

Zero Turn Mowers

Commercial Accu Z · Residential Razor

If you Gotta Mow... You might as well do it

... In Comfort

Our choice of seats, ergonomically designed control panel and ample leg room provide a level of unsurpassed comfort.

... In Speed

There is no comparison between a Zero Turn Mower and any other powered mower when it comes to saving time. A Land Pride Zero Turn Mower can cut square corners, around trees and increase overall productivity on the farm, in your yard, or in your business.

... In Color

The Accu Z and Razor are available in baked on powder paint in Land Pride Buckskin or Red.

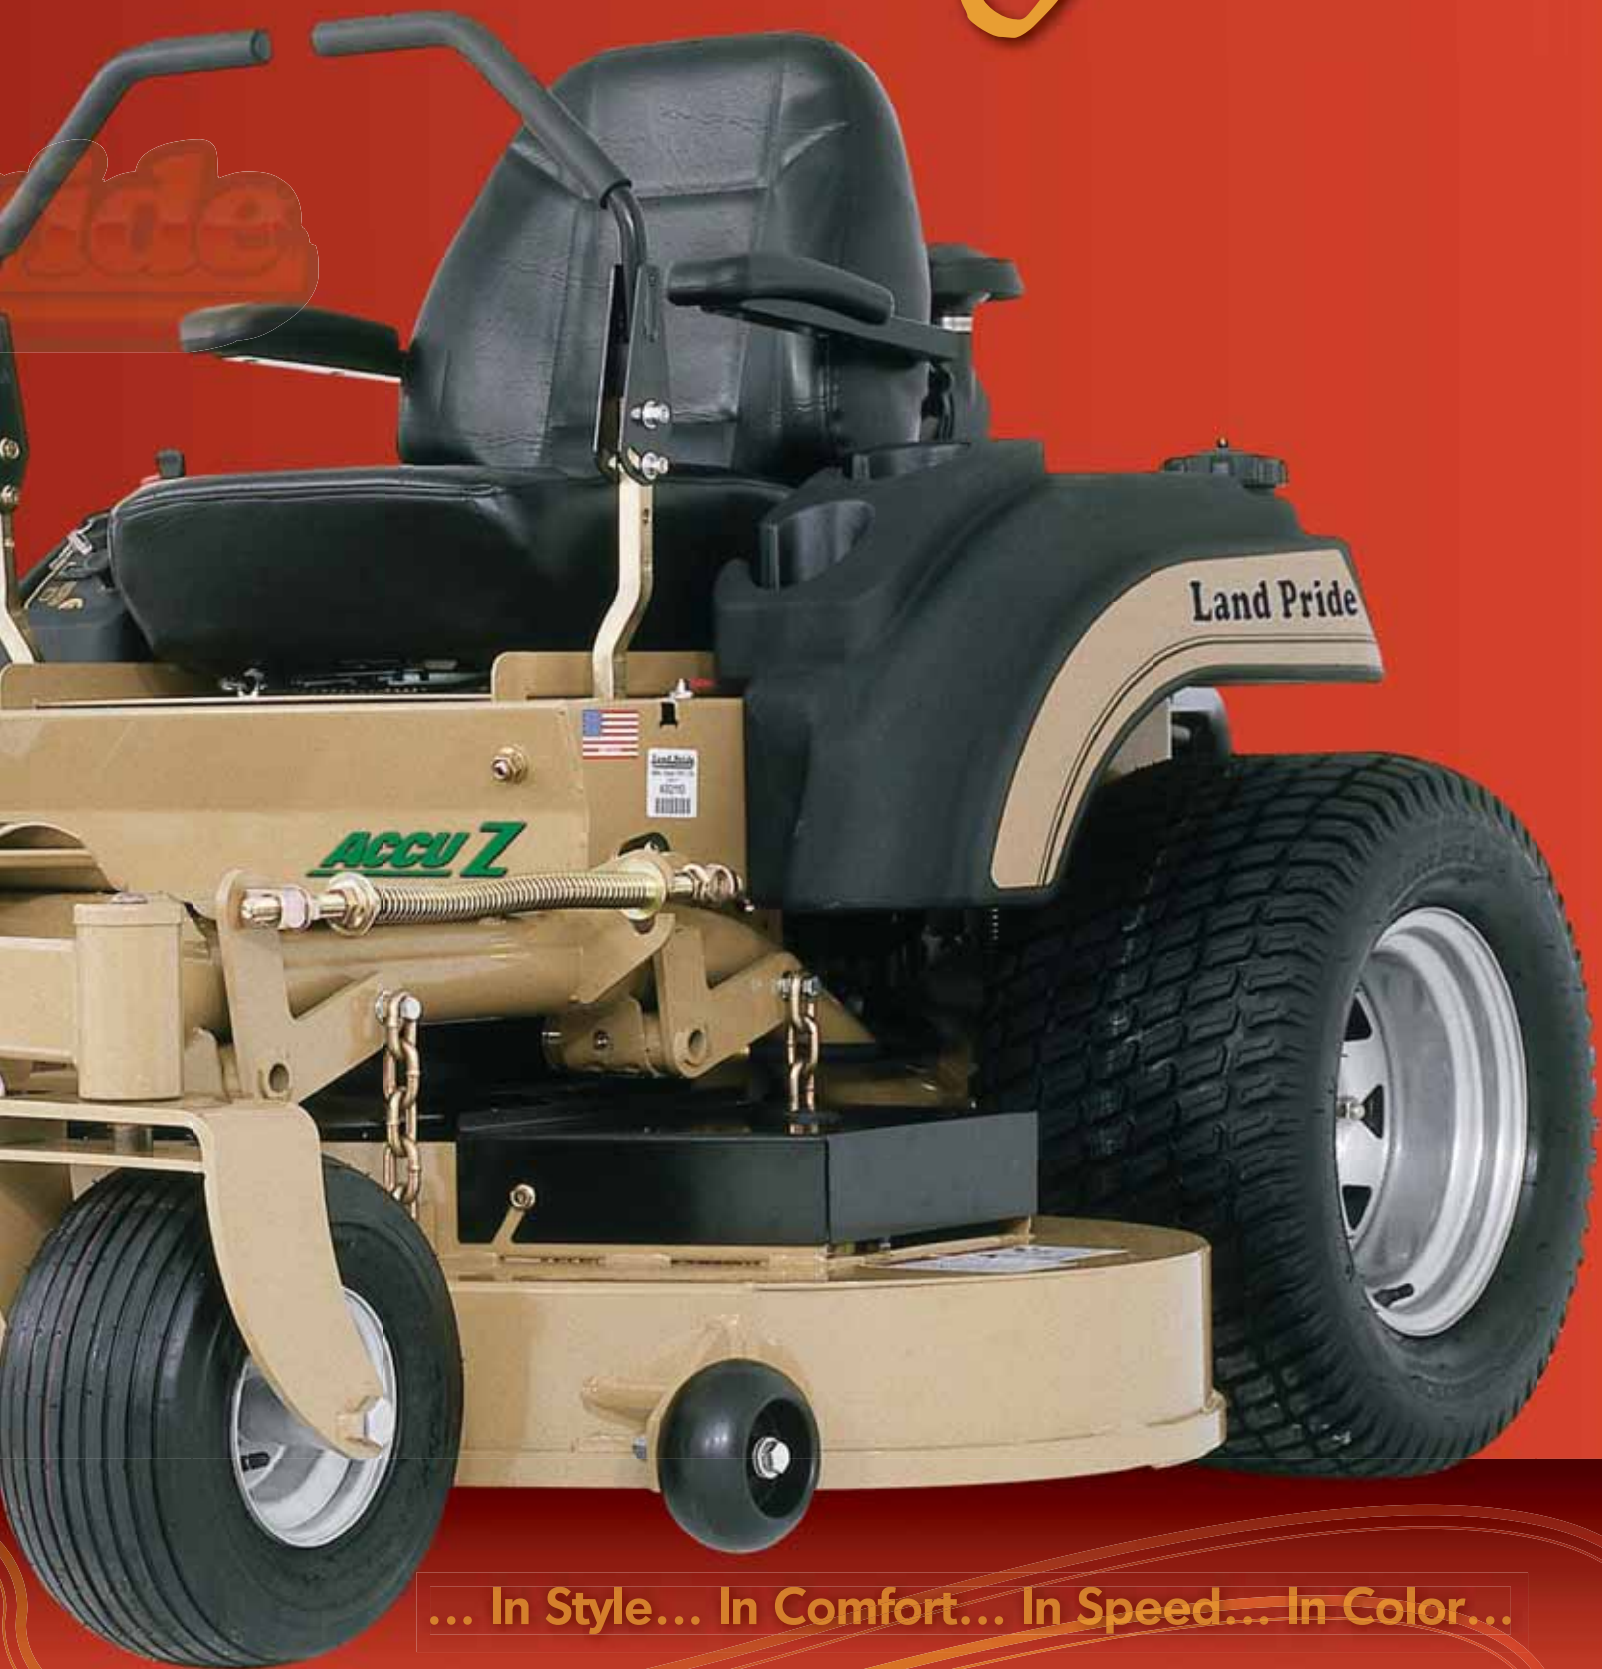

... In Total Confidence

High quality components, craftsmanship by longstanding skilled employees, a nationwide network of top quality dealers, and a generous warranty lets you own and operate your Land Pride mowers with Total Confidence.

ACCUZ

COMMERCIAL-DUTY ZERO TURN MOWER

ZT60

Kawasaki: 25 HP
