the Help of the Memory Cart Print Utility on the Document Management System CD-ROM.

9 Push the Eject button on the right side of PCMCIA/PC Card slot, and then remove the PCMCIA/PC Card Adapter.

Eject button
● Do not remove the PCMCIA/PC Card while the Access Indicator is flashing.
10 Close the Slot Cover.

NOTE

● When canceling the operation, press the **Stop** key on the Control Panel, and then select "**Yes**" on the Touch Panel Display.
Scan to the Internal Hard Disk Drive

The scanned image can be saved to the Internal Hard Disk Drive, and then saved data can be retrieved from computer via a network.

Hard Disk Drive
NOTE
● The hard disk is provided with 12 image boxes. For instructions on how to change the image box name, refer to **Editing Image Box Name** (see page 44).
● All data saved on the hard disk can be deleted with a scanner function. For more details, refer to Chapter 5 "**Scanner Settings**" in the Operating Instructions (for Function Parameters).

1 Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**" to configure the required settings, and then select "**OK**". Refer to **Scanner Settings** (see pages 28-39).
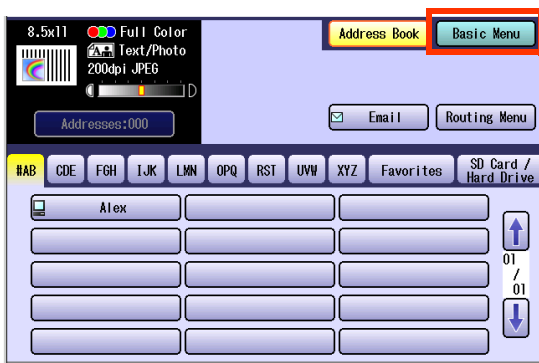

4 Select "**Address Book**".

5 Select "**SD Card/Hard Drive**".

6 Select an Image Box in the Hard Disk Drive.

● Only one Image Box can be selected at a time.
● When the Hard Disk Drive is selected to be the storage destination, the scanned image cannot be saved to the SD Memory Card or PCMCIA/PC Card at the same time.

7 Press the **Start** key.

When the document scanning completes, the scanned data is saved on the hard disk.
● For instructions on how to download the saved data, refer to **Retrieve Scanned Image from Hard Disk Drive** (see page 15).

14

Retrieve Scanned Image from Hard Disk Drive

1 Start a Web Browser, such as the Internet Explorer, on your computer.

2 Enter the IP Address that has been set on this machine.

Ex: http://10.74.232.130

● Machine Status will be displayed on the Web browser.
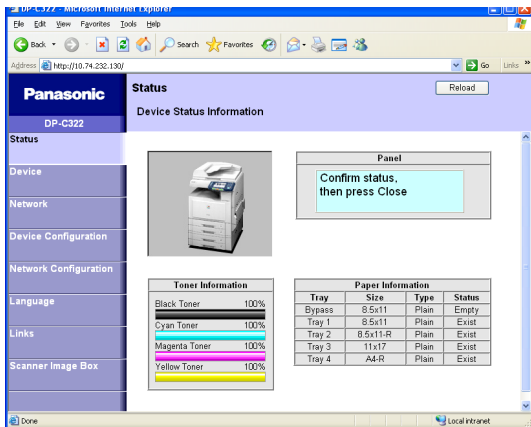

3 Select an image box from its scanner image box list, and then download the image data from the image box onto the computer.

① Click "Scanner Image Box"
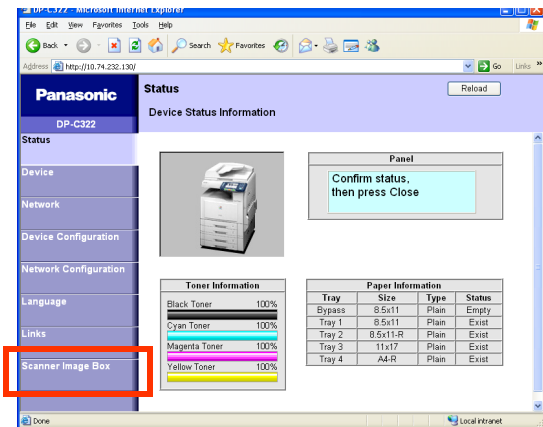

② Select an Image Box where image data is saved.
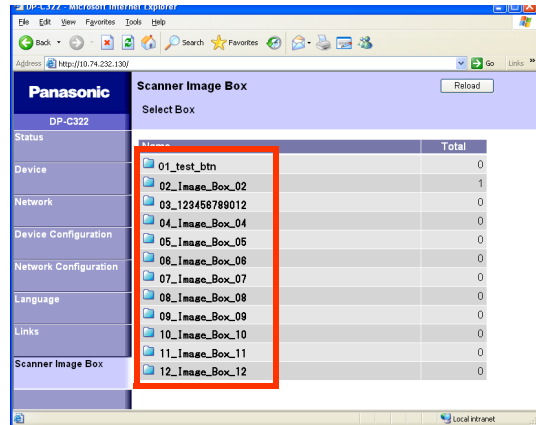

③ Select a file where image data is saved.

● Open it with a left-click, and save it with a right-click of your PC mouse.

15
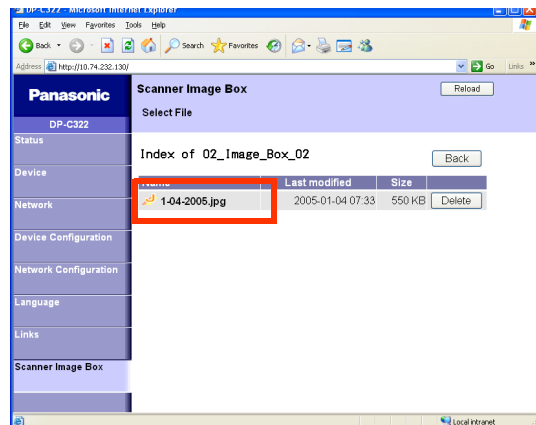

Scan to the Computer

The scanned image will be transferred to desired computer.
> **NOTE**
>
> ● Before transferring the scanned image to your PC, it is necessary first to install the Panasonic Document Management System software, and then setup the scanner configuration on your PC.
> Refer to the Operating Instructions (For Setting Up) of provided booklet.
>
> ● Computers (with the following settings) on the network are automatically displayed in the Address Book. (They are not displayed in "Favorites" on the Search tab.)
>
>   •The scanner settings are made with the Panasonic Communication Utility.
>
>   •The Panasonic Communication Utility has been activated.
>   (The Panasonic Communication Utility is automatically activated when Windows starts)
>
> ● The Panasonic Communication Utility can display up to 120 computers in the Address Book.
>
> ● The computer is automatically deleted from the Address Book under the the following cases:
>
>   •When the computer is logged off from the network
>
>   •When the Panasonic Communication Utility is terminated

