# 647 ROTARY TILLER, PLOW, DISK, CULTIVATOR, AND GENERATOR FOR X700 ULTIMATE™ TRACTORS

### **FEATURES**

#### 1) 647 ROTARY TILLER

- The 647 Rotary Tiller is ideal for homeowners and commercial customers such as golf courses, hospitals, schools, and nurseries.
- Mounts to all X700 Ultimate<sup>™</sup> Tractors equipped with a 3-point hitch and 540-rpm rear PTO.
- Large, replaceable tines and a heavy-duty tubulartine shaft provide excellent performance and durability. Able to lift and mix soil for a uniform seedbed.
- The tine housing is formed high with plenty of clearance around tines for rocks and trash to pass through or recirculate without getting caught in the tines.
- Side-shaft-driven design allows tines to be evenly spaced to the full 48-inch width of the machine.
- Hinged tine shield follows the ground surface to smooth the soil for a good seedbed. Cowling, end-covers, and a rear shield trap rocks and other debris, protecting operator, bystanders, and buildings.
- Tiller is raised and lowered by the tractor hydraulic-lift system. Skid shoes on each side of the tiller housing provide more-precise tilling depth. Four adjustable positions accommodate various tilling conditions.

 Preset friction clutch in tiller drive assembly provides protection for both the tiller and tractor drivelines.

NOTE: Ballast may be required on some models. See John Deere Price List or Operator's Manual for required ballasting.

#### 2) PLOW

- Ideal for the gardener, nursery or landscape contractor.
- Mounts to all X-Series Tractors equipped with a 3-point hitch.
- This heavy-duty plow is specifically designed for deep tillage or breaking up fields and plots of sod.

#### 3) DISK

- Perfect for homeowners, nurseries and landscape contractors.
- Mounts to all X700 Series Tractors equipped with a 3-point hitch.
- Designed for smoothing out ground and breaking up large dirt clods caused by plowing, this unit is also handy when preparing seed beds for planting.

#### 4) CULTIVATOR

- Designed for homeowners, gardeners and nurseries.
- Mounts to all X700 Series Tractors equipped with a 3-point hitch.
- The best solution for shallow tillage in lighter soils.
- Can be used to weed row crops or for seed bed preparation.

#### 5) 10K GENERATOR

- Conveniently mounted to 3-Point Hitch for easy transport.
- Powered by Tractors 540 RPM PTO to eliminate the need for a separate engine.
- 10,560 watts peak and 9600 watts of continuous power.
- 120- and 240-volt outlets.

## SPECIFICATIONS

	647 Rotary Tiller for X700 Series Tractors
Tilling Width	48 in. (1219 mm)
Rotor Diameter	14 in. (356 mm)
Rotor Length	
Rotor Bearing (Left End)	
Rotor Bearing (Right End)	Greaseable ball bearing
Counter Shaft Bearings	
Drive	
Rotor rpm	
Rotor Tip Speed	·
Height of Lift	
Tilling Depth (Maximum)	
Weight (Approx.)	
	Plow for X700 Series Tractors
T	1 h
	Twin solid steel beams, ½ in. x 2¼ in. (13 mm x 57 mm)
Standards	
Type of Protection	Shear bolt (standard equipment)
Depth Control	
Maximum Plowing Depth	, , ,
Weight
