World Best MP3 Player & Digital Voice Recorder

EVR-M750/M760

User's Manual

BE sure read this user manual before using the EVR-M750/760.
Keep this manual in good custody it may be useful later.

Table of Contents

Safety notes

Read this manual completely before using this product.

Keep away from the reach of infants and children. Batteries are dangerous to them. If anyone swallows the battery, consult with doctor immediately.

Do not short, disassemble, heat, apply pressure or throw into fire. It can cause electrolyte leakage, overheat, breakdown or fire.
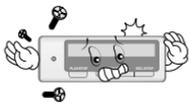

If your eyes are contaminated with battery electrolyte, wipe out with clean water and receive medical attention immediately. You may lose your vision if not treated properly.

If the LCD screen is broken, never touch oozing fluid. If your eyes or skin is contaminated, wipe out with clean water and consult with doctor.

Do not use the earphone while driving a bike, car or motorcycle. It is dangerous or even illegal depending on the local conditions. Do not set the volume level of earphone loudly during walking.

Do not set the volume level of earphone loudly. Doctors point out the risk of listening to loud sound for a long time. If you feel echoing in your ears, reduce the volume or stop using the earphone.

Make sure to use the alkaline battery (1.5V, LR03, AAA size or UM-4). If you use the charger, malfunction can occur and cause serious noise, which can injure your hearing sense.
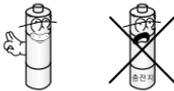

Do not drop or apply strong shock to the player. It may cause malfunction.

Do not put the magnetic materials such as a cash card close to the microphone. Magnetism can be changed by these materials and the card may be damaged.

Do not keep in the rear pocket of your pants. When you sit down, the LCD unit made of a glass can be damaged.

Stay away from the direct sunlight, high-temperature area like a heater.

When you want to delete dust instead of fluid solution (thinner or benzene), you should use the soft or wet cloth.
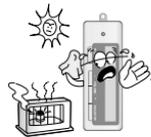

Do not press the LCD unit strongly since it is made of glass.

Do not press the key strongly as shown in the figure. It may be broken.

Features

- **Digital music playback**
  Plays back the MP3 and WMA type digital music.(For WMA file playback, bit rate of 64Kbps or more is available.)
- **FM radio reception and recording**
  Available to listen to FM radio and record the FM broadcasting.
- **Digital interface (USB)**
  Saves the recorded files in PC and plays back in media player or sends email (including attachment with motion picture).
- **Portable storage device**
  Available to use as a storage device that conveniently carried with.
- **Graphical LCD**
  Supports various languages and files by supporting graphical display.
- **LCD backlight**
  You can set the backlight up to 5 seconds.
- **Equalizer setting**
  Sets the audio playback tone quality (Normal _Classic _Live _POP _Rock).
- **Navigation function**
  Navigates track while another track is played back.
- **Automatic FM radio channel setting**
  Up to 20 FM radio channels can be set automatically.
- **Automatic station scanning**
  The optimal frequency is automatically scanned for FM radio.
- **Local selection mode (FM radio)**
  You can select FM frequency that corresponds to your residential area (Korea, U.S., Europe or Japan).
- **Telephone recording**
  Records the ordinary telephone or mobile phone.

- **Connection to external devices**
  Records the sound from the outputs of external device or send the recorded sound to external devices.
- **Continuous recording**
  Up to 35 hours (128MB) and 71 hours (256MB) can be recorded.
- Free memory display
  The player will figure out the memory in use as well as the remaining amount.
- **Resume function**
  The last played back point will be saved even though the power is turned off.
- **Easy-to-use operation button**
  Easy-to-use basic buttons such as the PLAY, REC or STOP as well as other functional buttons such as DELETE or FOLDER are exposed to external side.
- **Automatic power off**
  The player will be turned off automatically if it is not used for more than a minute.
- **Recording sound quality setting**
  You can set the recording sound quality depending on the situations – high quality (HQ), standard quality (SP) or long-hour sound quality (LP).
- **Folder function**
  The player provides 6 folders including 4 recording folders, 1 music folder and 1 data folder.
- **Formatting function**
  Deletes all saved data and checks the bad section.
- **Section (A-B) repeat function the bad sector**
  You can set the specific section of the file and play it back repeatedly.
- **Repetitive playback function**
  You can repeat playback by designated setting (Normal _One _Folder _Random _All).
- **Simultaneous playback of the recording details**
  You can listen to the recording details while recording it.