---

1 Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**" to configure the required settings, and then select "**OK**".
Refer to **Scanner Settings** (see pages 28-39).
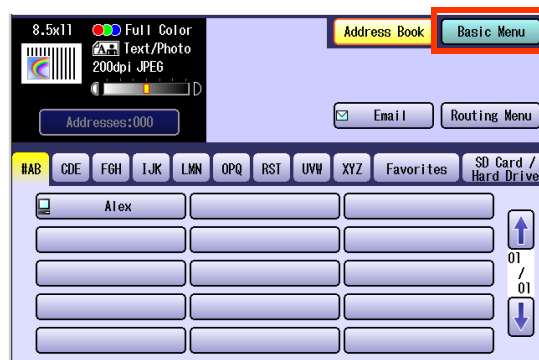

4 Select "**Address Book**".

5 Select an alphabet tab.

6 Select a computer.

● Only one computer can be selected at a time.

❑ Scrolling Pages

To scroll to the previous page

Current page

Total number of pages

To scroll to the next page
7 Press the **Start** key.

When the scanned image is transferred to the PC, the scanner reception notice appears on the destination PC's display.

● When scanning from the Platen Glass, place the next original, and then follow the instructions described on the touch panel display.

8 Click "**Display**".
The Document Manager software starts.

● For more details, refer to the Operating Instructions (Panasonic Document Management System) on the provided CD-ROM.

17

Scan to Email

The scanned image can be emailed to network connected computers.

● JPEG (jpg) file is not available for multiple pages.
● JPEG (jpg) file is only available in Color/Gray Scale mode.
● TIFF file is only available in Monochrome mode.

When sending a multi-page color document:

<To a Single Address>

● When attaching a color document in JPEG/PDF (except Compressed PDF) file, the machine sends an individual Email for each scanned page. If you scan more than one page, the same number of Emails will be sent.
● To send a multi-page document as a single Email attachment, change the Fax Parameter "**183 Color Attachment**" to "**Multi**".
For more details, refer to **Fax/Email Settings** in the Operating Instructions (For Function Parameters).

<To Multiple Addresses>

● By default, the machine will send an Email with a multi-page (PDF) file, or multi-files (JPEG) color document.

(NOTE)
● A multi-page color scanned JPEG/PDF document tends to become very large in size.
If the attachment exceeds the maximum allowed data size for your network environment, send each page at a time.
---

1 Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Email**".

---
4 Select an alphabet tab.

- When inputting the Email Address manually, select "**Keyboard**", and then input an address. Refer to the **Add an Email Address to the Address Book** (see page 24).
- When searching for address(es) via LDAP server, refer to the Email Addressing from LDAP server.
  Refer to the **Email Addressing from LDAP Server** (see page 22).

5 Select an email address.

❑ Scrolling through pages

To scroll to the previous page

Current page

Total number of pages

To scroll to the next page
6 Select "**Cc**", "**Bcc**" and/or "**From**" address field and follow the same procedures as in steps 4 and 5 if necessary.

7 Input the subject if necessary.

① Select "**Subject**".

② Input a subject, and then select "**OK**".

- Up to 40 characters.

8 Select "**Close**".

<Continue to the Next Page>

19

9 To confirm the selected or inputted Email Address.

① Select "**Addresses: ###**".
(###: Number of selected email addresses)

② Select "**OK**".
10 Select "**Basic Menu**" to configure the required settings, and then select "**OK**".
Refer to **Scanner Settings** (see pages 28 to 39).
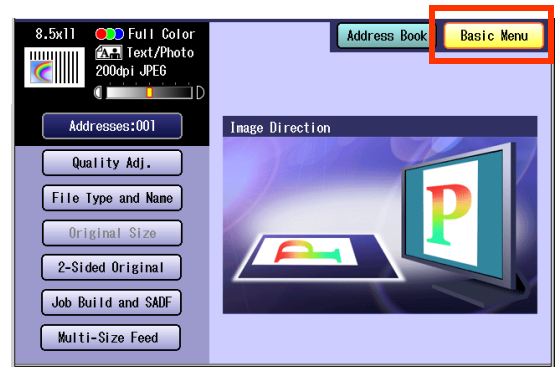

**11** Press the **Start** key.

Transferring the scanned image(s) to Email.

● When scanned image transfer fails, a transfer error message is printed out.

Memo

Email Addressing from LDAP Server

You can search an Email Address through the server (LDAP Server) for computer names beginning with a specified character(s).

⎯ NOTE ⎯
● This function is available where the LDAP Server is configured.

1   Place the original(s).

● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2   Press the **Scan/Email** key.

3   Select "**Email**".
4   Select "**Search**".

5   Input the first few characters of the computer name.

6   Select "**Global**".

7   Select "**Search**".

● Select "**Local**" to cancel the search for computers and exit to the previous screen.

● Select the desired computer and select "**Add to Local**" to add it to the address book. Refer to **Add an Email Address to the Address Book** (see page 24).

● For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

The result of the Email address search is shown on the display.

8 Select a compluter, and then select "**OK**".

① ②

● Only one station can be selected at a time.

9 Select "**OK**".

10 To select "**Cc**", "**Bcc**" and/or "**From**", select the corresponding button, and then perform steps 4 to 9.

11 Input the Subject.

① Select "**Subject**".

② Input a subject.
① ②

● Up to 40 characters.

● For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

12 Select "**Close**".

● For the following steps, refer to steps 9 to 11 in **Scan to Email** (see page 18).

23

Add an Email Address to the Address Book

Email addresses that have been entered from the Scan/Email basic screen can be added to the address book.

1 Press the **Scan/Email** key.

2 Select "**Email**".

3 Select "**Keyboard**".

4 Input an email address.

Ex: pcc@panasonic.com

● Up to 60 characters.

● For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

5 Select "**Add to Local**".

6 Select "**Edit**".

7 Input a station name and a key name, and then select "**OK**" to edit the station name and key name selected in step 5.

● Up to 15 characters.

● For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

8 Select "**OK**" to register the email address as a station.

9 Select "**OK**".

● For the following steps, refer to steps 6 to 11 in **Scan to Email** (see page 18).

