Rapid AA/AAA Battery Charger w/ 4 2500mAh AA Batteries

Rapid Battery Charger Plus 4 AA NiMh Rechargeable Batteries

This fast, portable battery charger is perfect for recharging up to 8 Nickel Metal Hydride or Nickel Cadmium batteries! Featuring an easily decipherable LCD screen that displays the status of charging batteries, this is one of the most easy to use battery chargers on the market! Capable of charging both AA and AAA battery types, this versatile tool charges whatever combination of batteries you need quickly! Best of all, this product also discharges rechargeable batteries that may be holding a slight bit of electricity! Aside from being a nuisance when seemingly full batteries deliver only half a charge, these excess charges can also lead to shorter viable battery life in your rechargeables! The Ultra Rapid Charger is the perfect, affordable solution for those who use rechargeable batteries.

Specifications

- Chemistry: NiMH
