Targus Retractable Laser Notebook Mouse

Introduction

Congratulations on your purchase of the Targus Retractable Laser Mouse for notebooks. This ergonomic mini mouse features the latest in laser tracking technology. The improved tracking accuracy offers 20 times more sensitivity than a traditional LED optical mouse. The images received by the laser are more detailed with higher contrast. The mouse can track more reliably, even on reflective surfaces. This USB mouse provides hot swap and plug and play, with no need for software drivers. A retractable cable makes storage easy and saves space.

NOTE: WHILE THE MOUSE IS FUNCTIONING, NO LASER LIGHT IS VISIBLE TO THE NAKED EYE. BE CAREFUL NOT TO LOOK DIRECTLY INTO THE EMITTER HOLE WHILE THE MOUSE IS ACTIVE.

Package Contents

- USB Retractable Laser Notebook Mouse
- Carrying Pouch
- User Guide

System Requirements

Hardware

- USB Port

Operating System

- Windows 98SE/ME/2000/XP or Mac OS X and up

Operating Instructions

This Notebook Laser Mouse requires no driver or software.

- To extend the USB cord, hold the mouse in one hand and the USB connector in the other and pull both ends of the cord away from the cord wheel at the same time.

- To retract the USB cord, extend both ends of the cord slightly and release quickly.

When the ideal length of USB cord is fixed, plug the mouse USB connector into your computer's USB port and you are ready to go.

NOTE: DUE TO THE IMPROVED TRACKING SPEED OF THE LASER ENGINE, USERS MAY FIND THE CURSOR MOVEMENT IS FASTER THAN A CONVENTIONAL OPTICAL

MOUSE. CURSOR SETTINGS CAN BE CHANGED FROM THE CONTROL PANEL IN WINDOWS.

Safety Measures

- While the mouse is functioning, no laser light is visible to the naked eye. Although this mouse is a Class 1 Laser Product and safe for operation, avoid pointing the laser into the eyes or looking directly into the laser emitter.
- Keep the mouse away from young children.
- Any attempt to disassemble, adjust or repair the mouse may result in exposure to laser light or other safety hazards.

Troubleshooting

I do not see the laser light when the mouse is active.

- Unlike traditional optical mice, the light is not visible when the laser mouse is active.
- To make sure the mouse is on and functioning properly, move the mouse back and forth and check to see if the cursor responds.

My mouse does not work on a mirror or glass surface.

- Though rated for most of these kinds of surfaces, occasionally there will be one such surface that will cause the mouse to work improperly or not at all.
- If you are using the mouse on a reflective or mirrored surface, move it to another surface.

Product Registration

Targus recommends that you register your Targus accessory shortly after purchasing it. To register your Targus accessory, go to: <http://www.targus.com/registration.asp>

You will need to provide your full name, email address, phone number, and company information (if applicable).

Warranty

Targus warrants this product to be free from defects in materials and workmanship for one year. If your Targus accessory is found to be defective within that time, we will promptly repair or replace it. This warranty does not cover accidental damage, wear and tear, or consequential or incidental loss. Under no conditions is Targus liable for loss of, or damage to a computer; nor loss of, or damage to, programs, records, or data; nor any consequential or incidental damages, even if Targus has been informed of their possibility. This warranty does not affect your statutory rights.

Regulatory Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Statement Tested to Comply

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna;
- Increase the separation between the equipment and receiver;
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