Receiving an Email

This function is only available when the optional Internet Fax Module (DA-NF320) is installed.

If the machine connects to a network as a POP Client, it can receive Email either automatically or manually. The Email reception method from a POP Server varies depending on the POP settings programmed in Function Parameters.

Configure to Receive Email

Program the following parameters in Function Parameters (Fax/Email Settings> Fax Parameters) to receive Email:

Item Name	Setting
"**146 POP Timer**"	Set the time interval for checking the Email on POP Server. • Set an interval between 0 and 60 minutes. • An interval setting of 0 minutes would not retrieve Email automatically.
"**147 Auto POP Receive**"	Set whether to send queries to the POP Server periodically. • If there is Email, it is retrieved and printed. • If this parameter is set to "**Invalid**", only the number of the incoming Email messages on the POP Server appears on the display.
"**148 Del POP Receive Mail**"	Set whether to delete the Email from the server after it has been retrieved.
"**149 Del POP Error Mail**"	Set whether to delete Email from the server when the attached file is in a format that cannot be printed.

> NOTE

● For instructions on how to configure the POP Server, refer to **Fax/Email Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

● With POP manual reception preprogrammed on a program key, POP Email can be retrieved by a user name other than the one preprogrammed as local station information.

Receiving Email Automatically

With "**147 Auto POP Receive**" set to "**Valid**" and POP acquisition interval set between 1 and 60 minutes in Function Parameters (Fax/Email Settings> Fax Parameters), queries are transmitted to the POP Server periodically to check for new mail.

If there is Email on the POP Server when a query is transmitted, it is retrieved and printed automatically.

Receiving Email Manually

With "**147 Auto POP Receive**" set to "**Invalid**" in Function Parameters (Fax/Email Settings> Fax Parameters), Email is received manually.

NOTE

● With POP acquisition interval set between 1 and 60 minutes, queries are transmitted to the POP Server periodically to check for new mail and the number of the incoming Email messages on the server appears on the display.

1 Press the **Fax** key.

2 Check for incoming mail(s).
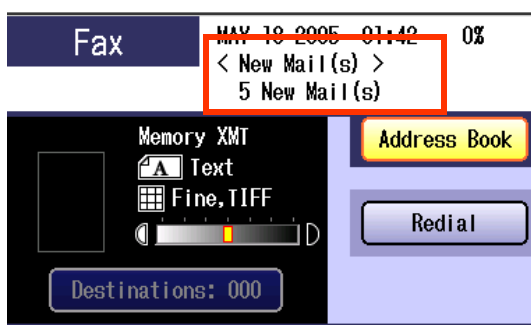

3 Select "**Basic Menu**".
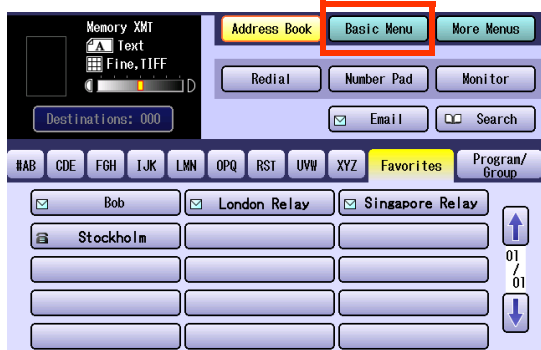

4 Select "**Get Email**".
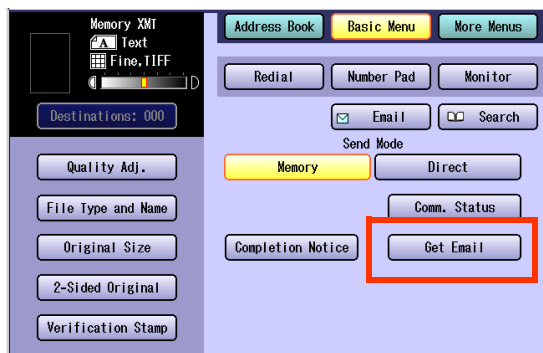

The retrieved Email is printed.

Setting the Scanning Quality

Documents, whether in Full Color or Monochrome, are scanned in three-colors.

1 Select "**Basic Menu**".

2 Set the desired scanning modes.

Quality Adj. (see page 28)

File Type and Name (see page 36)
 (Continue from step 3)

Original Size:

> From Platen Glass only.
> When the original size is not correctly detected, select "**Original Size**", and then select original size and touch "**OK**" on the display.

2-Sided Original (see page 38)

Job Build and SADF (see page 39)

Multi-Size Feed:

> When scanning mixed size originals, select "**Multi-Size Feed**".

> **Ex**: 8.5 x 11" and 11 x 17" size originals

Quality Adjustment

■ Color Setting

Full Color Mode
Color Original → Three-colors (Red, Green and Blue)

Grayscale Mode
Color Original → Grayscale (Halftone)

Black Mode
Color Original → Monochrome (Bi-level)

Monochrome Original → Monochrome (Bi-level)

1 Select the Color Mode, and then "**OK**".
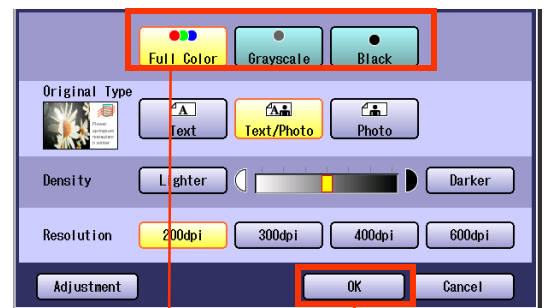

Setting Original Type and Scanning Density

■ Selecting Original Type
Text   Text/Photo   Photo

■ Adjusting Scanning Density
Lighter   Darker

> NOTE
>
> ● The standard setting of "**Original Type**" and "**Density**" can be changed, refer to **Scanner Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

Selecting Original Type

1   Select the original type, and then select "**OK**".
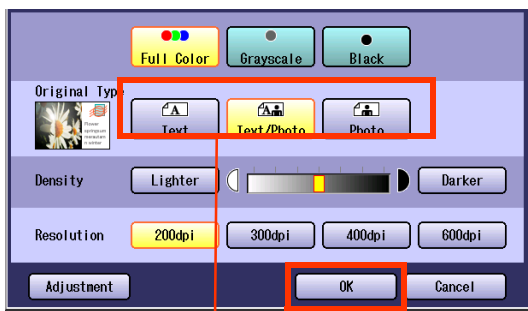

Text	Mainly a Text original.
Text/ Photo	Text and Photo combined original.
Photo	Mainly a Photo original.

