## GIGA one ultra

Ultra Fast, Ultra portable and Ultra Affordable

The JOBO GIGA one ultra will copy, store, and instantly free up precious space on your cameras' memory card. This advanced photo device is the digital album of choice when you need basic copy and storage features along with an **extremely high-speed data transfer**. Download images from your memory card to the GIGA one ultra at a speed of up to 5.47 MB per second. That's about 1GB in only 3 minutes! Copy and store your photos fast, effortlessly and without a PC. No need to buy a lot of memory cards - just download, erase your card and keep taking pictures. Your photos are securely saved on the units' high-quality internal hard drive.

The JOBO GIGA one ultra is a cost-effective photo storage device available in 4 **convenient hard drive sizes** - **40, 80, 120, and 200 GB**. It features a durable aluminium housing and **built-in memory card slots supporting all popular card formats including SDHC**. The JOBO GIGA one ultra is an absolutely simple and stable solution for saving your images and data. It can also serve as a card reader as well as an external hard drive for PC or Mac. The bright display screen on this light-weight device shows battery status and available hard drive space. In addition, it offers a power saving function.

The rechargeable JOBO GIGA one ultra comes complete with an internal Lithium-Ion battery, A/C Charger/power cord, and a cable for fast USB 2.0 computer connection. When you're on location, or travelling away home, this photo partner is perfect as a permanent, secure storage system for all your digital pictures.
