New "NHT" Granita Dispensers
New Suction Cup Compression Seal

Cool, Refreshing, Satisfying & New From Cecilware

Introducing Cecilware's new line of granita dispensers with the unique Suction Cup Compression Seal System. This Non-Magnetic Drive System uses a suction cup style diaphragm to act as a barrier between the granita product and vital gear motors, preventing product leaking into the inner components of the dispenser.

Compared to other Non-Magnetic Drive Systems, the "NHT" or **No Hassle Technology** dispenser offers superior value and high quality.

All NHT Dispensers offer you:

- Exclusive Suction Cup Compression Seal System
- Freeze Up Monitoring System
- Dual Surface Freezing Chambers
- 24-hr. Programmable Defrost Timer
- Models Available: Manual Fill or Auto Fill Ready For Liquid Bag-In-The Box

And Much More Value For Your Money!!!

Dispense Frozen Cappuccino, Fruit Slush, Smoothies & More!!!

**Suction Cup
Compression Seal**

**300 Series Stainless Steel
Non Magnetic Auger Shaft
<u>Will Not Rust</u>**

Industry Leading Features

- **Suction Cup Compression Seal System -** Operating with one piece inner auger, a suction cup style diaphragm acts as a barrier between the granita product and vital gear motors. Prevents product leakage and down time.
- **Freeze Up Monitoring System** - By working with the compressor, this monitoring systems prevents granita products with low Brix or sugar content, from turning into a brick of ice and burning out the auger motor. This system adds longevity to the dispenser.
- **300 Series Stainless Steel Auger Shaft -** Using only top of the line components, the auger shaft is constructed of stainless steel and will not rust.
- **24 Hour Programmable Defrost Timer** - Simply set the timer to defrost any product, keeping it chilled at approximately 40 degrees, and automatically turning back to the frozen mode at any specified time. This feature decreases down time and maximizes sales. Also this eliminates product freezing and high maintenance cost.
- **Dual Surface Freezing Chamber -** The Granita's dual surface freezing chamber freezes product quickly and efficiently.
- **Auto Fill Ready For Liquid Bag-In-The-Box Apparatus –** Never run out of product again!!! The Liquid Auto Fill option automatically refills product as soon as it falls below the preset level.

- **Level Control System** - A sensor system, in the Auto Fill dispensers, senses when the Granita product is too low and automatically refills it to the appropriate level. Additionally, when the bag-in-the-box product is finished, a low pitched alarm will sound and light illuminates, alerting the operator that the product needs to be replaced.
- **Visual Merchandiser** - The large clear bowls merchandise and sells the Granita product.
- **Beautiful Lit Graphics** - Helps merchandise the Granita product resulting in additional sales. The easily removable lid is reversible for behind the counter selling.

Multiple Uses

- **Adjustable Slush Mode** - Allows you to set the slush consistency of the Granita drink.
- **Cool Beverage Mode** - In addition to selling Granita products, this mode gives you the ability, at the push of a button, to sell refreshing cold beverages as well. Perfect for dispensing Fruit Punch, Iced Cappuccino, Lemonade and more. Thermostatically adjustable for proper temperature.
- **Interchangeable Parts** - There's no reason to stock additional parts because most are interchangeable with Cecilware's Magnetic Drive System Granita dispensers.

Preventative Maintenance and Easy Cleaning

- **Washable Condenser Filter** - Easily located through the side panel of the dispenser.
- **Easily Removable and Cleanable Seal**