Adjusting Scanning Density

1   Adjust the scanning density with "**Lighter**" or "**Darker**", and then select "**OK**".
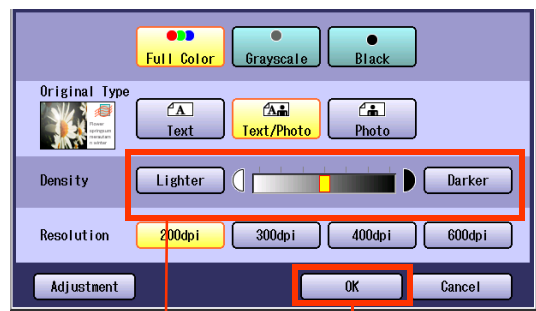

Lighter	For dark image originals.
Darker	For light image originals.

29

Scanning Resolution

You can set the appropriate resolution according to your originals.

NOTE

● The standard setting of "**Resolution**" can be changed, refer to **Scanner Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

● Resolution settings are reset to their factory defaults when:
  -The machine is turned Off.
  -The **Reset** key is pressed.

---

1 Select a desired resolution, and then select "**OK**".
● Most originals such as photos can be scanned without problems using the default resolution (200 dpi) and picture quality level (Full Color).
To scan smaller characters (8-point or smaller) clearly, increase the resolution or select Adjustment, and then select High Quality for Compression (Full Color).
Since the file size increases with higher resolutions, the transfer time becomes longer depending on the specifications of the network and computer you are using.

Example: The time required for transferring an A4 size color photo scanned at 600 dpi is three times as long as that for the same photo scanned at 200 dpi.

Memo

Advanced Color Quality Settings

The following picture qualities can be adjusted:

- Compression (Full Color)
- Compression (Grayscale)
- Compression (Black)
- Background Removal
- Contrast

> **NOTE**
>
> ● The standard setting of "**Compression (Full Color)**", "**Compression (Grayscale)**", "**Compression (Black)**", "**Background Removal**" and "**Contrast**" can be changed, refer to **Scanner Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.
>
> ● The picture quality settings are reset to their default settings when:
> -The machine is turned Off.
> -The **Reset** key is pressed.

Compression (Full Color)

Select picture quality in Full Color mode.

1 Select "**Adjustment**".
2 Select "**Compression (Full Color)**".
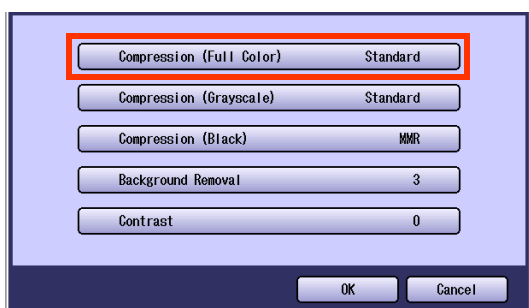

3 Select a picture quality, and then select "**OK**".
High Speed	Low picture quality. Transferring data at the higher speed.
Standard	Standard picture quality.
High Quality	High picture quality. Transferring data at the slower speed.

4 Select "**OK**".

Compression (Full Color)	Standard
Compression (Grayscale)	Standard
Compression (Black)	MMR
Background Removal	3
Contrast	0

OK   Cancel

Compression (Grayscale)

Selects picture quality, and then compression mode in Grayscale mode.

1 Select "**Adjustment**". (See page 32)

2 Select "**Compression (Grayscale)**".
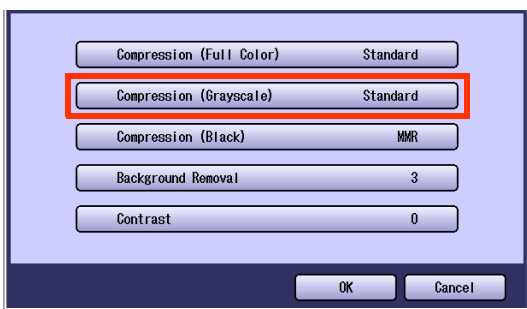

3 Select an image quality, and then select "**OK**".
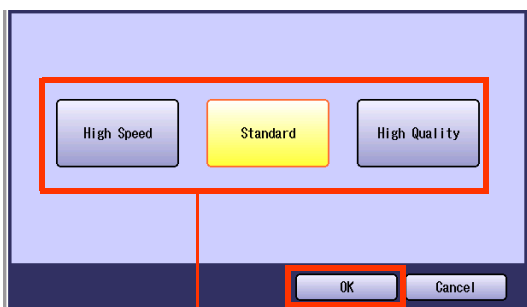

High Speed	Low picture quality. Transferring data at the higher speed.
Standard	Standard picture quality.
High Quality	High picture quality. Transferring data at the slower speed.

4 Select "**OK**".

Compression (Black)

Documents can be scanned with a Monochrome setting.

1 Select "**Adjustment**". (See page 32)

2 Select "**Compression (Black)**".
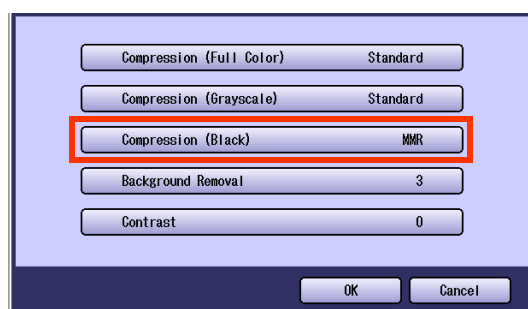

3 Select a compression, and then select "**OK**".
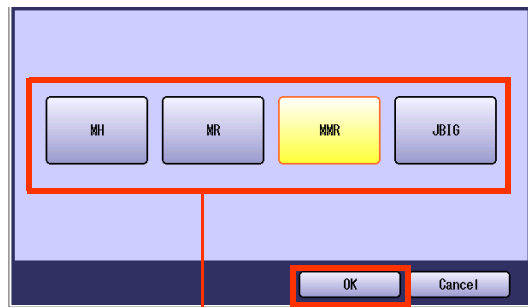

MH	Modified Huffman format: Lowest compression
MR	Modified Read format: Higher compression than MH
MMR	Modified MR format: Higher compression than MR
JBIG	Joint Bi-level Image format: Higher compression than MMR

4 Select "**OK**".

Background Removal

Color documents can be scanned in monochrome with their background removed. This feature is convenient for scanning newspapers, background-colored documents or the like.
NOTE

When the Photo original is selected in the Original Type (see page 29), this Background Removal setting is not available.

