

The Stiga logo is a black rectangle with the word "STIGA" in white, bold, sans-serif capital letters. A registered trademark symbol (®) is located at the top right of the word. The background of the entire page is a yellow-to-black gradient with a faint, embossed pattern of various Stiga lawn care equipment, including lawnmowers, trimmers, and blowers. One of the most prominent pieces is a lawnmower deck in the upper right, which has "STIGA ST102E14" embossed on it.

75 years of garden excellence!

The passion for gardening has taken us a long way since 1934. From the first walk behinds to the latest generation of four-wheelers, the Stiga brand remains faithful to the concept of providing home owners with all the machinery they need to make gardening enjoyable.

Job satisfaction is a key word. To achieve this, we combine innovative technology and high momentum while reducing the impact on environment and man. Low emission engines, ethanol powered machines and four-stroke brushcutters reflect our ambition – to hand down an earth in good condition for generations to come. Please, step up and join us for a ride through 75 years of garden excellence!

Brushcutters

Good power-to-weight ratio. Effective. High torque. This is what distinguishes Stiga's brushcutters and make them ideal for use around the house. If environmental concerns rank highly, the low fuel consumption, low emissions and low sound-level speak in favour of a four-stroke engine. If higher torque is top priority, the two stroke engine model is an excellent alternative. All are built for a long and arduous use. Single strap harness included on all models except ST 27 J.

Lawn mowers (Multiclip)

All Multiclip models feature Stiga's unique mulching technology, which transforms grass clippings into fertilizer in a few days, and provides an exceptional finish. Because you skip the collection stage, cutting is easier and faster. Choose engine capacity and cutting width according to the size of your lawn. Options available include mains electric, ethanol or petrol engine with recoil or electric start, for added convenience, and self-propulsion. All models are equipped with ergonomic handle.
