Proper Handling

Setup

1

Connecting USB Flash Drive to your computer

a

b

USB Flash Drive
Battery module

USB port

⚠ Do not press the buttons on your USB Flash Drive while connecting it to your computer.

2

⚠ Before unplugging your player from your computer, use the Windows Eject or Safely Remove Hardware function to safely disconnect your player.

Transferring Music Tracks

1. On your desktop, right-click the **My Computer** icon, and then click **Explore**. The USB Flash drive appears as a removable disk icon (Figure 1).

Figure 1

2. Drag and drop .MP3 or .WMA files only into your player. The LED on the MuVo Memory blinks red during data transfer.

   You can use other applications such as Creative MediaSource, Windows Media player or RealOne to manage the music tracks in your player.

Transferring Files

1. On your desktop, right-click the **My Computer** icon, and then click **Explore**.

2. Drag and drop files or folders into your player. The LED on the USB Flash Drive blinks red during data transfer.

Formatting your player

⚠ Your player supports the FAT16/32 (16/32-bit File Allocation Table) file system. Format your player with the FAT file system only.

If you need to format your player, backup the files in your player first. When you format your player, all songs and files will be deleted. By default, your player is already formatted.

1. Connect your player to your computer's USB port.

2. Launch Windows Explorer on your computer. Your player is recognized as a Removable Disk in Windows Explorer.

3. Right-click the **Removable Disk** icon and click the **Format** option. The **Format F:**dialog box appears (replace **F:** with the drive letter of your player).
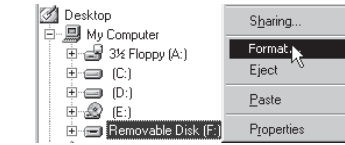

4. Follow the instructions on the screen to format your player.

5. After the formatting is complete, make sure you stop your player before disconnecting it from your computer.

For more information about using Windows Explorer, refer to its online Help.

Troubleshooting

The player's LED does not light up.
Do the following:
☐ Insert a new battery into your player.
☐ Format your player as described above in "Formatting your player".

File transfers to the player are very slow (less than 100kb/sec).
Do the following:
☐ Format your player as described above in "Formatting your player".

After playing the first few music tracks, the player skips a music track.
Do the following:
☐ Format your player as described above in "Formatting your player".

The player's LED is red and there is no playback.
Do the following:
☐ Make sure that there are music tracks stored in your player.

Files/music tracks are corrupted when transferred to the player.
☐ Before unplugging your player from your computer, use the Windows Eject or Safely Remove Hardware function to safely disconnect your player.

The player's LED turns from green to red instantly when a music track is played.
☐ Using Windows Explorer, delete the SETTINGS.DAT file from your player.

The player turns off immediately after it is turned on.
☐ Using Windows Explorer, delete the SETTINGS.DAT file from your player.

How To Use Your Player

Inserting the battery

a   b

c

Remember to unplug the USB Flash Drive from your computer and insert it into the battery module before turning on the player.

Turning on the player
Press and hold the **Play/Pause** button for a few seconds. The LED turns green and there is music playback. If, however, there are no music tracks in your player, the LED turns red.
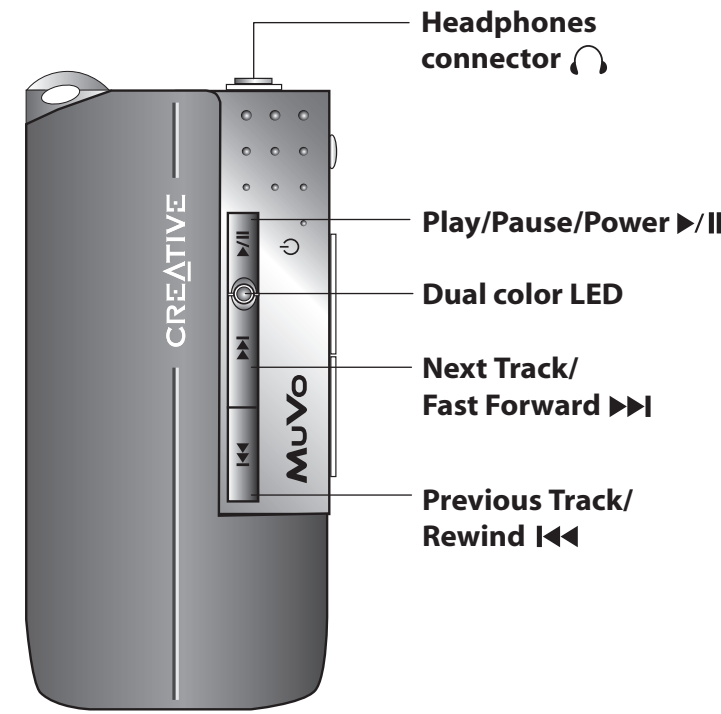

Turning off the player
Press and hold the **Play/Pause** button for a few seconds until after the LED turns off.

Pausing a music track
Press the **Play/Pause** button. The LED turns red.

Repeating a music track
Press and hold the **Repeat A-B / Track** button for a few seconds. The LED blinks green. To resume normal playback, press the **Repeat A-B / Track** button again.

Repeating a portion of a music track
Press the **Repeat A-B / Track** button to mark the beginning of the portion you wish to repeat. The LED blinks green. Press the **Repeat A-B / Track** button again to mark the end of the portion. The LED blinks green at a slower speed, and the marked portion is played back repeatedly. To resume normal playback, press the **Repeat A-B / Track** button again.

✎ If the LED on the player blinks red, the battery power is low. If the LED on the player is a steady red, there are no tracks in your player.

✎ The battery life depends on the type of battery used. It is recommended that you use alkaline batteries. Playing .WMA files with a high bass level may also reduce your battery's life significantly.