1   Select "**Adjustment**". (See page 32)

2   Select "**Background Removal**".
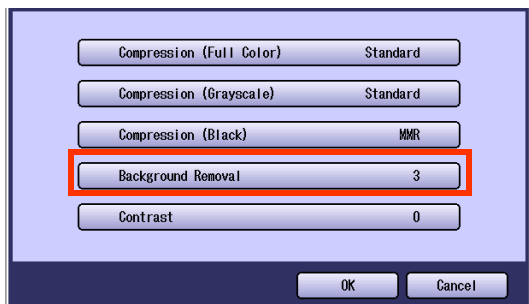

3   Adjust the Background Removal level with "**-**" and "**+**", and then select "**OK**".
① (6 steps) ②

+	Background-color is darker
-	Background-color is lighter

4   Select "**OK**".

Contrast

The scanning contrast can be adjusted to match the original.
Higher

Lower

1   Select "**Adjustment**". (See page 32)

2   Select "**Contrast**".
3   Adjust the contrast level "**Lower**" or "**Higher**", and then select "**OK**".
① ②

Lower	For darker original
Higher	For lighter original

4   Select "**OK**".

35

Setting the File Type and/or File Name

Documents can be scanned with a file type specified. While files are named after their date by default, documents may also be scanned with a filename specified.

NOTE
● The standard setting of "**File Type and Name**" can be changed, refer to **Scanner Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

● The "**File Type and Name**" setting is reset to its standard setting when:
-The machine is turned Off.
-The **Reset** key is pressed.

1 Select "**Basic Menu**".
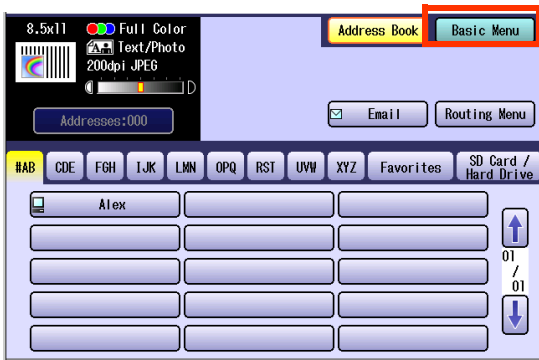

2 Select "**File Type and Name**".

3 Select a file type.
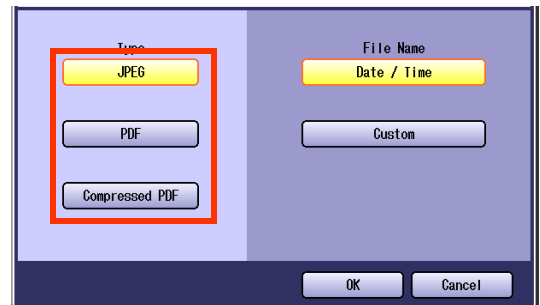

JPEG	For Color Photo/Grayscale originals
PDF	For Photo and Text combined originals
Compressed PDF	An Acrobat PDF file format which is compressed at a higher compression ratio.

When the "**Black**" is selected with the "**Quality Adj.**", "**PDF**" or "**TIFF**" is selected.

TIFF	For Monochrome originals
PDF	For Photo and Text combined originals

● When a Full Color or Grayscale type original is selected in the Color Mode, only JPEG, PDF or Compressed PDF file type can be selected.

● When a Black type original is selected in the Color Mode, TIFF or PDF file type is only selected.

● When the Compressed PDF is selected, the selected Resolution will be automatically adjusted to the 300dpi. "**Original Type**", and "**Background Removal**" cannot be set.

● When the Compressed PDF is selected, the selected **Compression** (Full Color) or (Grayscale) will be automatically adjusted to "**High Speed**" (see page 32).

4 Select a File Name type.
To enter File Name

① Select "**Custom**".
- ● When the Date/Time is selected for the File Name, the file name will automatically default to Date/Time format.

② Enter a filename by using the onscreen keyboard, and then select "**OK**".

- ● Up to 20 characters.

- ● When scanning to the SD Memory Card or PCMCIA/PC Card, display limitation is up to 8 characters on the screen in lower case letters.

- ● For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

37

Scanning 2-Sided Originals

2-Sided Originals can be scanned and the binding position is selectable.

NOTE

The standard setting of 2-Sided/Original can be changed, refer to **Scanner Settings** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

1 Place the Original(s) on the ADF.
● For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**".

4 Select "**2-Sided Original**".

5 Select a bind position, and then select "**OK**".

Long Edge	
Short Edge	
6 Select "**Address Book**", and then select a destination.

7 Press the **Start** key.

NOTE

● When canceling the operation, press the **Stop** key on the Control Panel, and then select "**Yes**" on the Touch Panel Display.
When Scanning the Special Originals (Thin paper, etc.) from ADF

Special originals (like thin paper, etc.) can be fed from the ADF and scanned continuously using the Job Build and SADF Mode.

1 Place one original. (Minimum 50 g/m²)
- For instructions on how to place originals, refer to **Basic Operation Procedure** (see page 6). For more details, refer to **Placing Originals (Copy)** in the Operating Instructions (for Basic Operations).

2 Press the **Scan/Email** key.

3 Select "**Basic Menu**".

4 Select "**Job Build and SADF**".

5 Select "**Address Book**", and then select a destination.

- For more details, refer to **Basic Operation Procedure** (see page 6).

6 Press the **Start** key.

- Place the next original within 5 sec. of last scanned original.
- If "Another Original? Yes or No" message is displayed, select "**No**" if you do not have any more documents to scan.

NOTE

- When canceling the operation, press the **Stop** key on the Control Panel, and then select "**Yes**" on the Touch Panel Display.
Editing the Address Book

The IP and Email Addresses in the address book can be edited or deleted.

Edit an Email Address

The Email address can be edited.

1 Press the **Function** key.

2 Select "**Scanner Settings**".

Editing Image Box Name

The image box name can be changed.

> NOTE
> - For instructions on how to save Scanned image to an image box, refer to **Scan to the Internal Hard Disk Drive** (see page 14).
> - When the image data is registered into the image box, image box name can not be changed.

