- Verify package contents

- Connect USB cable

- Start using your mouse!

Note: The drivers for your mouse load automatically.

4. Where can I find warranty information?

Visit www.life-works.com/warranty

Troubleshooting:

1. My mouse does not work

- Ensure the USB cable is connected. If it is, try connecting it to a different USB port.

- Ensure the laser sensor on the bottom of the mouse is clean.

- Restart your computer.

Product Operating tips:

- The scroll wheel is also a button. Press the scroll wheel (without rolling it) to automatically scroll a document or web page, then move your mouse up or down to set the automatic scroll speed.

- Your mouse has two sensitivity settings, standard mode and high-performance mode. High-performance mode allows the cursor to move very quickly, and is useful for activities such as gaming. Press the DPI button (behind the scroll wheel) to switch from standard mode to high-performance mode and back.

When switching to high-performance mode, the scroll wheel blinks rapidly for 2 seconds. When switching to standard mode, the scroll wheel blinks slowly for 2 seconds.