Package contents

Voice Recorder   Earphone   USB connection cable   User's Manual   Battery (AAA)

Installation CD   Neck strap

Optional

Phone connection cord/adaptor   External microphone   External device connection cable
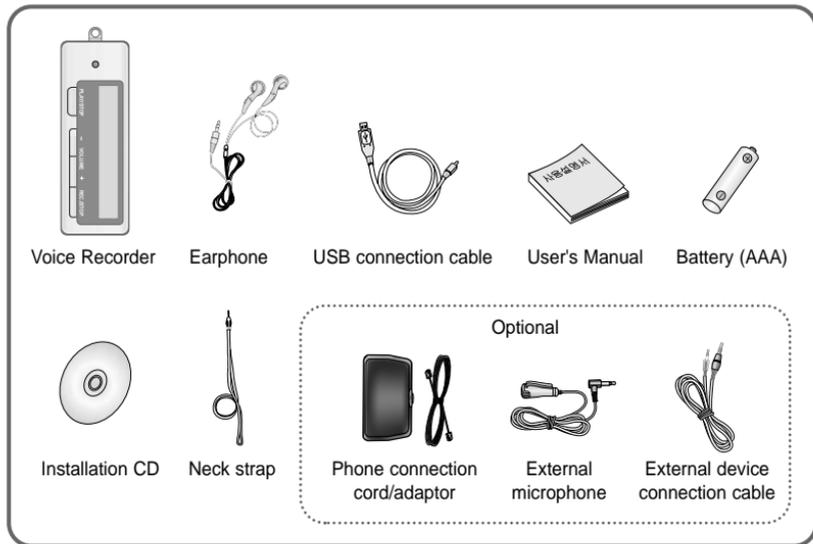

● If these accessories are damaged or broken, you can get them from the Service Center.
● Appearance of the components is subject to change for the purpose of enhancing performance.

● The Erasing all files menu will appear.

FORMAT

3 Select the "ERASE YES" using the REW/FF button and press the Menu button to delete all files.
● All saved files will be deleted.
● To cancel file deletion, press the Play/Stop button or select the "ERASE NO".

ERASE YES
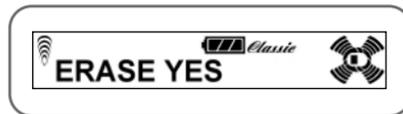

Notice :
● If you select the "FORMAT", all voice and music files as well as the data files downloaded from the PC will be deleted permanently. Check again before formatting.

Setting the Intro scan

Press the Play/Stop button longer than 2 seconds while playing back MP3 or VR files.

● Starting from the current file, the intro section of all files will be played back for
7 seconds, and the mode will be released and the initial state will be resumed.
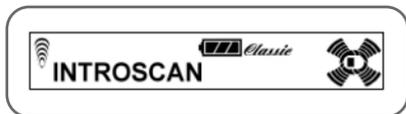

Setting menu (when the MP3 is selected)

1 Press the Play/Stop button to turn on the power and select the MP3 mode.

2 After pressing the Menu button in the Playback or Stop mode, move to the
intended function using the REW/FF button.
  ● You can select all functions in the Playback mode.
    The mode will be selected by the order of EQ Mode ➜ REPEAT ➜ LCD light ➜ DISPLAY ➜
    RESUME ➜ NAVIGATION ➜ FREE MEMORY when you pull toward the "FF" button.
  ● You cannot set the navigation function in the Stop mode.

3 Press the Menu button gain to select the function. It will return to the previous
screen.
  ● After setting the function, press the Menu button to move to the next menu. Likewise,
    you can set other menu.
  ● If you don't input anything for 5 seconds in the Menu mode during playback, the Menu
    mode will be released.

Setting My Option (when the MP3 is selected)

Setting the EQ mode

1 After pressing the Menu button in the Playback or Stop mode, select the EQ Mode using the REW/FF button.
- The player will enter the Sound setting mode.

2 Select the tone you want using the REW/FF button.

EQ NORMAL
Normal mode

➡ EQ CLASSIC
Classic mode ➡

EQ LIVE
Live mode

➡ EQ POP
Pop mode ➡

EQ ROCK
Rock mode
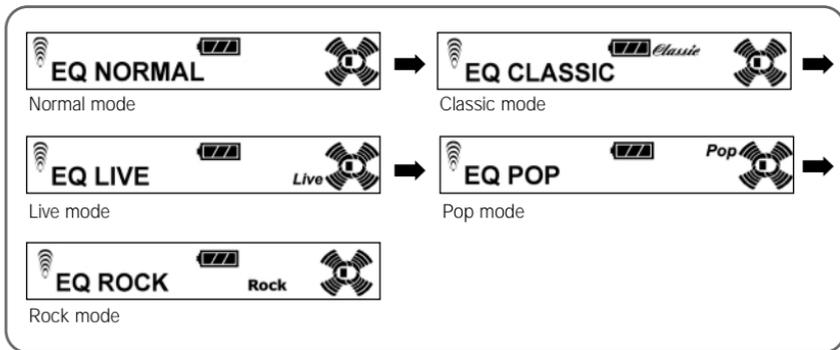

3 Press the Menu button again to save the setting.

Setting the Repetition

You can playback the selected file once or repeatedly.