Honda: 24 HP
Kohler: 27 & 30 HP

ZT72

Kawasaki: 25 HP
Kohler: 27 & 30 HP

Loaded with value added *features* Features...

- Honda, Kawasaki or Kohler Engine
- Optimal dispersal due to high blade tip speed
- Anti-scalp rollers
- Seat safety interlock
- Engine oil cooler
- Easily greaseable cast blade spindle housings
- Forward tilting seat for drive system and battery access
- Choice of adjustable operator's seats

Innovative Tubular Construction

The industry's first tubular frame is also used as the hydraulic reservoir. Internal baffles allow the oil to circulate keeping the temperature at peak efficiency at all times. This innovative design allows for plenty of area to dissipate the heat, and greatly opens up the service area.

Steering Levers

Steering levers are adjustable several ways to allow you to fit your physical size and comfortable reach.

Park Brake

Easily set the Park Brake every time you spread the steering levers in the neutral and out position. Never again will you forget to set, or release the Park Brake!

Front Axle Pivot Shaft

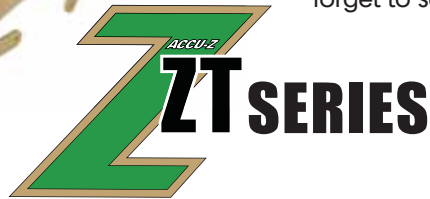

The massive 2 1/2" x 18" solid steel pivot shaft provides unexcelled strength and support for the floating front axle, and additional support for the mower frame.

Independent Hydrostatic Drives

The left and right hydrostatic drives and pumps are independent of each other. The tubular frame 'dual' oil reservoir keeps the oil from each pump independent from the other, eliminating cross contamination from pump to pump.

Engine Access

The Accu Z offers enhanced engine access as spark plugs, air filter, oil filter & oil drain are placed easily within reach. Center mounted rear engine provides additional stability, maximum ease of service, and maximum legroom. The muffler is also hidden and tucked under to reduce noise and provide an added measure of protection against contact.

