JOB0**FOR YOUR BEST IMAGE**

Experience the *extreme* Difference

JOB0 has taken Advanced Professional Photo Features to the EXTREME!

At last there is a portable storage device developed specifically to meet the needs of the professional photographer. The JOB0 GIGA Vu extreme is the ultimate multi-media, photo copier and image viewing system. This high-quality digital album with hard drive storage offers a built-in memory card slot for CompactFlash and MicroDrive. A **SD/SDHC adapter is included**, while all other memory card types are fully supported with an optional adapter. The JOB0 GIGA extreme was designed for digital camera users that want the most advanced digital storage and display features. It offers optimized professional photo functions including real RAW file decoding, super Hi-Speed downloading of files to and from your computer, and razor sharp image viewing capability. With **vast storage options up to 160 GB**, this unique, compact, one-of-a-kind digital accessory is a must have for serious minded photographers. Instantly free up precious space on your memory card. When you are on location or traveling, this digital camera companion is ideal as a permanent secure storage system for your professional pictures. The JOB0 GIGA Vu extreme is the choice of professionals that want the very best.

View Brilliant Colors with Enhanced Detail

The JOB0 GIGA Vu extreme features a big **3.7" Color TFT display** allowing you to instantly view your digital pictures with power zoom. Enjoy your photos in bright brilliant color and vivid detail. In addition, this exclusive digital player offers TV-out for showing and controlling pictures directly on a television. When used as a media player, music files can be played on the JOB0 GIGA Vu extreme with video and sound. **Copy, store, view, print and present your photos easily and without a PC.** You can even create an incremental back-up by utilizing the OTG feature to connect the JOB0 GIGA Vu extreme to other stand-alone USB external hard drives such as our popular Giga one.

Special Photo Features

The JOB0 GIGA Vu extreme offers real **RAW File Decoding** indicating not only the JPEGs of a digital photo, but actually displaying the real and true RAW data. And with its **power zoom** feature, a photo pixel can be indicated perfectly as a screen pixel. When sharing your photos with family and friends, adding background music or creating a stunningly **vivid slideshow** is fast and simple. GIGA Vu extreme also offers a confirming **Verify-Function, Dust Detection, Pict-Bridge Printing and a J.D. Loupe zoom** feature for viewing even the most precise image details.

Designed to support the JOB0 photoGPS

In addition, the JOB0 GIGA Vu extreme is uniquely designed to store GPS location data as it interacts with the revolutionary JOB0 photoGPS device (purchased separately). Image data from a memory card can be stored on the unit's hard drive along with the associated GPS data captured by the JOB0 photoGPS for each photo taken. Subsequently, the process of organizing pictures and corresponding GPS data on the computer is greatly simplified. This innovative portable hard drive GPS feature is invaluable to every digital photographer needing to quickly and easily retrieve as well as organize a high volume of digital images.