---

1 Press the **Function** key.

2 Select "**Scanner Settings**".
3 Select "**20-29**" , and then scroll to the next page using ⬇.
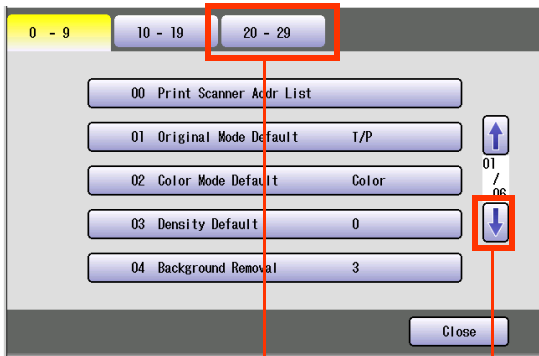

4 Select "**25 Edit Image Box Name**".
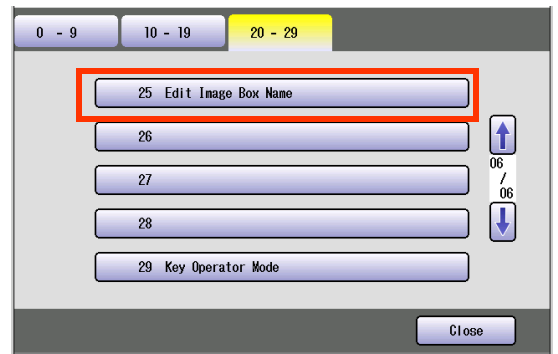

5 Select the desired image box name.
6 Input the new image box name, and then select "**OK**".
- Up to 15 characters.
- For instructions on how to enter characters, refer to **Using the Keyboard** in the Operating Instructions (For Function Parameters) on the provided CD-ROM.

7 Input a button name, and then select "**OK**".
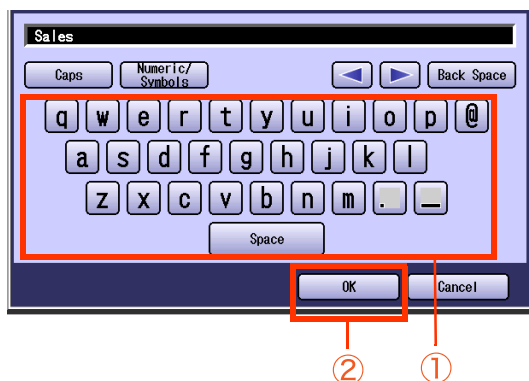

● Up to 12 characters.

8 Select "**OK**" or "**Cancel**".

9 Select "**Close**".
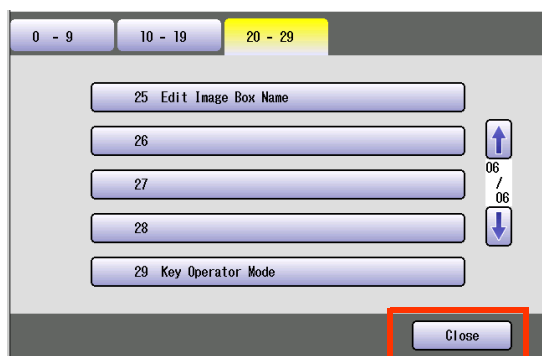

10 Press the **Reset** key.

Glossary

| Term	Meaning
10Base-T/ 100Base-TX	An Ethernet standard for Local Area Network (LAN). The 10/100 refers to its 10/100 Mbps bandwidth, the base to single baseband, and the T to the Twisted pair. The cable uses two pairs of unshielded twisted wires.
Address Book	The Address Book is a convenient directory that stores contact Phone Numbers and Email Addresses for easy retrieval at a future time.
Address Book Dialing	A dialer that enables you to dial an entire Telephone Number/Email Address by pressing one key.
ADF (Automatic Document Feeder)	The mechanism that feeds a stack of document, to the scanner one page at a time.
Automatic print reduction	Automatically reduces a received document so that it can be printed onto a standard size piece of plain paper. For example, your machine will reduce an incoming legal size page to 75% of its original size so it can fit on a letter size paper.
Automatic Reception	The mode that allows you to receive fax documents without user intervention.
BPS (Bits Per Second)	The amount of data that is transmitted over the phone line. Your machine can start at each Max. Modem speed and automatically steps down to suitable speed depending on the phone line condition and the receiving machines capabilities.
CD-ROM	CD-ROM media is read-only media that holds about 650 MB of data. It's generally accepted as the easiest way to distribute software. CD-ROM drives can also read audio CDs even though they are in a different format than standard CD-ROM media.
Client	Clients are computers that run software programs used to contact and obtain data from Server software program on another computer, often across a great distance.
Coding method	The data compression method is used by machine. Your machine utilizes Modified Huffman (MH), Modified Read (MR), Modified Modified Read (MMR) and Joint Bi-level Experts Group (JBIG) coding methods.
DDS (Document Distribution System)	The Document Distribution System automatically distributes received data (Scanner data, data received via FAX, and data received via Internet Fax) to specified recipients via a predefined delivery mechanism. The system administrator uses the system to specify the delivery mechanisms and the recipients.
Density	Signifies the scanning sensitivity in terms of lightness and darkness of your original pages. The degree of color or darkness of an image or photograph.
Dept. Code (Department Code)	This operation, require the user to input a preset number of digits (Department Code) before being given access to a function of the machine, such as transmission for example. The Department Name of selected Department Code is printed on the Header of each page sent, Cover Sheet, Comm. Journal and Individual Transmission Journal.
DHCP	Dynamic Host Configuration Protocol - a standard method for assigning IP addresses automatically to the devices on a TCP/IP network. As a new device connects, the DHCP server assigns an IP address from a list of available addresses. The device retains this IP address for the duration of the session - once the device disconnects the IP address becomes available for use again.
Direct Dialing	The method of dialing where you enter the entire telephone number or Email Address with the keypad.

