

You plug, it plays...wirelessly

Plug in an Eos speaker anywhere, get interference-free digital audio everywhere!

iPod not included

Your music everywhere...without the wires!

Upstairs, downstairs, inside or out -- Eos fills your lifestyle with music. Just plug in your Eos anywhere and get ready to enjoy your music everywhere. Eos surrounds your whole home with great sounding music...without the hassle, mess and expense of running wires. Gigawave™ digital wireless technology allows Eos to broadcast, interference-free music, to as many as 4 wireless speakers located up to 150 feet away from the base station speakers. Eos is easy, just plug and start playing...no complicated connection, no mind-bending set-up, no tearing up walls.

Multi-room audio in up to 5 areas -- try doing that with another iPod dock!

www.eoswireless.com

Digital Wireless Technology
Broadcasts CD quality, interference-free digital audio up -- to 150' indoors & out...through walls, floors and ceilings.

Multi-Room Audio
Supports up to four Eos wireless stereo speakers (*additional speakers sold individually.*) Speakers can be placed up to 150' from the docking station/ transmitter.

2.1 Stereo Audio
Base Station & Wireless Speakers each include two full range drivers and a ported sub-woofer for crystal clear highs and deep sounding bass.

SRS WOW!
Dramatically improves the dynamic audio performance by expanding the size of the audio image and creating a deep, rich bass response.

Auxiliary Input
Broadcast from virtually any audio source: Non-docking iPods, MP3 players, computers, home stereos, satellite radios and more...

iPod Compatibility
Works with any iPod with a docking connector, including the new iPod Touch, iPod Nano & iPod Classic as well as all older iPod models (except iPod Shuffle).
