WHEEL WEIGHT — COUNTERWEIGHT

6½" PLOW — ARTICLE 990023

8" PLOW — ARTICLE 990024

10" PLOW — ARTICLE 990025

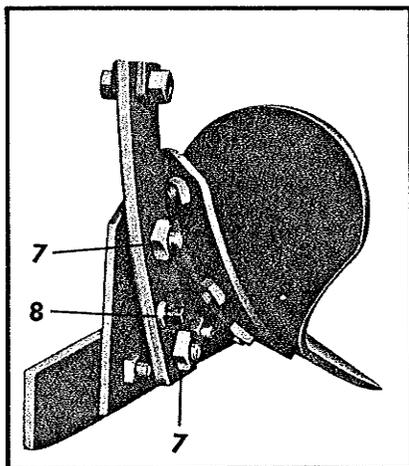

6 1/2" PLOW
ARTICLE 990023

8" PLOW
ARTICLE 990024

INSTRUCTIONS FOR ASSEMBLING

1. Remove varnish from moldboard and share, using a good grade of varnish remover. (Keep greased when not in use.)
2. Attach plow standard to plow bottom as shown.
3. Bolt beam to standard at (4) and lock with jam nut so beam is free to swing on standard.
4. Attach depth regulator screw (2) at (1) and (3).
5. Attach rolling coulter to beam, and adjust crank (5) so that blade runs from 3/8 inch to 1/2 inch to the left of landside. It is desirable not to run the rolling coulter over 2 1/2 inches deep.

ADJUSTMENTS

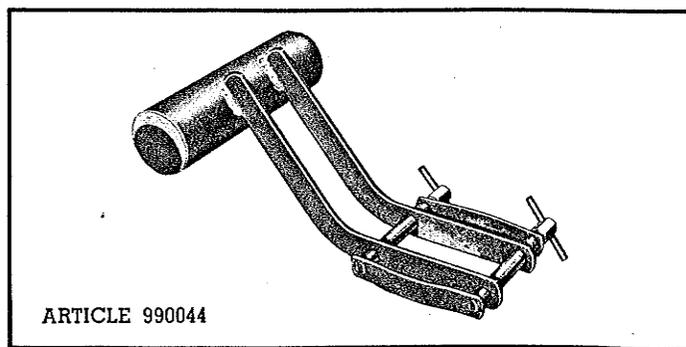

Loosen bolts (6) and raise or lower tractor handles to the desired height. To adjust width of cut (see insert) loosen nuts (7) and screw in set screw (8) for a narrower width of cut, and retighten nuts (7).

CAUTION

BE SURE THAT ROLLING COULTER IS OUT OF THE GROUND WHEN TRACTOR IS IN REVERSE GEAR.

NOTICE

Counterweight and wheel weights are necessary for heavy plowing. The wheel weights provide extra traction and the counterweight permits easier turning at the end of the rows.