Term	Meaning
Direct SMTP	Allows Internet Fax machines to communicate directly with each other within the Firewall (Intranet) without going through the Mail Server, thus alleviating the burden on the Mail Server.
Disk Drive	A peripheral storage device that holds, spins, reads and writes magnetic or optical disks. It may be a receptacle for disk cartridges, disk packs or floppy disks, or it may contain non-removable disk platters like most hard disks.
Domain Name	A unique name that identifies an Internet site. Domain Names always have 2 or more parts, separated by dots. The part on the left is the most specific, and the part on the right is the most general.
dpi	Abbreviation of dots per inch, which indicates the resolution of images. The more dots per inch, the higher the resolution. A common resolution for laser printers is 600 dots per inch. This means 600 dots across and 600 dots down, so there are 360,000 dots per square inch.
Drum	Along with the laser, this is one of the basic components of a laser printer. A light-sensitive drum on which the image is generated by the laser beam as the pattern of an electric charge. The toner particles adhere to this pattern after the drum has brushed against the developing roller. (a.k.a. OPC Drum)
DTMF (Dual Tone Multi Frequency)	Dialing method that sends a different set of frequencies for each digit of the telephone keypad. Commonly refers to touch tone dialing.
ECM (Error Correction Mode)	The ability to correct transmission errors as detected during the transmitting.
Email Address	The address for sending and receiving data by Email. It consists of User name, Sub-domain name and Domain name.
Ethernet	A very common method of networking computers and equipment in a LAN. A local-area network (LAN) architecture was developed by Xerox Corporation in cooperation with DEC and Intel in 1976.
Fax Board	In a multi-functional device, this is a Fax capability built onto a printed circuit board which can send and receive facsimiles. The multi-functional device is normally able to scan in a document and transmit it over a phone line to another fax machine. Also, it can receive faxes from other machines and print them out.
Fax Forward	The ability to forward all incoming faxes to the registered stations.
Fax Parameter List	The list that contains the home fax parameters settings that you have programmed into your machine.
File	A task that has been stored into the memory of your unit. Examples are deferred transactions.
Fixed Reduction	The method that allows you to determine one reduction rate, such as 75%, for all incoming documents.
FTP	Short for File Transfer Protocol, the protocol for exchanging files over the Internet. FTP works in the same way as HTTP for transferring Web pages from a server to a user's browser and SMTP for transferring electronic mail across the Internet in that, like these technologies, FTP uses the Internet's TCP/IP protocols to enable data transfer. FTP is most commonly used to download a file from a server using the Internet or to upload a file to a server (e.g., uploading a Web page file to a server).
Function Keys	The key that will be utilized to begin an operation or configuration of a feature.
G3 (Group 3)	Refers to the standards and transmission capabilities of the current generation of facsimile machines.

Term	Meaning
Group Dialing	The ability to program many telephone numbers into a single station so that many locations can be dialed in sequence utilizing a single keystroke.
Halftone	A scanning technique to distinguish levels of gray from black and white.
Handshaking	The exchange of a group of control signals that communicate between the transmitter and receiver. These signals determine the condition at which communication can occur.
Hard Disk	This is commonly the slang term for a hard drive is closed and the disks are hard (usually metal). The closed system gives the possibility of a device that physically stores data in your multi-functional machine/computer. It's much like a floppy disk, but the system is more precise, so the drive is faster and can hold more data.
HDD (Hard Disk Drive)	The physical component of a PC which performs the basic operations on the hard disk-including rotating the disk & reading/writing data to the disk.
Header	A row of information that is transmitted by the sending machine and printed on the top of each page by the receiving unit. This identifies the transmitting unit and information about the transmission, such as time and date.
Homepage	The page that your Browser displays when it starts up or main web page for a business, organization, etc.
Host	Any computer on a network that is repository for services available to other computers on the network. A Host must have a unique Host name within a domain. The host is the first (left most) section of the Fully Qualified Domain Name (FQDN). The reminder of the FQDN is the domain and often tells you something about where your machine is located (i.e., at Panasonic) **Ex**: Your machine's Email Address is: Fax@fax01.panasonic.com In the example above "fax01" is the host and "panasonic.com" is the domain.
Image Memory Size	This signifies the amount of memory available in your unit capable of storing pages of documents. All page units of measure are based on the ITU-T Image No.1.
Install	To add hardware or load a software application onto your multi-functional machine/computer.
Internet	The Internet is a vast collection of inter-connected networks that all use the TCP/IP protocols, on which you can send an Email, chat to people electronically or search for information on almost any subject you care to think of. Quite simply it is a "network of computer networks".
Internet FAX	The Internet fax uses the Internet to send faxes. The transmission and reception take place via store-and-forward mode on the Internet using Internet Email. In store-and-forward mode the facsimile protocol "stops" at the gateway to the Internet and is reestablished at the gateway leaving the Internet.
Intranet	A private network inside a company or organization that uses the same kinds of software that you would find on the public internet, but that is only for internal use.
IP Address	A unique number used to identify equipment or host computers on the Internet.
ISP (Internet Service Provider)	An institution that provides access to the Internet in some form, usually for money.
ITU-T (C.C.I.T.T.)	International Telecommunication Union - Telecommunication, formerly known as C.C.I.T.T
ITU-T Image No.1	An Industry standard document that allows comparisons of the transmission speeds and capabilities of machines.

Term	Meaning
JPEG	Short for Joint Photographic Experts Group, and pronounced jay-peg. JPEG is a lossy compression technique for color images. Although it can reduce files sizes to about 5% of their normal size, some detail is lost in the compression. JPEG is a graphical format that is widely used in WWW pages.
Key Name	An alternate to the station name that can be programmed for each Address Book dialing key.
Keypad	A group of numeric keys located on your Control Panel.
LAN (Local Area Network)	A Local Area Network is a computer network system and printer limited to an immediate area, such as an Office, Factory, and University used to integrate and exchange data.
LCD	Liquid Crystal Display. The display area of your machine.
MAC Address	A hardware address that uniquely identifies each node of a network. In IEEE 802 networks, the Data Link Control (DLC) layer of the OSI Reference Model is divided into two sublayers: the Logical Link Control (LLC) layer and the Media Access Control (MAC) layer. The MAC layer interfaces directly with the network medium. Consequently, each different type of network medium requires a different MAC layer.
Mail Gateway IP Address	The Address of the Mail Server. The Internet Fax communicates with your existing Mail Server for all communication traffic.
Mailing List	A system that allows people to send an Email to one address, whereupon their message is conveyed to multiple subscribers on the Mailing List.
Manual Reception	A mode that requires operator intervention to receive an incoming document.
MAPI (Messaging Application Program Interface)	Acronym for Message Application Programming Interface. A standard Windows interface for messaging that enables different mail programs and other mail-aware applications like word processors and spreadsheets to exchange messages and attachments with each other.
MDN (Message Delivery Notice)	This Message Delivery Notice (MDN) is the requested by the sender for a delivery processing confirmation indicating that the message (Email) was read.
Memory	The term memory identifies data storage that comes in the form of chips, which holds information that your machine needs to use. The word storage is used for memory that exists on disks.
Memory Transmission	The documents are scanned into memory before actual connection to the phone line for transmission.
MIME (Multipurpose Internet Mail Extension)	A standard used for attaching non-text (image) files to Internet Email messages.
Modem	A device that converts signals from your fax machine into signals that can be transmitted over telephone lines.
Module	A self-contained hardware or software component that interacts with a larger system. Hardware modules are often made to plug into a main system. Program modules are designed to handle a specific task within a larger program.
Network	Any time you connect 2 or more computers together so that they can share resources, you have a computer network. Connect 2 or more networks together and you have an internet.
Overlap Print	Documents too long to be reduced are automatically printed on two pages with 10 mm overlap.