1 Press the Menu button in the Playback or Stop mode and select the REPEAT using the REW/FF button.

2 Select the repetition type you want using the REW/FF button.

RPT NORMAL
No repetition.

➡ REPEAT ONE
Repeats one file. ➡

REPEAT RANDOM
Repeats all files randomly.

➡ REPEAT ALL
Repeats all recorded files. ➡
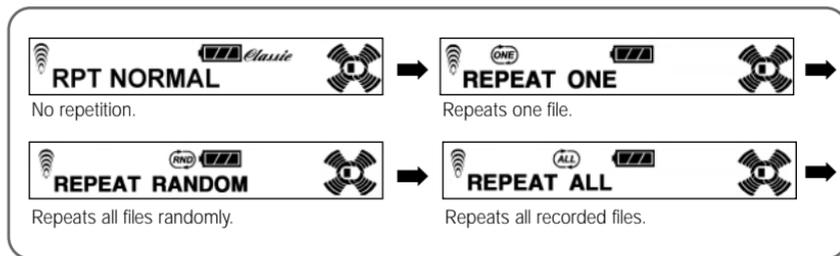

**3** Press the Menu button again to save the setting.

Note :
- The "**REPEAT FOLDER**" will be enabled in the VR mode because there are saved folders – A, B, C and D.
- The REPEAT NORMAL → REPEAT ONE → REPEAT FOLDER → REPEAT RANDOM → REPEAT ALL will be displayed.

Setting the LCD light

1 After pressing the Menu button in the Playback or Stop mode, select the LCD light using the REW/FF button.

2 Select the time you want using the REW/FF button.
- You can set the flashing time of the LCD light by 5 steps (2 – 5 seconds) after button manipulation.

|	
LIGHT 2SEC	LIGHT 3SEC
LIGHT 4SEC	LIGHT 5SEC
LIGHT OFF	
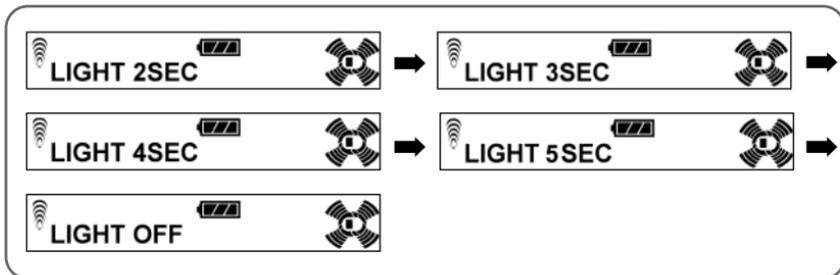

3 Press the Menu button again to save the setting.

Setting the display

You can check file name, playback time or remaining playback time (or available recording time), depending on the settings.

1 After pressing the Menu button in the Playback or Stop mode, select the Display using the REW/FF button.

2 Select information you want using the REW/FF button.

|	
DISPLAY NORMAL	The elapsed time of current recording or playback is displayed.
DISPLAY TITLE	File name is displayed.
DISPLAY REMAIN	The remaining playback time is displayed. The available recording time is displayed while recording.
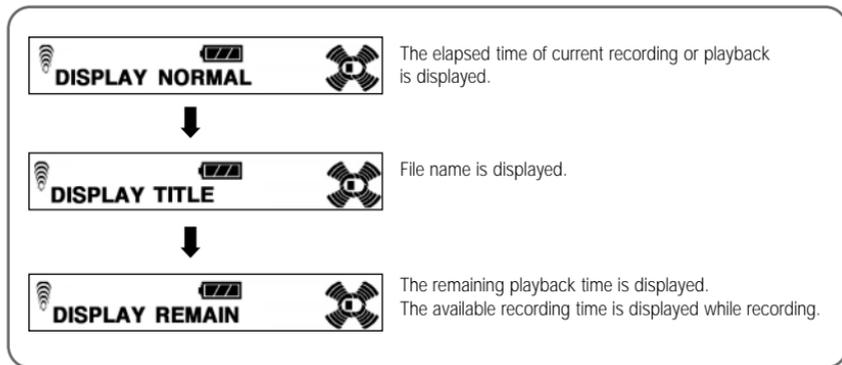

Setting the Resume function

If you stop playback by pressing the Play/Stop button during playback and start playback again, the playback will be resumed from the last played position.