Superior Deck Construction

The 10 gauge deck with 1/4" additional reinforcement provides a lifetime warranty if the front edge should ever enter the blade path.

Baffle Enhanced Deck

Strategically placed baffles enhance the overall performance of the deck. The suction, the cut and the powerful discharge all combine to create a professional look every time.

Floating Front Axle

The floating front axle provides for a smoother ride, more uniform cut, and optimal traction capability by keeping all tires equally in contact with the ground over uneven terrain. Easily lock the axle in float or rigid position with two pins.

Exceptional Warranty*

2yr

- Overall Unit - 2 years or 1200 hours
- Hydraulic Wheel Motors & Pumps - 3 Years
- Engine - 2 years
- Mower Deck - Lifetime on front edge
- Frame - Lifetime against breakage
- Blade Spindle - 3 years or 1200 hours
- Gauge Wheel Yoke Bearings - 3 years

* See our warranty statement for complete details.

- Overall Unit - 4 years
- Engine - 2 years
- Mower Deck - Lifetime on front edge
- Frame - Lifetime against breakage
- Blade Spindle - 3 years
- Gauge Wheel Yoke Bearings - 3 years

* See our warranty statement for complete details.

Spend less time mowing...

Quality Features

You may spend less time in the seat than a commercial user, but you still deserve the same features and comforts they do. We've incorporated similar designs from our Accu Z Commercial Series into our Accu Z Razor® Residential Series with the floating front axle, superior deck construction and overall ease of use.

Land Pride's Zero Turn Razor is sized right, equipped right, and priced right for your residential mowing needs. With more leg and body room and more ground hugging stability than almost any mower in its class, the Razor lets you mow with absolute comfort and confidence.

Compact Size

44" and 52" Deck widths are just right for many gates as well as trailers. The compact size works well for most urban-sized residential properties and is not too intimidating if you're looking to convert from a walk-behind model.

Floating Front Axle

The floating front axle provides for a smoother ride, more uniform cut, and optimal traction capability by keeping all tires equally in contact with the ground over uneven terrain. Easily lock the axle in float or rigid position with two pins.

Steering Levers

Easier and more comfortable than a steering wheel, less effort is needed to navigate around flower beds, walkways and obstructions. Negotiate tighter turns without backing up, greatly reducing your time in the seat.

Ease of Maintenance

- Deck Belt - Single deck belt is easy to adjust and change.
- Drive Belt - Easy access to single drive belt.
- Blade spindles- Easy to grease bearings in a cast housing.

Engine Maintenance

Razor engines are mounted to provide unexcelled ease of service access to air filters, spark plugs, oil filters and oil drain valve port.

Hydraulic Pump & Drive Motors

The hydraulic pump and drive motors are a self contained and virtually maintenance free drive component with an easy to change filter. Each rear wheel has its own drive motor, which quickly responds to forward or reverse direction.

Comfort

Our low to the ground design offers an excellent view of your work area, and the well-defined center of gravity provides overall stability and comfort. Our control panel and cup holders are comfortably located.

Loaded with value added features... *Features...*

- Briggs & Stratton or Honda Engine
- Easy to change, foot-operated height adjustment
- Deluxe cushion seat with armrests available
- Easily set Park Brake
- Dual gas tanks with a total of 12 US Gallons
- Mulching blades available

Keep the sun off with this easily assembled, ROPS attached canopy. Made with a lightweight aluminum frame and acrylic coated polyester, you'll be more comfortable during those sunny afternoons.

Get more use from your LP Zero Turn Mower by attaching a front snow blade. Available in 60" and 72" widths, this blade easily attaches to your Razor or Accu Z mower for the winter months.

Grass Catchers are available in rear and side mount for the Razor and rear mount for the Accu Z.

An easy to attach light kit is available for the Razor and Accu Z.

Optional ROPS is available for added operator protection. Available in fixed or folding for cutting under trees.