Term	Meaning
Panasonic Super-Smoothing	An electronic image enhancement (Panasonic Super Smoothing) that will create a particular pattern for the improvement of copy quality.
PC	The Personal Computer - Quite Simply a computer designed to be used by one person at a time.
PC Card	A credit card sized removable module for portable computers. PC Cards are used to attach modems, network adapters, sound cards, radio transceivers, solid state disks and hard disks to a portable computer.
PCL (Printer Control Language)	The page description language, which has become a de facto standard used in many printers and typesetters. PCL Level 6 streamlines the graphics and font commands, reducing the amount of information that has to be sent to the printer.
PDF	Adobe® Portable Document Format (PDF) is a universal file format that preserves all the fonts, formatting, graphics, and color of any source document, regardless of the application and platform used to create it.
Polling	The ability to retrieve a document from another machine.
Polling Password	A 4-digit programmed code that enables the security of a document being polled.
POP (Post Office Protocol)	POP refers to the way Email software such as Eudora or your machine gets Email from a mail server. You must always have a POP account that you tell your Email software to use to retrieve your mail.
Print Reduction Mode	The methods used to determine how an incoming document will be reduced to print onto the paper loaded in your machine.
Protocol	A standard process, a set of rules & conditions that perform a particular function. A word which is very common in PC & Internet Terminology. Ex: FTP (File Transmission Protocol), IP Address (Internet Protocol Address), TCP/IP (Transmission Control Protocol Internet Protocol), POP (Post Office Protocol)
PSTN (Public Switched Telephone Network)	Public Switched Telephone Network. Network of interconnected switching equipment and transmission facilities.
Receiver Password	A 4-digit password that is checked before a document is received.
Relay Address	A 3-digit code that identifies your machine is programmed in a relay network.
Relay Network	A group of machines that communicate via a relay station.
Resolution	This relates to the quality of a viewed image either on the PC Screen or printed output. For printed images the resolutions is measured in dots per inch or DPI. The higher the DPI the better the resolution and better image quality.
Router (Gateway)	A special purpose computer (or software package) that handles the connection between 2 or more networks. Gateways act like traffic cops, they spend their time looking at the destination addresses of the packets passing through them and deciding which route to send them on.

Term	Meaning
SD Card (Secure Digital Memory Card)	A flash memory card that provides secure storage for your machine, which is also popular with handheld devices such as digital cameras, cell-phones, and PDAs.
Selective Reception	A function that can be set so that your unit will receive from only those machines programmed into your dialer.
Server	A computer, or a software package, that provides a specific kind of service to client software running on other computers. A single server machine could have several different server software packages running on it, thus providing many different servers to clients on the network.
Sleep Mode	The lowest power state that the machine enters after the specified time without actually turning off.
SMTP (Simple Mail Transfer Protocol)	An accepted standard used extensively on the Internet for transferring Email messages between computers. The standard defines exactly how the message will be sent, any controls, format of the message etc.
Software	Software is basically a series of instructions that causes the PC to do something. The Operating System such as DOS is known as Systems Software. Application Programs such as a Word Processor or Spreadsheet perform the main tasks for which we use the PC.
Station Name	Alphanumeric ID which can be programmed for each phone number or Email Address location in the Address Book.
Stored Document	Documents that have been scanned and now are saved in your machine's memory.
Sub-Address	ITU-T recommendation for further routing, forwarding or relaying of incoming faxes.
Sub-Addressing Password	ITU-T recommendation for additional security that corresponds to the Sub-Address.
Subnet Mask	A mask bit used to manage sub-segments of the network which is defined with network IDs.
Substitute Memory Reception	Your machine's ability to save an incoming document into its memory, when it runs out of recording paper or toner.
TCP/IP	TCP/IP stands for Transmission Control Protocol/Internet Protocol. It is quite simply a standard set of protocols that govern the basic workings of the Internet that was implemented in 1982. The TCP part is all about ensuring that data is transmitted correctly between 2 computers. If any errors occur these are detected & the data is retransmitted. The data transmitted is split up into small portions called Data packets. The IP part of TCP/IP is how these data packets are moved from one point to another. Each computer on the internet has a unique IP address & the data packets are moved from the source to the destination through many different computers & this is controlled via TCP/IP. This protocol is used on the Internet & also by computers which are part of a LAN.
Thumbnails	A miniature display of a page or an image. Thumbnails enable you to see the layout of many pages/images on the screen at once. Generally, thumbnails are too small to show the actual text/image.
TIFF	Tagged Image File Format. One of the many different types of File Format used on PC's. An image file format for attachments of graphic data for smooth transmission between different units. The coding method of this format supports the same coding as Modified Huffman (MH) and multiple-page image data.

Term	Meaning
TIFF Image Viewer	An application software to view the contents of TIFF-F File. Some TIFF Image Viewers may not display the data properly.
Time Zone	By setting the Time Zone of your area on the device's Control Panel, the received Email will display in the correct Date & Time order, regardless of the time difference of the sender's area. To confirm your Time Zone, check the "Date/Time Properties" of your Computer. For more details, consult with your system administrator.
Toner	A special type of ink used by copy machines and laser printers. Toner consists of a dry, powdery substance that is electrically charged so that it adheres to an invisible image that has been charged onto a drum, plate, or piece of paper with the opposite polarity.
Transmission Reservation	The ability to reserve a transmission while your unit is performing another function.
Verification Stamp	A user selectable transmission verification stamp which can be placed on scanned documents that are successfully transmitted or stored in memory.
View mode - File List	Allows you to view the brief contents of the File List through the LCD display without having to print the Memory File List.
View mode - Journal	Allows you to view the brief contents of the journal through the LCD display without having to print the journal.