1 After pressing the Menu button in the Playback or Stop mode, select the RESUME using the REW/FF button.

● AREA EUROPE (China, ASIA, CIS, AFRICA and East ASIA): 87.5 kHz ~108 kHz, step:50 kHz
● AREA USA (Canada, South America): 87.5 kHz ~108 kHz, step:100 kHz

Connecting to external devices

Recording by connecting to audio

You can save the outputs from the external devices as the EVR type or records the file saved in the MP3 player in external devices.

1 Connect the microphone input terminal of the MP3 player to the output terminal of the external device using the external device connection cable.

Audio
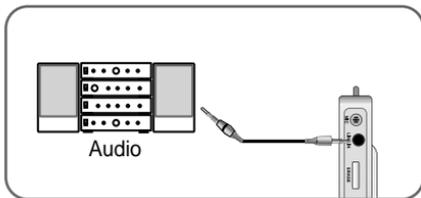

2 Press the REC/Stop button in the MP3 player while playing back in the external device.

● The input details will be heard from the MP3 player earphone and recording will be started.

3 Press the REC/Stop button again to stop recording.

Note :

● To adjust recording sound level, use the audio's volume control function.
● Recording sound quality can be deteriorated depending on performance of the external devices.

Recording the recorded contents to audio

1 Connect the microphone output terminal of the MP3 player to the input terminal of the external device using the external device connection cable

Audio
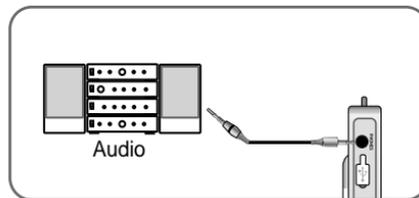

2 Select a file to record in the external device.

3 Press the Play/Stop button of the MP3 player and the REC button of the external device at the same time.

● The contents in the MP3 player will be recorded in the external device.

4 Press the Play/Stop button of the MP3 player and the STOP button of the external device at the same time to stop recording.

To connect the player to your PC

To install the X-ONE Manager
You can upload the file saved in the player to the PC, or download the file saved in the PC to the player.

System requirements
Computer: Pentium or faster CPU on the IBM compatible PC with USB port support.
Memory: 64MB or more.
OS: Windows 98/Me /2000 /XP
HDD: More than 100MB free disk space
Playback: Sound card and speaker
Recording: Sound card and speaker

When you insert the "X-ONE Manager" CD into the CD-Rom driver, the installation window will appear after a while. If the installation window is not popped up, double-click the "SETUP.exe" after opening My Computer and selecting the "CD-ROM".

1 Select the language to use.

2 Press the **[Next]** button in each window that appears sequentially.

3 When the installation is completed, the shortcut icon ( ) will be appeared on the desktop window.

Note :

● To uninstall the X-ONE Manger, select [Start] → [Settings] → [Control Panel] → [Add/Remove Program] or select [Start] → [Programs] → [X-ONE] → [X-1manager] → [Uninstall].

To install the driver

To install the driver on WINDOW 98/ME/2000
The driver will be automatically installed when you connect the player to the PC after installing the X-ONE Manager. If the PC cannot recognize the player, the "New Hardware Installation Wizard" message will appear. In this case, take the following steps.

Press the **[Next]** button in each window that appears sequentially.

Note :
● If the "New Hardware Installation Wizard" window is not displayed, disconnect the product from your PC and run the process as follows.
Remove the USB device in My Computer → Control Panel → System → Device Manager → 'Other Devices' folder → Remove 'USB DEVICE' and connect the product to your PC again.

Click the 'Browse' and specify the path as follows.
C:\Program Flles\X-ONE\X-ONE Manager\Driver
Then, click 'Next'.

Continued...

To install the driver on WINDOW XP

If you install the X-ONE Manager and connect the product to your PC, the "New Hardware Installation Wizard" window is displayed.

Press the **[Next]** button in each window that appears sequentially.

Click

Click

Click

Click

Click

Click the 'Browse' and specify the path as follows.
C:\Program FIles\X-ONE\X-ONE Manager\Driver
Then, click 'Next'.

Using the X-ONE window and icon

Double-click the X-ONE shortcut icon on the desktop window while the USB is connected to run the X-ONE program.
