## RANGER EYE-1500

### LASER RANGE FINDERS

The Ranger Eye-1500 is an advanced laser range finding system that rapidly provides an accurately measured distance out to 1500 yards.

With its unique optical properties the Ranger Eye 1500 provides sharp, clear images under all conditions. They feature 7x magnifications, multi-coated optics, +/- 1 yard accuracy, easy finger-tip operation and through-the-lens distance display.

The Ranger Eye 1500 is adapted with the latest digital circuit design and optical system that are superior to other models in lens quality and reliability.

The Range Eye 1500 is widely used to measure the distance of outdoor physical objects.

Typical uses are recreational sports such as golfing, hunting, etc. It is also suitable to measure the distance of telegraph poles, bridges, on construction sites and may also be used for conventional topographical surveying and storage.

- **Compact and lightweight**
- **High measuring accuracy**
- **Automatic power cut when not in use**

Effective range .....	15-1500 m/yds
Tolerance .....	±1 m/yd
Indicating time .....	15 seconds
Magnification .....	7x
Objective .....	25 mm
Field of View .....	8 degree
Power supply.....	DC9 volt
Weight .....	422 grams

DISPLAY INDICATOR RETICLE PATTERN

Export Warning: These products are subject to one or more of the export control laws and regulations of the U.S. Government. Pending the model these products are under the control jurisdiction of either the US Department of State or the US Bureau of Industry and Security US Department of Commerce. Export without proper licensing or consent is strictly prohibited.
