What else you will also need?

- Internet connection (broadband recommended)
- Windows Vista, Windows XP or Windows 2000
- CDROM or DVDROM drive
- a desktop or a laptop with free USB port

1 Install

A USB cable

Note: Please make sure the USB connector is **NOT** plugged in before installation starts.

• Unwind the USB cable from your phone.

B Install the software

• Insert the installation CD into the computer's CDROM (or DVDROM) drive
• The installation program will start automatically
• Follow instructions on the screen
Note: If for some reasons the installation does not start automatically:
• In Windows, click on **START**, and then select **Run**.
• Type in **explorer** and navigate to the CD ROM (or DVD ROM) drive.
• Double-click on **SetupWizard.exe**.

2 Connect

Connect USB plug

• Following the instructions, you will be asked to connect the USB plug directly to your computer's USB slot.
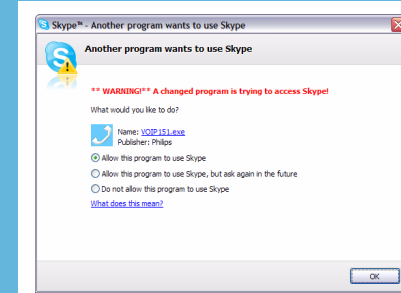

Go on following instructions on the screen.

C Finish installation

• Click on **Exit**.
• Remove the installation CD from the computer's CDROM drive.

Use the Skype version provided on the installation CD for the phone to work properly. New features from upgraded Skype version may not be available on VOIP151, check compatibility on *www.philips.com/support*

3 Enjoy

A Set up for the first time

Note: If you don't have a Skype account, you can find more details about how to create one on *http://www.skype.com*

• Make sure the phone is connected to a USB slot directly on your computer.
• If this is your first installation, the VOIP151 may be launched automatically. It depends on your selection during the installation.
• Otherwise, if the driver is not running, start the VOIP151 driver by double clicking the shortcut icon created on your desktop.
• Start Skype if VOIP151 driver has not started Skype for you. Login with your Skype account.
• If this is your first time running the VOIP151, you will see the message **Another program wants to use Skype**. Select **Allow this program to use Skype** and click **OK**.
