Fax: (239) 332-7212

WHY HIGH WHEELS?

- 1) Large diameter wheels roll easier, reducing resistance from turf and weeds, while overcoming holes.
- 2) High wheels allow better balance and create a pivot for maneuvering the mower.
- 3) High wheels allow bigger engines, without sacrificing balance or easy handling.

Sarlo high wheels hardly notice the holes, sand or soft turf that bog down low wheels and make pushing tough work.

Sarlo high wheels roll over high grass and weeds that low wheels push against.

POPULAR OPTIONS MAXIMIZE PERFORMANCE!

Swivel Front Wheel Assembly* for ultimate maneuverability and clean finish cuts. Available in single or dual configurations.

*Swivel wheels not available on 621-2 model.

Mulching Plate bolts quickly to Sarlo's Perfect Circle Deck to close discharge chute and create proper air circulation and clipping action for effective mulching.
