Sunbeam's Safety Precautions

SAFETY PRECAUTIONS FOR YOUR SUNBEAM FUSION BENCHTOP BLENDER.

- Ensure fingers are kept well away from the blades when in use.
- Always operate on a flat level surface.
- Ensure the control dial is in the off "O" position before plugging into the power outlet.
- Do not operate for more than 1½ minutes at a time.

Sunbeam are very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercise care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:

- Read carefully and save all the instructions provided with an appliance.
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug - do not pull on the cord.
- Turn the power off and remove the plug when the appliance is not in use and before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- Close supervision is necessary when your appliance is being used near children or infirm persons.
- Never leave an appliance unattended while in use.
- Young children should be supervised to ensure that they do not play with the appliance.
- Do not use an appliance for any purpose other than its intended use.
- Do not place an appliance on or near a hot gas flame, electric element or on a heated oven. Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench top or touch any hot surface.
- For safety reasons and to avoid maintenance by unskilled persons, some appliances are 'sealed' using tamperproof screws. Such appliances should always be returned to the nearest Sunbeam Appointed Service Centre for adjustment or repair if required.
- Do not operate any electrical appliance with a damaged cord or after the appliance has been dropped or damaged in any manner. If damage is suspected, return the appliance to the nearest Sunbeam Appointed Service Centre for examination, repair or adjustment.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.

If you have any concerns regarding the performance and use of your appliance, please visit www.sunbeam.com.au or contact the Sunbeam Consumer Service Line. Ensure the above safety precautions are understood.

Before using your Sunbeam Fusion

Important: Always ensure your blender is unplugged from the power outlet before fitting or removing the blade assembly. Always handle the blade assembly with caution, as the blades are extremely sharp.

To assemble the Fusion (See Figure 1)

1. Place the silicone rubber seal ① over the blade assembly ②, as shown opposite.
2. Position the blade assembly ② into the base of the blender jug ③. Ensure that the blade assembly is firmly in place by turning it clockwise as indicated by the arrow.
3. Plug the power cord into a 230-240 volt power outlet and turn the power 'ON'.

Note: Do not attempt to remove the stainless steel blades from the blade assembly.

Figure 1

Using your Sunbeam Fusion

1. Place the blender jug on the motor base. The jug can be placed on the motor base in 4 different positions, each being at 90° degree angles, see figure 2.

Figure 2

2. Place ingredients into the jug. Do not exceed the maximum indicated level - 1.5 litres.
3. Place the measuring cup into the lid, see figure 3a. Rotate the cup either clockwise or anti-clockwise, this will lock the cup into the lid, see figure 3b.

Figure 3a

Figure 3b

4. Place the lid with the measuring cup onto the blender jug. Holding the measuring cup, rotate the cup clockwise until you are unable to turn it any further, see figure 4, the lid is now locked in place.

Figure 4

5. Using the control dial, select the desired blending speed, 1, 2 or PULSE. Settings 1 and 2 will provide continuous blending until the dial is turned to the OFF position. Further ingredients can also be added whilst blending by removing the measuring cup and pouring ingredients through the hole in the lid.
6. After you have completed blending, turn the dial to the '0' position.

Note: When removing the blade assembly from the jug you may need to slightly tilt the blade so that it slides out easily. You shouldn't be forcing the blades out of the jug, as this will ultimately damage the blades.

Feature Uses of the Blender

Crushing Ice

Simply add ice to the blender and a small quantity of water, which will aid in the crushing process. Then with the control dial select the 'Pulse' function and hold for 1-2 seconds then return the dial to the 'OFF' position. Continue this process and in seconds your ice is fluffy and snow flake-like.

Pulse setting

The pulse function provides short bursts of power, so that you can prepare breadcrumbs, grind chocolate, finely grind nuts and biscuits.

You can also use the Pulse function for cleaning the blender. Simply pour in some warm water and a small amount of detergent, then turn the control dial to the 'Pulse' function for 1-2 seconds. Repeat 3-4 times. The unit will clean itself, without you having to handle the sharp blades. Rinse and dry, being careful as the blades are sharp.

Handy Blending Hints

- Nothing can beat a blender for making smooth purees and sauces or for whipping up frothy drinks - from healthy breakfast shakes to frozen daiquiris.
- Use your blender for chopping small amounts of food like nuts, bread crumbs and whole spices.
- Turn any oil-based salad dressing into a creamy style dressing by blending it until slightly thickened.
- A brief whirl in the blender will rescue a lumpy gravy, or an egg-based sauce that has separated.
- When crushing ice, add $\frac{1}{4}$ cup of water, as this will aid in the ice crushing process. Continue pulsing until the ice is completely crushed and it has a snow flake texture.
- Food items for blending should be cut into cubes (approximately 2-3cm), this will assist in achieving an even result.
- Ensure the lid is firmly and securely placed on the jug. Do not operate the blender without the lid on, if you wish to add any additional ingredients remove the measuring cup and add as necessary.
- Never fill above the maximum level indicator.
- To ensure efficient mixing when blending dry mixtures, it may be necessary to stop the blender and push ingredients down the sides of the jug with a spatula.
- When pureeing fruits or vegetables, cooked or raw, cut into small pieces to facilitate blending.
- When making bread crumbs, use 2 to 3 day old bread, leaving crusts on to minimise the possibility of clumping. If only fresh bread is available, dry it out for a few minutes in a low oven.
- When blending a variety of ingredients together, blend the liquids first, then add dry ingredients.
- Always ensure stones are removed from fruits and bones from meat as these can harm the blades.
- Don't allow a used blender to sit for too long as the food will dry on the blades making it very difficult to clean. If you can't clean the blender straight away, pour some warm water in it and allow to soak.
- Do not process hot liquids in your blender. Allow to cool before processing.
- Always ventilate the blender jug when pureeing warm ingredients. This is achieved by lifting the measuring cup out of the lid.