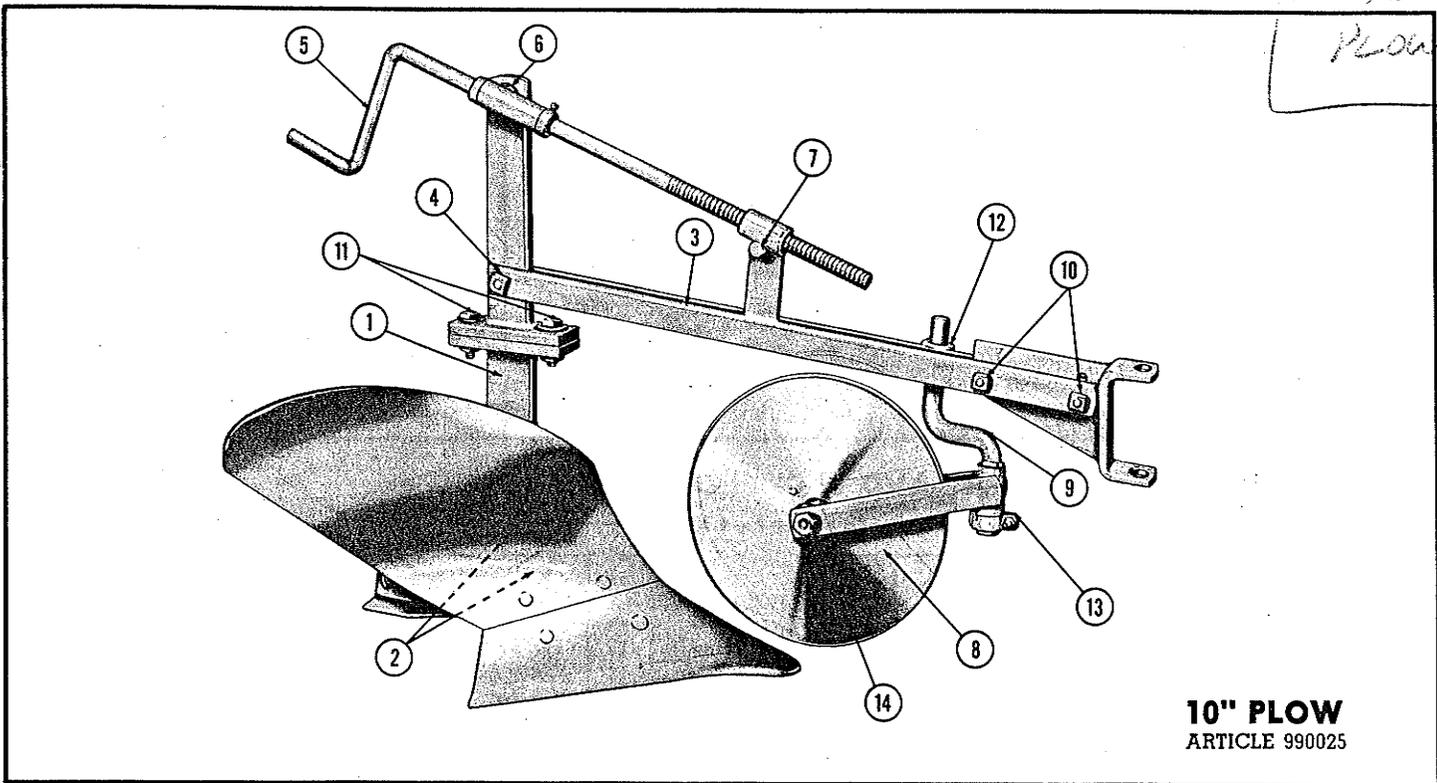

COUNTERWEIGHT

The counterweight is recommended for use with the disc harrow and plow at all times and is desirable when doing heavy cultivating.

We reserve the right to change construction, specifications, prices and terms, without notice and without obligation as to tractors and attachments heretofore shipped.

PRICES SHOWN ARE U.S.A. PRICES. PRICES OUTSIDE OF U.S.A. SUBJECT TO LOCAL IMPORT DUTIES, TAXES, ETC.

10" PLOW

INSTRUCTIONS FOR ASSEMBLING

1. Remove varnish from moldboard and share, using a good grade of varnish remover. (Keep greased when not in use.)
2. Bolt standard (1) to plow bottom (2) as shown.
3. Bolt beam (3) to standard at (4). Lock with jam nut so that beam is free to swing on standard.
5. Attach depth regulator screw (5) at (6) and (7).
5. Attach rolling coulter assembly (8) to beam, and adjust coulter standard (9) so that blade runs from 3/8 inch to 1/2 inch to the left of landside. It is desirable not to run the rolling coulter over 2 1/2 inches deep.

ADJUSTMENTS

Loosen bolts (10) and raise or lower tractor handles to the desired height. To adjust width of cut loosen nuts (11) and adjust plow bottom to desired width. Retighten nuts (11) securely.

wheel for plowing. Wheel weights are so designed that as many weights as necessary may be nested on the wheels.

After width of cut has been set, be sure to check coulter standard so that blade runs to the left of landside as in paragraph 5. Adjustments are provided at (12) and (13). Grease fitting should be lubricated frequently.

CAUTION

BE SURE THAT ROLLING COULTER IS OUT OF THE GROUND WHEN TRACTOR IS IN REVERSE GEAR.

NOTICE

Counterweight and wheel weights are necessary when using 10-inch plow.

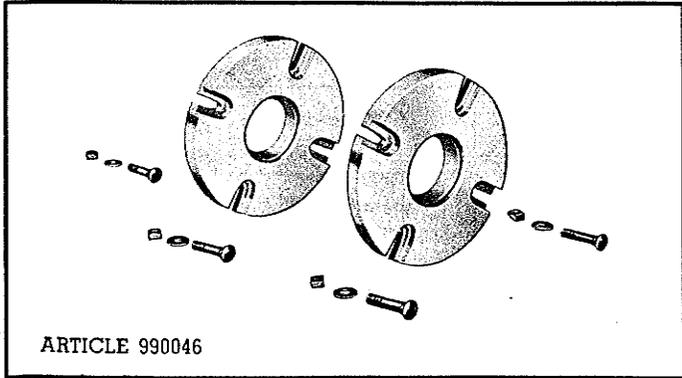

How to Order Repair Parts for Simplicity Garden Tractors and Attachments

The Authorized Simplicity dealer from whom you purchased your tractor and attachments can supply you with any replacement parts you may need. For prompt service, be sure to see your dealer first. He will furnish the correct parts from his stock or order them for you if necessary. However, you may mail-order directly from the factory.

To have your order filled correctly and for prompt service, please furnish the following information:

1. Model, number and year of purchase of tractor or attachment.
2. Part number, description, and quantity of part. (See parts list).

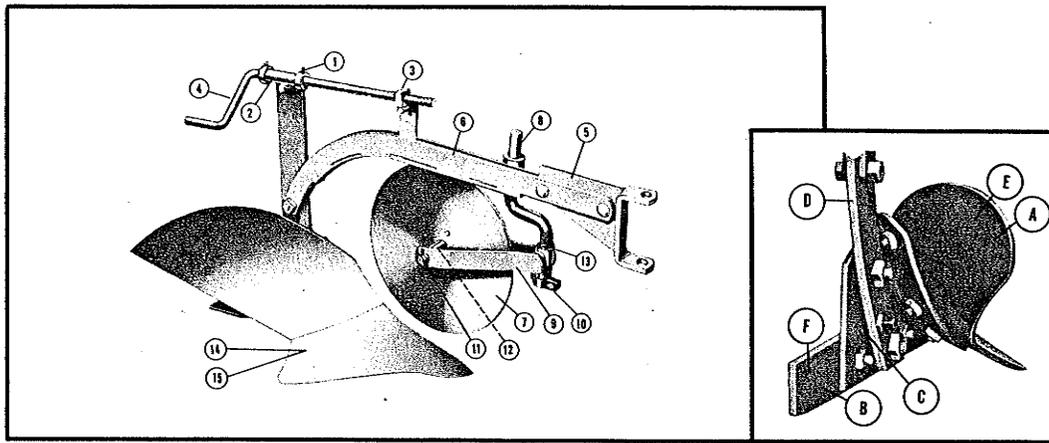

Be sure to include postage with your order. We do not pay transportation charges. Shipping weights are shown. Any excess will be promptly refunded.
